

Product Design Specialization Course Lesson Plan

Month 1 : Graphic Design Foundations

Day 1: Introduction to Graphic Design & Visual Literacy

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1: Graphic Design Foundations	Ensure students understand the "AI-First" distinction immediately.
Module/Week	Week 1: Introduction to Graphic Design & Visual Literacy	Focusing on the "Foundations" stage of the Double Diamond.
Session Title	Day 1: Introduction to Graphic Design & Visual Literacy	Marketplace logic is the core business model for the Taska project.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 1, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO 1: Foundational Graphic Design Literacy	
Session Learning Objective (SLO)	By the end of this session, students will be able to define core graphic design principles and analyze effective visual communication using AI-assisted research tools.	
Core Deliverable Link	Brand Identity Pack	Initial contribution: Mood board & design analysis

III. Resources

Item	Details
Presentation/Slides	
Handout/Worksheet	Design Analysis Template
Technology/Tools	Figma/Canva, ChatGPT, Gemini
AI Tool Prompt	"Analyze why this specific design works visually in terms of its composition and communication goals."
Pre-Reading/Prep	Canva Design School - Design Principles; Visual Communication Basics (Interaction Design Foundation)

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Share a high-impact vs. low-impact design comparison.
Review	2 min	Overview of the 4-week program structure and goals.
Agenda & SLO	2 min	Define the role of a designer and visual literacy.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define Graphic Design; discuss roles (branding, digital, print) & good vs. poor design.	Use Socratic questioning to identify student's current visual preferences.
I Do (Demo)	10 min	Demonstrate how to use Gemini/ChatGPT to research startup brands and analyze design hierarchy.	Focus on ethical AI use for inspiration, not plagiarism.

We Do	10 min	Start a mood board in Figma/Canva. Analyze 3 strong designs together.	Ensure students are logged into tools and exporting properly.
Critical Analysis & Assessment	10 min	Critique the mood board selections. How does the chosen imagery reflect design principles?	Connect today's analysis to the final Brand Identity Pack.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Clarify mood board requirements.
Wrap-up	1 min	Summary of visual communication basics.
Homework/Next Session	2 min	Finalize mood board; prepare for Day 2: Elements of Design.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Uploaded mood board and 3 design analysis notes.	Current Session SLO	
Summative	Evidence of mood board in final Brand Identity Pack.	Brand Identity Pack	
Soft Skill Gate	Active participation during design analysis.	TLO 1 (Professional Foundations)	

Day 2: Elements of Design

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1 — Graphic Design Foundations	Ensure all instructor materials are synced to the Month 1 master folder.
Module/Week	Week 1: Introduction to Graphic Design & Visual Literacy	Focus: Transitioning from broad literacy to specific design elements.
Session Title	Day 2: Elements of Design	Ensure students have access to the Figma "Elements" starter file.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 2, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Establish strong visual literacy and foundational design skills.	Link session back to the "Brand Identity Pack" capstone goal.
Session Learning Objective (SLO)	Students will apply Line, Shape, Space, Texture, and Scale to an abstract composition using AI-assisted tools .	Use the "I Do, We Do" method to ensure mastery of these 5 elements.
Core Deliverable Link	Abstract Composition Poster	This is a foundational piece for the eventual Brand Identity Pack.

III. Resources

Item	Details
Presentation/Slides	
Handout/Worksheet	Non-Designer's Design Book excerpts
Technology/Tools	Figma, ChatGPT, Canva Magic Design

AI Tool Prompt	"Generate abstract poster composition prompts based on [Element Name]."
Pre-Reading/Prep	Figma beginner tutorials

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a master-level abstract design; ask students to identify the Line, Shape, and Scale.
Review	2 min	Recap Day 1 (Design Roles & Visual Communication).
Agenda & SLO	2 min	Define the 5 core elements of design and their role in the capstone .

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define Line, Shape, Space, Texture, Scale .	Use Socratic questioning to relate these elements to real-world brands.
I Do (Demo)	10 min	Live demo: Using Figma to manipulate elements; using Canva Magic Design for layout.	Show troubleshooting for common "AI-glitch" errors in layout.
We Do	10 min	Guided practice: Students create an abstract poster using these elements.	Circulate the room to ensure all students have the base file open.
Critical Analysis & Assessment	10 min	Discuss "We Do" results; critique based on element usage.	Relate the poster's success to the principles of the Brand Identity Pack.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Answer questions on tool-specific technical issues.
Wrap-up	1 min	Recap: How these 5 elements build a foundation for identity.
Homework/Next Session	2 min	Assign: Polish abstract poster; prep for Day 3 (Principles of Design).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Abstract poster submission.	Current Session SLO	
Summative	Evidence included in the final Brand Identity Pack.	Core Deliverable	
Soft Skill Gate	Engagement in critique circle.	TLO (Professional Foundations)	

Day 3: Principles of Design

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1 — Graphic Design Foundations	Ensure alignment with Week 1 instructional progression.

Module/Week	Week 1: Introduction to Graphic Design & Visual Literacy	Focus: Moving from individual elements to organized principles.
Session Title	Day 3: Principles of Design	Confirm student access to Figma design basics tutorials.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 3, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Understand design fundamentals, visual communication, and core principles.	Ensure TLO links directly to the development of visual literacy.
Session Learning Objective (SLO)	Students will be able to apply Balance, Contrast, Hierarchy, Alignment, Repetition, and Proximity to redesign a poor flyer .	Focus on the "CRAP" principles as a primary framework.
Core Deliverable Link	Flyer redesign	This serves as a key deliverable for the Week 1 capstone progress.

III. Resources

Item	Details
Presentation/Slides	
Handout/Worksheet	Flyer critique and redesign template
Technology/Tools	Figma, ChatGPT
AI Tool Prompt	"Critique my flyer hierarchy."
Pre-Reading/Prep	CRAP Principles articles

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Start with a real-world flyer that fails in visual hierarchy.
Review	2 min	Recap elements of design from Day 2 and answer questions.
Agenda & SLO	2 min	State the session objective: Mastering the CRAP principles.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Introduce Balance, Contrast, Hierarchy, Alignment, Repetition, and Proximity .	Use Socratic Method to identify which principles are missing in the sample flyer.
I Do (Demo)	10 min	Demonstrate Figma techniques for hierarchy; show how to use ChatGPT for critique.	Emphasize ethical/safe use of AI.
We Do	10 min	Students work on the flyer redesign while the instructor circulates.	Check that students are successfully saving and exporting the design.
Critical Analysis & Assessment	10 min	Discuss the results of the "We Do" phase; re-emphasize the link to the Brand Identity Pack.	Use exit tickets to assess understanding of the flyer's new hierarchy.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address technical roadblocks for the homework.
Wrap-up	1 min	Summarize the key takeaway/SLO.

Homework/Next Session	2 min	Assign finalization of the flyer redesign.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket submitted with accurate data.	Current Session SLO	
Summative	Evidence of work in the Flyer Redesign deliverable.	Core Deliverable.	
Soft Skill Gate	Active participation during the "We Do" phase.	TLO (Professional Foundations)	

Day 4: Practice + Support Day

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1 — Graphic Design Foundations	Ensure all students have access to previous week's design assets.
Module/Week	Week 1: Introduction to Graphic Design & Visual Literacy	Focus: Buffer/Studio time for consolidation of skills.
Session Title	Day 4: Practice + Support Day	Prepare the studio environment for peer critique circles.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 4, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Establish strong visual literacy and foundational graphic design skills.	Track student progress against weekly deliverables.
Session Learning Objective (SLO)	Students will refine their mood board, abstract poster, and flyer redesign based on feedback and instructor support .	Identify students falling behind for targeted intervention.
Core Deliverable Link	Week 1 Deliverables: Mood board, Abstract poster, Flyer redesign	Confirm all students are caught up on these three items.

III. Resources

Item	Details
Presentation/Slides	N/A (Studio Day)
Handout/Worksheet	Project Progress Checklist
Technology/Tools	Figma, Canva, AI tools
AI Tool Prompt	"Critique my [project] based on [design principle]."
Pre-Reading/Prep	Review previous instructor feedback

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Explain the value of a "Buffer/Studio Day" in professional design.
Review	2 min	Quickly overview the 3 major deliverables for Week 1 .
Agenda & SLO	2 min	Define goals: Refinement, support, critique, and catching up .

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Outline studio expectations: Refinement, support, and critique .	Set strict norms for constructive peer feedback.
I Do (Demo)	10 min	Demonstrate how to give/receive feedback effectively using design terminology.	Model a "Positive-Constructive-Positive" critique style.
We Do (Guided)	10 min	Peer critique circles and instructor support for struggling learners .	Circulate to identify learners who are falling behind.
Critical Analysis & Assessment	10 min	Individual/Small group refinement of mood board, poster, and flyer .	Check that files are being prepared for final export.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address final roadblocks for Week 1 project completion.
Wrap-up	1 min	Confirm the goal: All students are caught up on Week 1 deliverables .
Homework/Next Session	2 min	Prepare for the Day 5 Weekly Studio Challenge .

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of refined project drafts.	Current Session SLO	

Summative	Completion of Week 1 deliverables.	Core Deliverable	
Soft Skill Gate	Engagement in peer critique circles.	TLO (Professional Foundations)	

Day 5: Weekly Studio Challenge

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1 — Graphic Design Foundations	Ensure students have access to the "Studio Project" requirements.
Module/Week	Week 1: Introduction to Graphic Design & Visual Literacy	Focus: Weekly Studio Challenge.
Session Title	Day 5: Weekly Studio Challenge	Prepare digital space for the social media post challenge.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	
Date	Day 5, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Understand design fundamentals, visual communication, and core principles.	Link challenge to the cumulative skills of Week 1.

Session Learning Objective (SLO)	Students will apply Hierarchy, Contrast, and Alignment to design a social media event post .	Ensure students utilize AI for copywriting support .
Core Deliverable Link	Social post challenge	This is the final deliverable for the Week 1 studio challenge.

III. Resources

Item	Details
Presentation/Slides	
Handout/Worksheet	Challenge requirements checklist
Technology/Tools	Figma, Canva, ChatGPT
AI Tool Prompt	"Generate headline ideas and CTA copy for a [Event Type] social media post."
Pre-Reading/Prep	Review Week 1 principles

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Introduce the "Weekly Studio Challenge" social media post task.
Review	2 min	Quickly recap core design principles (Hierarchy, Contrast, Alignment)
Agenda & SLO	2 min	Define the goal: Apply Week 1 learning to a real-world social media asset.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
-------	------	--------------------------	---------------------------

Hook & Context	10 min	Assign the social media post challenge: Design an event post using Hierarchy, Contrast, and Alignment .	Distribute the design parameters.
I Do (Demo)	10 min	Demonstrate how to use ChatGPT for headline/CTA generation .	Model efficient AI-assisted workflow.
We Do	10 min	Workshop time: Students build the post; instructor provides one-on-one help.	Use this time for the 30-45 minute support block.
Critical Analysis & Assessment	10 min	Rapid peer-review/feedback on the social media post.	Ensure design choices are justified by Week 1 principles.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address specific technical questions from the studio challenge.
Wrap-up	1 min	Summarize the Week 1 accomplishments.
Homework/Next Session	2 min	Finalize all Week 1 deliverables; preview Week 2 (Color Theory + Typography).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Submission of the social post challenge.	Current Session SLO	
Summative	Completion of Week 1 deliverables (Mood board, Poster, Flyer, Social post).	Brand Identity Pack	

Soft Skill Gate	Active participation in the studio challenge.	TLO (Professional Foundations)	

Day 6: Lean Research & Identifying Bias

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1 — Graphic Design Foundations	Ensure students have transitioned from Week 1 basics to Week 2 theory.
Module/Week	Week 2: Color Theory + Typography	Focus: Introduction to color psychology and branding palettes.
Session Title	Day 6: Color Theory Fundamentals	Ensure students have browser access to Adobe Color and Coolors.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 6, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Develop foundational skills in color, typography, and composition.	Link session to the "Brand Palette" capstone piece.
Session Learning Objective (SLO)	Students will be able to apply color theory to create brand-specific palettes (Luxury, Playful, Tech) using AI and web tools .	Focus on the psychological impact of chosen colors.

Core Link	Deliverable	Palette Board	This contributes to the Brand Identity Pack.
-----------	-------------	---------------	--

III. Resources

Item	Details
Presentation/Slides	
Handout/Worksheet	Palette board template
Technology/Tools	Adobe Color Wheel, Coolors.
AI Tool Prompt	"Suggest palettes for a sustainable coffee brand."
Pre-Reading/Prep	Adobe Color Wheel; Coolors.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show two brands with drastically different color identities; discuss the "mood" they create.
Review	2 min	Recap the Week 1 Mini Capstone deliverables and transition to Week 2.
Agenda & SLO	2 min	Introduce the Color Wheel, Harmony, Psychology, and Brand Palettes .

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define core theory: Color wheel, harmony, psychology, and brand usage .	Use Socratic Method: "Why might a tech company choose blue over red?"

I Do (Demo)	10 min	Live demo: Using Adobe Color/Coolors and Gemini to generate a sustainable brand palette.	Demonstrate the "Export" and "Save" features for professional output.
We Do (Guided)	10 min	Workshop: Students generate 3 palettes: Luxury, Playful, and Tech .	Circulate the room to assist with tool navigation.
Critical Analysis & Assessment	10 min	Discuss the palettes: Does the "Luxury" palette actually feel luxurious? Why/Why not?	Re-emphasize the link to the final Brand Identity Pack.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Answer questions regarding color harmony and psychology.
Wrap-up	1 min	Summarize the key takeaway (Color sets the brand voice).
Homework/Next Session	2 min	Finalize palette board; preview Day 7 (Typography Basics).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Palette board submission.	Current Session SLO	
Summative	Evidence included in the final Brand Identity Pack.	Core Deliverable	
Soft Skill Gate	Engagement during the palette analysis discussion.	TLO (Professional Foundations)	

Day 7: Typography Basics

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1 — Graphic Design Foundations	Ensure students have access to the typography reference files.
Module/Week	Week 2: Color Theory + Typography	Focus: Mastering font pairings and legibility.
Session Title	Day 7: Typography Basics	Verify students have access to Google Fonts and Canva.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	
Date	Day 7, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Develop foundational skills in color, typography, and composition.	Link progress to the "Typography System" capstone goal.
Session Learning Objective (SLO)	Students will be able to distinguish between serif/sans fonts, pair them effectively, and ensure readability .	Focus on practical application in a typography poster.
Core Deliverable Link	Type specimen / Typography poster.	This session produces a core brand identity element.

III. Resources

Item	Details
Presentation/Slides	Serif vs Sans, Pairing, Hierarchy, Readability .

Handout/Worksheet	Typography Pairing sheet.
Technology/Tools	Google Fonts Knowledge, Canva.
AI Tool Prompt	"Generate font pairings for a [Brand Personality] brand."
Pre-Reading/Prep	Google Fonts Knowledge; Typography basics videos.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Display a text-heavy design with poor hierarchy and ask, "Why is this hard to read?"
Review	2 min	Briefly recap Day 6 (Color Theory) and the importance of brand voice.
Agenda & SLO	2 min	Introduce the fundamentals of typography.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define: Serif vs Sans, pairing strategies, hierarchy, and readability.	Focus on how font choice communicates personality.
I Do (Demo)	10 min	Live demo: Using Google Fonts and Canva to find and pair fonts.	Show how to test readability at different scales.
We Do	10 min	Workshop: Students create a typography poster and pairing sheet.	Circulate to check for excessive font use; encourage simplicity.
Critical Analysis & Assessment	10 min	Review posters: Does the pairing convey the intended "feel"?	Re-emphasize link to the Brand Identity Pack.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Answer questions on pairing challenges.
Wrap-up	1 min	Summarize the core takeaway: Readability is the priority.
Homework/Next Session	2 min	Finalize type specimen; preview Day 8 (Layout & Composition).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Typography poster submission.	Current Session SLO	
Summative	Evidence included in the final Brand Identity Pack.	Core Deliverable	
Soft Skill Gate	Participation in font-pairing critique.	TLO (Professional Foundations)	

Day 8: Layout & Composition

I. Program Overview & Philosophy

Field	Value	Customization Notes
-------	-------	---------------------

Program Title	Month 1 — Graphic Design Foundations	Ensure students are prepared for the transition to capstone project work.
Module/Week	Week 2: Color Theory + Typography	Focus: Applying grids and white space for professional layouts.
Session Title	Day 8: Information Architecture (IA) & Navigation	Verify student access to Figma Auto Layout tutorials.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 8, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Develop foundational skills in color, typography, and composition.	Link to the final layout consistency in the Brand Identity Pack.
Session Learning Objective (SLO)	Students will be able to utilize grids, white space, and the rule of thirds to create a balanced event poster .	Emphasize grid usage for professional visual organization.
Core Deliverable Link	Layout Poster	This is the final primary deliverable for Week 2.

III. Resources

Item	Details
Presentation/Slides	Grids, White Space, Rule of Thirds, Composition Systems .
Handout/Worksheet	Grid system guide
Technology/Tools	Figma (Auto Layout), Canva.
AI Tool Prompt	"Suggest 3 layout alternatives for [Event] poster."
Pre-Reading/Prep	Figma Auto Layout tutorials; Grid systems articles .

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a disorganized layout vs. a grid-aligned layout; discuss viewer clarity.
Review	2 min	Recap Day 7 (Typography) and how font choice impacts layout.
Agenda & SLO	2 min	Introduce the fundamentals of composition: Grids, white space, and the rule of thirds .

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define core concepts: Grids, white space, rule of thirds, composition systems .	Use "Wayfinding" as a concept; compare a messy store to a clean app.
I Do (Demo)	10 min	Live demo: Using Figma Auto Layout to build a grid-based poster structure.	Demonstrate using AI to iterate layout ideas.
We Do	10 min	Workshop: Students build their own grid-based poster.	Circulate and assist with Auto Layout settings.
Critical Analysis & Assessment	10 min	Review posters: Does the grid provide balance and alignment?	Ensure students can articulate why their layout "works."

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Answer questions on grid constraints.

Wrap-up	1 min	Summarize takeaway: Grids are the backbone of professional design.
Homework/Next Session	2 min	Finalize grid poster; preview Day 9 (Studio Day).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Grid-based poster submission.	Current Session SLO	
Summative	Evidence included in the final Brand Identity Pack.	Core Deliverable	
Soft Skill Gate	Engagement in grid layout discussion.	TLO (Professional Foundations)	

Day 9: Typography + Color Studio

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1 — Graphic Design Foundations	Ensure students have final versions of Week 2 deliverables ready for review.
Module/Week	Week 2: Color Theory + Typography	Focus: Refinement, critique, and beginning Capstone work.
Session Title	Day 9: Typography + Color Studio	Facilitate a studio environment for project refinement.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.

Date	Day 9, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Develop foundational skills in color, typography, and composition.	Track progression toward the Brand Identity Pack.
Session Learning Objective (SLO)	Students will refine posters, receive mini-critiques, and begin capstone project planning .	Identify students falling behind for targeted catch-up support.
Core Deliverable Link	Revised week outputs / Capstone prep	Confirm students have a clear direction for their Brand Identity Pack .

III. Resources

Item	Details
Presentation/Slides	
Handout/Worksheet	Capstone Planning Worksheet
Technology/Tools	Figma, Canva, Color/Typography tools
AI Tool Prompt	"Review my current design against [Principle] and suggest improvements."
Pre-Reading/Prep	Review prior week's feedback

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Emphasize that professional design is iterative; refinement is key.
Review	2 min	Overview of Week 2 deliverables (Palette, Type specimen, Grid poster).

Agenda & SLO	2 min	Goal: Refine existing work, receive feedback, and start the Capstone.
--------------	-------	---

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Expectations: Refine posters, get feedback, plan Capstone .	Set expectations for "Mini-critique" format.
I Do (Demo)	10 min	Demonstrate how to incorporate feedback effectively into a design.	Focus on balancing professional input with creative vision.
We Do	10 min	Mini-critique rounds and targeted instructor coaching.	Ensure all students are receiving feedback.
Critical Analysis & Assessment	10 min	Application: Students refine Week 2 deliverables and initiate Capstone direction.	Help students connect color/type choices to their final Capstone vision.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Answer questions regarding project consolidation.
Wrap-up	1 min	Summarize: Refinement and Capstone planning readiness.
Homework/Next Session	2 min	Prepare for the Day 10 Weekly Studio Challenge.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
-----------------	-------------	----------------------	--------------

Formative	Review of refined project drafts.	Current Session SLO	
Summative	Completion of Week 2 refined outputs.	Core Deliverable	
Soft Skill Gate	Engagement in mini-critique circles.	TLO (Professional Foundations)	

Day 10: Weekly Studio Challenge

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1 — Graphic Design Foundations	Ensure students have a clear view of their overall progress toward the Brand Identity Pack.
Module/Week	Week 2: Color Theory + Typography	Focus: Weekly Studio Challenge.
Session Title	Day 10: Clickable Low-Fi Wireframes	Prepare a dedicated "Instructor Help Clinic" space for troubleshooting.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 10, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Develop foundational skills in color, typography, and composition.	Link challenge to the application of Week 2 concepts.

Session Learning Objective (SLO)	Students will design a quote poster using only type and color to demonstrate mastery of typography and color principles.	Ensure students utilize AI for quote selection and inspiration.
Core Deliverable Link	Quote poster	Final Week 2 Studio Challenge deliverable.

III. Resources

Item	Details
Presentation/Slides	
Handout/Worksheet	Challenge requirements checklist
Technology/Tools	Figma, Canva, ChatGPT
AI Tool Prompt	"Generate meaningful and punchy quote options for a design poster."
Pre-Reading/Prep	Review Week 2 principles

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Introduce the "Weekly Studio Challenge": Design a quote poster using only type and color .
Review	2 min	Quickly recap Week 2 learnings (Color theory, Typography, Layout).
Agenda & SLO	2 min	Define the goal: Apply typography/color theory in a restricted design exercise.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
-------	------	--------------------------	---------------------------

Hook & Context	10 min	Assign the challenge: Design a quote poster using ONLY type and color.	Discuss the power of limitation in design.
I Do (Demo)	10 min	Demonstrate how to use ChatGPT to generate quote options.	Show how to test font weights and color contrast.
We Do	10 min	Workshop: Students build their poster; instructor holds the "Help Clinic" .	Provide individual troubleshooting for technical hurdles.
Critical Analysis & Assessment	10 min	Rapid peer-review/feedback on the poster designs.	Evaluate how well type and color communicate the quote's meaning.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address specific technical questions from the challenge.
Wrap-up	1 min	Summarize the Week 2 accomplishments.
Homework/Next Session	2 min	Finalize all Week 2 deliverables; preview Week 3 (Branding Basics).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Submission of the quote poster.	Current Session SLO	
Summative	Completion of Week 2 deliverables.	Core Deliverable	

Soft Skill Gate	Active participation in the studio challenge.	TLO (Professional Foundations)	
-----------------	---	--------------------------------	--

Day 11: Branding Fundamentals

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1 — Graphic Design Foundations	Ensure alignment with the Branding Basics week progression.
Module/Week	Week 3: Branding Basics	Focus: Transitioning from technical skills to brand identity concepts.
Session Title	Day 11: Branding Fundamentals	Ensure students have access to the "startup brand concept" exercise materials.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 11, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Introduce branding systems, logo thinking, and identity design.	Link session to the initial conceptualization of the capstone brand.
Session Learning Objective (SLO)	Students will be able to distinguish between brand and logo, identify brand personality, and build a startup brand concept .	Use the startup concept to start the "Brand mood board" deliverable.

Core Link	Deliverable	Brand mood board	This session contributes the first visual research for the brand concept.
-----------	-------------	------------------	---

III. Required Resources & Tech

Item	Details
Presentation/Slides	Brand vs Logo, Personality, Mood boards, Attributes .
Handout/Worksheet	Brand Attribute worksheet
Technology/Tools	Figma, Canva, AI tools (ChatGPT)
AI Tool Prompt	"Generate personality traits for youth startup brand."
Pre-Reading/Prep	HubSpot Branding Guide; Adobe Branding tutorials .

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Start with a "Brand Identity" quiz (Can you name the brand by personality alone?).
Review	2 min	Recap Week 2 layout and typography; transition to Branding Basics.
Agenda & SLO	2 min	Define Branding Fundamentals: Brand vs. Logo, Personality, and Attributes .

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define core branding concepts: Brand vs. Logo, Personality, Attributes .	Use Socratic Method: "How is a brand more than just a logo?"

I Do (Demo)	10 min	Demonstrate using ChatGPT to generate personality traits for a hypothetical youth startup.	Show how to turn attributes into a visual mood board.
We Do	10 min	Workshop: Students define brand concepts for a startup and initiate a mood board .	Circulate to ensure brand attributes align with visual choices.
Critical Analysis & Assessment	10 min	Review mood boards: Do the visuals reflect the chosen brand personality?	Re-emphasize link to the Brand Identity Pack.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Answer questions on branding vs. logo design.
Wrap-up	1 min	Summarize takeaway: A brand is a personality, not just a mark.
Homework/Next Session	2 min	Finalize brand mood board; preview Day 12 (Logo Design Basics).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Brand mood board draft.	Current Session SLO	
Summative	Evidence included in the final Brand Identity Pack.	Core Deliverable	
Soft Skill Gate	Participation in branding concept discussion.	TLO (Professional Foundations)	

--	--	--	--

Day 12: Logo Design Basics

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1 — Graphic Design Foundations	Ensure alignment with Week 3: Branding Basics.
Module/Week	Week 3: Branding Basics	Focus: Transitioning from branding theory to logo execution.
Session Title	Day 12: Logo Design Basics	Ensure students have access to the "Logo Sketching" guide.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 12, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Introduce branding systems, logo thinking, and identity design.	Link this to the final "Logo" component of the Brand Identity Pack.
Session Learning Objective (SLO)	Students will be able to translate brand attributes into simplified visual marks using sketching and digital vectorization .	Focus on the "less is more" design philosophy.
Core Deliverable Link	Brand Logo	This is a primary anchor of the Brand Identity Pack.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Logo styles (wordmark, pictorial, abstract), simplification, scalability
Handout/Worksheet	Logo sketching template
Technology/Tools	Figma, Affinity Designer, Canva.
AI Tool Prompt	"Generate 10 abstract shape concepts for a [Brand Attribute] brand."
Pre-Reading/Prep	Logo design fundamentals tutorials.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a complex logo vs. its simplified evolution (e.g., Apple, Nike).
Review	2 min	Recap Day 11 (Branding Personality) and brand attributes.
Agenda & SLO	2 min	Introduce the fundamentals: Logo types, simplification, and scalability .

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define: Logo types, the importance of simplification, and scalability .	
I Do (Demo)	10 min	Live demo: Sketching concepts based on brand attributes; basic vectorizing in Figma/Affinity.	Demonstrate how to avoid "clutter" in design.
We Do	10 min	Workshop: Students sketch 5-10 logo concepts for their startup brand.	Circulate to guide students in selecting the strongest, simplest marks.
Critical Analysis &	10 min	Peer feedback: Which sketches translate the brand personality best?	Re-emphasize link to the Brand Identity Pack.

Assessment			
------------	--	--	--

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Answer questions regarding vectorization and logo constraints.
Wrap-up	1 min	Summarize: A logo must be scalable and memorable.
Homework/Next Session	2 min	Finalize logo concept; preview Day 13 (Studio Day).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Logo sketch selection.	Current Session SLO	
Summative	Evidence included in the final Brand Identity Pack.	Core Deliverable	
Soft Skill Gate	Participation in logo concept discussion.	TLO (Professional Foundations)	

Day 13: Branding Studio Day

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1 — Graphic Design Foundations	Ensure alignment with Week 3: Branding Basics.
Module/Week	Week 3: Branding Basics	Focus: Project refinement, critique, and branding system consolidation.
Session Title	Day 13: Branding Studio Day	Prepare studio space for peer-review of logo and brand concepts.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 13, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Introduce branding systems, logo thinking, and identity design.	Track progress toward the final "Brand Identity Pack" deliverable.
Session Learning Objective (SLO)	Students will refine their logo marks, color palettes, and brand concepts based on feedback.	Identify and support students struggling with vectorization/simplification.
Core Deliverable Link	Brand Identity Pack	Consolidate: Mood board, Logo, Palette, Typography system.

III. Required Resources & Tech

Item	Details
Presentation/Slides	
Handout/Worksheet	Brand Identity Checklist
Technology/Tools	Figma, Canva, Affinity Designer
AI Tool Prompt	"Review my brand identity for consistency across [logo/palette/type]."

Pre-Reading/Prep	Review previous instructor feedback
------------------	-------------------------------------

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Highlight the transition from "sketching" to "finalizing" identity assets.
Review	2 min	Quickly overview the deliverables due this week.
Agenda & SLO	2 min	Define goals: Refinement, critique, and finalizing branding components.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Outline studio expectations: Refinement of logos and branding systems.	Set expectations for a "professional studio" environment.
I Do (Demo)	10 min	Demonstrate how to check for brand consistency across colors and type.	Show how to identify visual "clashes" in a system.
We Do	10 min	Peer critique circles and instructor support for capstone branding.	Circulate to identify students needing technical vectorization help.
Critical Analysis & Assessment	10 min	Finalize refinements for the logo, palette, and mood board.	Check that files are being organized into the Identity Pack.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address final roadblocks for Week 3 project completion.

Wrap-up	1 min	Confirm progress: Students have a clear Brand Identity direction.
Homework/Next Session	2 min	Prepare for the Day 14 Weekly Studio Challenge.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of refined project drafts.	Current Session SLO	
Summative	Completion of Week 3 refined outputs.	Core Deliverable	
Soft Skill Gate	Engagement in peer critique circles.	TLO (Professional Foundations)	

Day 14: Weekly Studio Challenge

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1 — Graphic Design Foundations	Ensure students are prepared for the final branding challenge.
Module/Week	Week 3: Visual Design & Prototyping	Focus: Weekly Studio Challenge.

Session Title	Day 14: Weekly Studio Challenge	Prepare digital space for the "Brand Pitch" challenge.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 14, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Introduce branding systems, logo thinking, and identity design.	Link challenge to the communication of a cohesive brand story.
Session Learning Objective (SLO)	Students will pitch their startup brand identity, explaining the rationale behind their logo, palette, and typography.	Ensure students articulate <i>why</i> their choices fit the personality.
Core Deliverable Link	Brand identity pitch	This is the final Week 3 studio challenge deliverable.

III. Required Resources & Tech

Item	Details
Presentation/Slides	
Handout/Worksheet	Pitch Structure Outline
Technology/Tools	Figma, Canva, Presentation tools
AI Tool Prompt	"Draft a 1-minute elevator pitch script for [Brand Name]."
Pre-Reading/Prep	Review Week 3 Branding modules

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Introduce the "Brand Pitch": Sell your startup brand to a mock client.

Review	2 min	Briefly recap Week 3 essentials (Attributes, Logos, Consistency).
Agenda & SLO	2 min	Define the goal: Communicate the brand strategy through a professional pitch.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Assign the pitch: Each student has 90 seconds to explain their brand strategy.	Set the standard for professional communication.
I Do (Demo)	10 min	Demonstrate a model pitch for a sample brand.	Highlight: Problem, Identity, and Emotional Connection.
We Do	10 min	Workshop: Students finalize their pitch notes; peer practice sessions.	Facilitate peer-to-peer rehearsals.
Critical Analysis & Assessment	10 min	Live Pitches: Students present to the "Client" (Instructor/Class).	Provide immediate, constructive feedback on clarity.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address final questions on brand communication.
Wrap-up	1 min	Summarize the Week 3 accomplishments.
Homework/Next Session	2 min	Finalize all Week 3 deliverables; preview Week 4 (Business Card/Print).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Delivery of the brand pitch.	Current Session SLO	
Summative	Completion of the Brand Identity Pack.	Core Deliverable	
Soft Skill Gate	Professionalism and clarity during the pitch.	TLO (Professional Foundations)	

Day 15: Print Design Principles

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1 — Graphic Design Foundations	Ensure students have finalized their brand identities from Week 3.
Module/Week	Week 4: Business Card & Print Production	Focus: Translating digital identity to physical media.
Session Title	Day 15: Print Design Principles	Prepare examples of physical print assets for material handling.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 15, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Apply design skills to print production and professional deliverables.	Ensure students understand the shift from web to physical.
Session Learning Objective (SLO)	Students will be able to distinguish between CMYK/RGB color modes, bleed/crop settings, and paper quality for print.	Focus on technical readiness for the final business card project.
Core Deliverable Link	Print-Ready Setup Guide	Technical prerequisite for the Week 4 business card project.

III. Required Resources & Tech

Item	Details
Presentation/Slides	CMYK vs RGB, Bleeds, Margins, DPI, Paper Types.
Handout/Worksheet	Print Technical Specs Checklist
Technology/Tools	Affinity Publisher, Canva Print, Figma (PDF exports).
AI Tool Prompt	"Explain the importance of bleed and crop marks to a beginner."
Pre-Reading/Prep	Affinity Publisher tutorials; Canva print templates.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a "failed" print job (color distortion or clipped text); discuss why it happened.
Review	2 min	Recap Week 3 (Branding); shift focus to physical implementation.
Agenda & SLO	2 min	Define Print Production Basics: CMYK, Bleeds, DPI, and Paper Quality.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Explain the "Print Gap": Why digital designs don't always look the same on paper.	Focus on technical necessity: Bleeds and Margins.
I Do (Demo)	10 min	Live demo: Setting up a print-ready file in Affinity/Canva (Exporting to PDF/X-1a).	Emphasize why DPI matters for resolution.
We Do	10 min	Workshop: Students set up their personal brand identity for a print document.	Circulate to verify individual settings (e.g., margins).
Critical Analysis & Assessment	10 min	Peer review: Check each other's print-ready settings (check for bleed/crop).	Ensure students understand the "why" behind every setting.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Answer technical questions about PDF exports.
Wrap-up	1 min	Summarize takeaway: Print requires precision and planning.
Homework/Next Session	2 min	Set up print project file; preview Day 16 (Business Card Design).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
-----------------	-------------	----------------------	--------------

Formative	Daily Exit Ticket: Screenshot of print export settings.	Current Session SLO	
Summative	Evidence included in the final Print-ready file.	Core Deliverable	
Soft Skill Gate	Precision in technical file setup.	TLO (Professional Foundations)	

Day 16: Business Card Design

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1 — Graphic Design Foundations	Ensure all students have their branding assets ready.
Module/Week	Week 4: Business Card & Print Production	Focus: Applying branding to a physical, professional format.
Session Title	Day 16: Business Card Design	Verify students have access to business card templates.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 16, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Apply design skills to print production and professional deliverables.	Link this to the final professional portfolio requirement.

Session Learning Objective (SLO)	Students will design a professional, print-ready business card using their established brand identity.	Focus on the constraint of limited space (3.5" x 2").
Core Deliverable Link	Print-Ready Business Card	This is the capstone print project for the month.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Standard dimensions, readability, information hierarchy, bleed.
Handout/Worksheet	Business card layout template
Technology/Tools	Affinity Publisher, Canva, Figma.
AI Tool Prompt	"Suggest contact information hierarchy for a business card."
Pre-Reading/Prep	Review print production specs (Day 15).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a business card that is hard to read; discuss "What is the #1 goal of a business card?"
Review	2 min	Recap print basics (CMYK, bleeds) from Day 15.
Agenda & SLO	2 min	Introduce Business Card design constraints and hierarchy.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
-------	------	--------------------------	---------------------------

Hook & Context	10 min	Review dimensions, information hierarchy, and essential contact details.	Focus on legibility and the "at a glance" test.
I Do (Demo)	10 min	Live demo: Setting up the card; applying brand logo, font, and color.	Demonstrate how to maintain white space in a small area.
We Do	10 min	Workshop: Students design their card using their brand identity.	Circulate to catch common errors (e.g., text too small, no bleed).
Critical Analysis & Assessment	10 min	Peer review: Check for readability and "print readiness."	Verify every student has their export settings correct.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address final technical questions on print readiness.
Wrap-up	1 min	Summarize: A business card is the first physical touchpoint of a brand.
Homework/Next Session	2 min	Summarize: A business card is the first physical touchpoint of a brand.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Business card PDF preview.	Current Session SLO	
Summative	Evidence included in the final Portfolio/Identity Pack.	Core Deliverable	

Soft Skill Gate	Engagement in design layout and review.	TLO (Professional Foundations)	
-----------------	---	--------------------------------	--

Day 17: Print Studio Day

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1 — Graphic Design Foundations	Ensure students have final assets ready for the month-end review.
Module/Week	Week 4: Business Card & Print Production	Focus: Final refinement and portfolio consolidation.
Session Title	Day 17: Print Studio Day	Prepare the studio for final project file checks.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 17, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Apply design skills to print production and professional deliverables.	Clarity in writing is as important as clarity in UI.
Session Learning Objective (SLO)	Students will refine business card files and consolidate their "Brand Identity Pack" for final submission.	Ensure all technical export settings (bleed/CMYK) are correct.
Core Deliverable Link	Brand Identity Pack (Final)	This is the summative deliverable for Month 1.

III. Required Resources & Tech

Item	Details
Presentation/Slides	
Handout/Worksheet	Month 1 Final Checklist
Technology/Tools	All design software utilized during Month 1.
AI Tool Prompt	"Review my final print-ready checklist."
Pre-Reading/Prep	Review Month 1 instructor feedback

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Celebrate the journey from Week 1 basics to Week 4 print production.
Review	2 min	Quickly overview the full Month 1 "Brand Identity Pack" requirements.
Agenda & SLO	2 min	Define goals: Final polish, technical verification, and assembly.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Outline studio expectations: File organization and final exports.	Emphasize professional file naming conventions.
I Do (Demo)	10 min	Demonstrate how to package a project folder for professional print.	Focus on clarity and organization.

We Do	10 min	Studio time: Peer review of final packs and 1-on-1 instructor support.	Circulate to verify all "final versions" are correctly exported.
Critical Analysis & Assessment	10 min	Final check: Do the identity assets (Logo, Card, Poster) look cohesive?	Ensure visual brand language is consistent.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address last-minute file export or technical questions.
Wrap-up	1 min	Summarize: Month 1 goals met; confidence in print/branding basics.
Homework/Next Session	2 min	Prepare for the Day 18 Month-End Studio Challenge.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of final project files.	Current Session SLO	
Summative	Completion of the Brand Identity Pack.	Core Deliverable	
Soft Skill Gate	Professionalism and diligence in file organization.	TLO (Professional Foundations)	

Day 18: Month-End Studio Challenge

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 1 — Graphic Design Foundations	Ensure all students have their "Brand Identity Pack" ready for the final showcase.
Module/Week	Week 4: Business Card & Print Production	Focus: Month-End Studio Challenge (Capstone Showcase).
Session Title	Day 18: Month-End Studio Challenge	Prepare a "Gallery Walk" format for project viewing.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 18, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.
Session Learning Objective (SLO)	Students will present their complete "Brand Identity Pack" and articulate their design choices clearly.	Ensure all students participate in the peer-review process.
Core Deliverable Link	Brand Identity Pack (Final)	This is the final evaluation point for the month.

III. Required Resources & Tech

Item	Details
Presentation/Slides	

Handout/Worksheet	Peer Feedback Forms
Technology/Tools	Projector, Student devices.
AI Tool Prompt	N/A
Pre-Reading/Prep	Final polish of all Month 1 assets

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Celebrate the completion of the 18-day design intensive.
Review	2 min	Overview of the showcase format: 2-minute "elevator presentation" + feedback.
Agenda & SLO	2 min	Goal: Share work, offer/receive feedback, and reflect on growth.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Gallery Walk	10 min	Students present their Brand Identity Pack: Mood board, Poster, Logo, Business Card.	Keep time strictly to ensure everyone presents.
Peer Review	10 min	Students walk around to view others' work, leaving notes on "Strength" and "One Growth Idea."	Encourage specific, kind, and actionable feedback.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection	2 min	Group discussion: What was the biggest challenge? What was the biggest win?

Q&A	1 min	Final questions regarding future learning paths.
Wrap-up	2 min	Final closing remarks; celebrate Month 1 completion.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Engagement during the Peer Review phase.	Current Session SLO	
Summative	Quality and cohesion of the final Brand Identity Pack.	Core Deliverable	
Soft Skill Gate	Confidence and clarity in presenting design work.	TLO (Professional Foundations)	

Month 2 — Print & Publication Design

Day 1: Introduction to Print Design

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Ensure students understand the shift from digital-first to print-first workflows.
Module/Week	Week 1: Introduction to Print Design	Focus: Foundation of print terminology and industry standards.
Session Title	Day 1: Introduction to Print Design	Prepare examples of real-world print media for classroom analysis.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 1, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.
Session Learning Objective (SLO)	Students will identify print formats, understand the differences between print/digital, and analyze hierarchy.	Focus on building a strong foundation for print design.
Core Deliverable Link	Print Design Breakdown Sheet	Confirms student ability to analyze hierarchy, layout, and purpose.

III. Resources

Item	Details
------	---------

Presentation/Slides	Print vs. Digital Basics.
Handout/Worksheet	Print Design Breakdown Sheet.
Technology/Tools	Web browser, Print examples.
AI Tool Prompt	"Generate 5 print campaign ideas for a local business."
Pre-Reading/Prep	Canva Design School, Adobe Print Principles, Interaction Design Foundation.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Define "What is print design?" using physical examples like flyers, posters, and brochures.
Review	2 min	Overview of the Week 1 trajectory: Print basics, grids, and typography.
Agenda & SLO	2 min	Discuss the core differences between print and digital mediums.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Instructor)	10 min	Overview of professional print workflows and production concepts.	Use cited resources to explain technical constraints.
I Do (Demo)	10 min	Live demo: Using Figma to manipulate elements; using Canva Magic Design for layout.	Show troubleshooting for common "AI-glitch" errors in layout.
We Do	10 min	Guided practice: Students create an abstract poster using these elements.	Circulate the room to ensure all students have the base file open.
Critical Analysis &	10 min	Discuss "We Do" results; critique based on element usage.	Relate the poster's success to the principles of the Brand Identity Pack.

Assessment			
------------	--	--	--

C. Conclusion & Wrap-up (15 minutes)

Activity	Time	Details
Reflection	4 min	Group discussion: What differentiates print from digital?
Q&A	4 min	Address questions regarding the print breakdown sheet.
Wrap-up	3 min	Summarize: Every print piece has a distinct purpose and layout.
Homework/Next Session	4 min	Introduce Day 2: Layout & Grid Systems; prepare for grid setup exercises.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Completion of print design breakdown sheet.	Current Session SLO	
Summative	Evidence of analysis skills in the print breakdown sheet.	Core Deliverable	
Soft Skill Gate	Active participation in print media analysis.	TLO (Professional Foundations)	

Day 2: Layout & Grid Systems

I. Program Overview & Philosophy

Field	Value	Customization Notes
-------	-------	---------------------

Program Title	Month 2 — Print & Publication Design	Ensure students have access to design software for hands-on practice.
Module/Week	Week 1: Introduction to Graphic Design & Visual Literacy	Focus: Foundation of grid systems and structural alignment.
Session Title	Day 2: Layout & Grid Systems	Prepare examples of grid overlays on printed materials for analysis.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 3, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.
Session Learning Objective (SLO)	Students will be able to utilize grids, alignment systems, and visual balance to structure print layouts.	Ensure students grasp the concept of an "invisible skeleton" for design.
Core Deliverable Link	Structured Poster Layout	Confirms student ability to apply grid systems to a real design.

III. Resources

Item	Details
Presentation/Slides	Grid Systems & Alignment Principles.
Handout/Worksheet	Grid Structure Checklist.
Technology/Tools	Figma, Affinity.
AI Tool Prompt	"Suggest 3 layout variations for an event poster."

Pre-Reading/Prep	Smashing Magazine Grid Systems, Canva Layout Guide.
------------------	---

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Explain how grids act as the "invisible skeleton" of a print design.
Review	2 min	Recap Day 1: Print formats and hierarchy.
Agenda & SLO	2 min	Define columns, margins, and gutters as the foundation of balance.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Demo)	10 min	Deep dive into alignment systems and visual balance.	Use diagrams to show grid-based hierarchy in posters.
We Do	10 min	Use ChatGPT to generate 3 layout variations for a poster and apply them as a guide.	Assist students in interpreting AI suggestions into a visual grid.
Critical Analysis & Assessment	10 min	Peer review of grid structures for alignment errors.	Ensure grids are functional and support the visual hierarchy.
Task	10 min	Build grid-based poster in Figma or Affinity.	Ensure students are correctly applying margins and columns.

C. Conclusion & Wrap-up (15 minutes)

Activity	Time	Details
Reflection	4 min	Discuss how grids change the ease of laying out content.
Q&A	2 min	Address technical questions regarding grid constraints.

Wrap-up	1 min	Summarize: Grids provide the necessary structure for professional balance.
Homework/Next Session	2 min	Introduce Day 3: Typography for Print; prepare to explore font pairings.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Screenshot of grid structure.	Current Session SLO	
Summative	Evidence of grid usage in the poster layout.	Core Deliverable	
Soft Skill Gate	Precision in applying alignment systems.	TLO (Professional Foundations)	

Day 3: Typography for Print

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Ensure students have access to typography resources.
Module/Week	Week 1: Introduction to Print Design	Focus: Typography principles specifically for print media.
Session Title	Day 3: Typography for Print	Prepare type-based design examples for analysis.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.

Date	Day 4, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.
Session Learning Objective (SLO)	Students will learn to manage readability and effective visual hierarchy in print environments.	Confirms ability to communicate via typography.
Core Deliverable Link	Type-based print poster.	Final visual output for this lesson.

III. Resources

Item	Details
Presentation/Slides	Typography Hierarchy & Readability.
Handout/Worksheet	Typography Hierarchy Guide.
Technology/Tools	Google Fonts, Figma, Affinity Publisher.
AI Tool Prompt	"Generate typography hierarchy suggestions for a poster."
Pre-Reading/Prep	Google Fonts Knowledge, Typography Basics (The Futur).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Discuss why typography is the "voice" of a printed poster.
Review	2 min	Recap Day 2: How typography interacts with the grid.

Agenda & SLO	2 min	Introduce font sizing systems and readability for print.
--------------	-------	--

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Demo)	10 min	Deep dive into hierarchy and print readability.	Show examples of effective type scale in posters.
We Do (Guided)	10 min	Use ChatGPT to generate typography hierarchy suggestions.	Show examples of effective type scale in posters.
Critical Analysis & Assessment	10 min	Peer review of typography hierarchy choices.	Ensure type choices serve the design's purpose.
Task	10 min	Create a type-based print poster.	Assist in selecting appropriate font pairings.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection		Group discussion: How does type choice alter the tone of a piece?
Q&A	2 min	Address questions regarding hierarchy and font weight.
Wrap-up	1 min	Summarize: Typography guides the reader's eye in print.
Homework/Next Session	2 min	Introduce Day 4: Layout Practice & Support; bring current files.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Screenshot of typographic hierarchy.	Current Session SLO	
Summative	Quality of hierarchy in the type-based poster.	Core Deliverable	
Soft Skill Gate	Engagement in applying typographic rules.	TLO (Professional Foundations)	

Day 4: Layout Practice & Support

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Ensure alignment with Week 1: Introduction to Print Design.
Module/Week	Week 1: Introduction to Print Design	Focus: Layout practice, refinement, and instructor support.
Session Title	Day 4: Layout Practice & Support	Prepare studio space for iterative poster refinement.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	
Date	Day 5, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
-------	-------	---------------------

Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.
Session Learning Objective (SLO)	Students will refine their posters based on feedback and instructor guidance.	Identify and support students struggling with grid application.
Core Deliverable Link	Improved Layout Poster	Consolidate: Grid-based poster, refined typography, and layout balance.

III. Resources

Item	Details
Presentation/Slides	
Handout/Worksheet	Print Design Checklist.
Technology/Tools	Figma, Canva, Affinity.
AI Tool Prompt	"Review my layout for hierarchy and grid alignment."
Pre-Reading/Prep	Review Day 2/3 feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Highlight the transition from "drafting" to "refining" print assets.
Review	2 min	Quickly overview the deliverables due this week.
Agenda & SLO	2 min	Define goals: Refinement, critique, and technical troubleshooting.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Instruction)	10 min	Demonstrate how to resolve common grid/alignment issues.	Show how to identify visual "clashes" in a layout.
We Do (Guided)	10 min	Facilitated peer critique circles and instructor support.	Circulate to identify students needing technical help.
Critical Analysis	10 min	Students perform self-assessment based on peer feedback.	Check that files are organized for the Week 1 challenge.
Task	10 min	Begin finalizing refinements for the poster layout.	Ensure students are applying specific edits from critiques.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection		Discuss common layout challenges encountered during refinement.
Q&A	2 min	Address final roadblocks for Week 1 project completion.
Wrap-up	1 min	Confirm progress: Students have a clear poster direction.
Homework/Next Session	2 min	Prepare for the Day 5 Weekly Studio Challenge (Final polish).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of refined poster drafts.	Current Session SLO	
Summative	Completion of Week 1 improved layout.	Core Deliverable	

Soft Skill Gate	Engagement in peer critique circles.	TLO (Professional Foundations)	
-----------------	--------------------------------------	--------------------------------	--

Day 5: Weekly Studio Challenge (Final Polish)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Ensure students have finalized their print-ready files.
Module/Week	Week 1: Introduction to Print Design	Focus: Final project submission and print-readiness.
Session Title	Day 5: Weekly Studio Challenge (Final Polish)	Set up a "gallery" format for final project viewing.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 5, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.
Session Learning Objective (SLO)	Students will apply final design refinements, verify print settings, and submit their final poster.	Ensure all students understand bleeds, margins, and resolution.
Core Deliverable Link	Final Print-Ready Poster	Validates technical understanding of print production.

III. Resources

Item	Details
Presentation/Slides	Final Polish Checklist (Exporting for Print).
Handout/Worksheet	Print Production Checklist.
Technology/Tools	Figma, Adobe InDesign/Affinity.
AI Tool Prompt	"Review design for final print-readiness checklist."
Pre-Reading/Prep	Review peer critique notes from Day 4.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Welcome to the Weekly Studio Challenge: Final Polish day.
Review	2 min	Recap the design goals for the Week 1 print poster.
Agenda & SLO	2 min	Define goals: Final refinement, export check, and submission.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Instructor)	10 min	Demonstration of final export for print (bleeds, crops, CMYK).	Focus on common pitfalls in print production.
We Do (Guided)	10 min	Guided file check: Students review each other's print export settings.	Assist students in configuring final file types.
Critical Analysis	5 min	Final self-assessment of the poster against the project brief.	Ensure the visual hierarchy matches the original intent.

Task	10 min	Submit final print-ready files and display in the gallery.	Check that all files are named according to naming conventions.
------	--------	--	---

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection		Group discussion: Lessons learned about print constraints.
Q&A	2 min	Address final technical questions regarding print production.
Wrap-up	1 min	Summarize: Professionalism in print depends on precise preparation.
Homework/Next Session	2 min	Introduce Week 2: Typography & Layout deep dive; brief preview.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of final export settings (PDF/X).	Current Session SLO	
Summative	Completion of Week 1 Print-Ready Poster.	Core Deliverable	
Soft Skill Gate	Engagement in the gallery walk/final presentation.	TLO (Professional Foundations)	

Day 6: Advanced Grid Systems & Spreads

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Ensure students grasp complex layouts beyond single-page designs.
Module/Week	Week 2: Advanced Layout & Typography	Focus: Multi-page document structure and advanced grid theory.
Session Title	Day 6: Advanced Grid Systems & Spreads	Prepare samples of magazines or books with clear grid systems.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	
Date	Day 6, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.
Session Learning Objective (SLO)	Students will understand and apply nested and modular grid systems for multi-page layouts.	Focus on the "flow" across two-page spreads.
Core Deliverable Link	Multi-page Spread Layout	Confirms ability to maintain consistency across a document.

III. Resources

Item	Details
Presentation/Slides	Advanced Grid Theory (Modular & Nested).

Handout/Worksheet	Multi-page Layout Guide.
Technology/Tools	Adobe InDesign, Affinity.
AI Tool Prompt	"Create a grid structure for a 12-page magazine layout."
Pre-Reading/Prep	Thinking with Type (Ellen Lupton), Grid Systems (Josef Müller-Brockmann).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Contrast single posters with the structural complexity of a magazine.
Review	2 min	Recap Week 1: Basic grids and alignment basics.
Agenda & SLO	2 min	Introduce modular grids, gutters, and reader flow on spreads.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Instructor)	10 min	Deep dive into nested grids, bleeds, and spine offsets.	Focus on why gutter width matters for readability.
We Do (Guided)	10 min	Setting up a master spread with AI-generated column suggestions.	Help students manage page numbering and margin consistency.
Critical Analysis	10 min	Discuss how different modular grids impact content density.	Analyze examples of dense vs. airy layouts.
Task	10 min	Begin construction of a 2-page master spread template.	Ensure students are correctly applying the grid to both pages.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection		Group discussion: Why is consistent grid use critical for books?
Q&A	2 min	Address technical questions regarding spine offsets/gutters.
Wrap-up	1 min	Summarize: Complex grids allow for sophisticated information architecture.
Homework/Next Session	2 min	Introduce Day 7: Typographic Systems (Scale/Contrast); prepare fonts.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Screenshot of Master Page setup.	Current Session SLO	
Summative	Evidence of grid consistency across the spread.	Core Deliverable	
Soft Skill Gate	Precision in setting up technical margins and offsets.	TLO (Professional Foundations)	

Day 7: Typographic Systems (Scale & Contrast)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Ensure students have access to typography foundries and font libraries.
Module/Week	Week 2: Advanced Layout & Typography	Focus: Typographic scale, contrast, and hierarchy in long-form text.
Session Title	Day 7: Typographic Systems (Scale & Contrast)	Prepare examples of editorial spreads with strong typographic contrast.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 7, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Develop foundational skills in color, typography, and composition.	Link to the final layout consistency in the Brand Identity Pack.
Session Learning Objective (SLO)	Students will be able to utilize grids, white space, and the rule of thirds to create a balanced event poster .	Emphasize grid usage for professional visual organization.
Core Deliverable Link	Layout Poster	This is the final primary deliverable for Week 2.

III. Resources

Item	Details
Presentation/Slides	Grids, White Space, Rule of Thirds, Composition Systems .
Handout/Worksheet	Grid system guide

Technology/Tools	Figma (Auto Layout), Canva.
AI Tool Prompt	"Suggest 3 layout alternatives for [Event] poster."
Pre-Reading/Prep	Figma Auto Layout tutorials; Grid systems articles .

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a disorganized layout vs. a grid-aligned layout; discuss viewer clarity.
Review	2 min	Recap Day 7 (Typography) and how font choice impacts layout.
Agenda & SLO	2 min	Introduce the fundamentals of composition: Grids, white space, and the rule of thirds .

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define core concepts: Grids, white space, rule of thirds, composition systems .	Use "Wayfinding" as a concept; compare a messy store to a clean app.
I Do (Demo)	10 min	Live demo: Using Figma Auto Layout to build a grid-based poster structure.	Demonstrate using AI to iterate layout ideas.
We Do	10 min	Workshop: Students build their own grid-based poster.	Circulate and assist with Auto Layout settings.
Critical Analysis & Assessment	10 min	Review posters: Does the grid provide balance and alignment?	Ensure students can articulate why their layout "works."

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Answer questions on grid constraints.
Wrap-up	1 min	Summarize takeaway: Grids are the backbone of professional design.
Homework/Next Session	2 min	Finalize grid poster; preview Day 9 (Studio Day).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Screenshot of Typographic Scale Sheet.	Current Session SLO	
Summative	Evidence of applied scale/contrast in document spread.	Core Deliverable	
Soft Skill Gate	Engagement in applying typographic logic.	TLO (Professional Foundations)	

Day 8: Editorial Pacing & Flow

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Emphasize the narrative experience of turning pages.
Module/Week	Week 2: Advanced Layout & Typography	Focus: Editorial pacing, flow, and white space management.
Session Title	Day 9: Typography + Color Studio	Prepare examples of "quiet" vs. "loud" page layouts.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 8, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Develop foundational graphic design proficiency through a cohesive project. TLO: Demonstrate skills in color, typography, and composition.	Evaluate the holistic quality of the student's portfolio.
Session Learning Objective (SLO)	Students will learn to control editorial pacing through layout density and negative space.	Confirms ability to balance content-heavy and visual-heavy pages.
Core Deliverable Link	4-Page Editorial Draft	Confirms mastery of flow across multiple spreads.

III. Resources

Item	Details
Presentation/Slides	Pacing & Visual Rhythm in Editorial.
Handout/Worksheet	Editorial Pacing Checklist.

Technology/Tools	Adobe InDesign, Affinity.
AI Tool Prompt	"Suggest a sequence for a 4-page article layout including a splash page."
Pre-Reading/Prep	"Layout Essentials" (Beth Tondreau), Editorial Design examples.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Explain that editorial design is like a movie: it needs a beginning, middle, and end.
Review	2 min	Recap Day 7: Using typographic systems to create entry points.
Agenda & SLO	2 min	Introduce "pacing"—the speed at which a reader consumes information.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Instructor)	10 min	Demonstrate the "Loud-Quiet-Loud" principle in editorial pacing.	Show how to use negative space strategically.
We Do	10 min	Mapping out a 4-page "flatplan" to decide where images and text go.	Assist students in identifying where the reader needs a "break."
Critical Analysis & Assessment	10 min	Group review: Does the flow feel rushed or stagnant?	Check for overcrowded spreads or disjointed transitions.
Task	10 min	Apply pacing principles to the 4-page editorial draft.	Ensure students are using their modular grids from Day 6.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection		Group discussion: Why is white space often the hardest element to use?
Q&A	2 min	Address questions regarding column wrapping and image placement.
Wrap-up	1 min	Summarize: Pacing keeps the reader engaged across many pages.
Homework/Next Session	2 min	Introduce Day 9: Layout Refinement & Feedback; finalize draft.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Flatplan/Storymap of 4-page article.	Current Session SLO	
Summative	Editorial pacing logic in the 4-page draft.	Core Deliverable	
Soft Skill Gate	Ability to explain the narrative "flow" of their layout.	TLO (Professional Foundations)	

Day 9: Layout Refinement & Feedback

I. Program Overview & Philosophy

Field	Value	Customization Notes
-------	-------	---------------------

Program Title	Month 2 — Print & Publication Design	Focus on the iterative nature of professional editorial design.
Module/Week	Week 2: Advanced Layout & Typography	Focus: Layout refinement, peer feedback, and technical troubleshooting.
Session Title	Day 9: Layout Refinement & Feedback	Prepare a "critique wall" (digital or physical) for spread reviews.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 9, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.
Session Learning Objective (SLO)	Students will refine multi-page layouts based on peer feedback and technical layout audits.	Focus on "polishing" rather than "creating" new content.
Core Deliverable Link	Refined 4-Page Editorial Spread	Evidence of incorporated feedback and corrected technical errors.

III. Resources

Item	Details
Presentation/Slides	Common Layout Errors & Refinement Checklist.
Handout/Worksheet	Peer Feedback Form.
Technology/Tools	Adobe InDesign, Figma, Affinity.
AI Tool Prompt	"Act as a design critic: Analyze this layout for readability and balance."
Pre-Reading/Prep	Review Day 8 Pacing Checklist.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Discuss how the final 10% of refinement makes 90% of the difference.
Review	2 min	Recap Day 8: Pacing, flow, and the "Loud-Quiet-Loud" principle.
Agenda & SLO	2 min	Goals: Technical audit (widows/orphans) and peer feedback loops.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Instructor)	10 min	Technical Audit: How to spot widows, orphans, and rivers in text.	Show how to adjust tracking/kerning to fix text rags.
We Do (Guided)	10 min	Structured Peer Critique: Students swap seats and review 2-3 other layouts.	Ensure students focus on "Why" a design works or doesn't.
Critical Analysis & Assessment	10 min	Group discussion on recurring layout challenges found during review.	Look for trends in grid-breaking or hierarchy confusion.
Task	10 min	Begin applying the most critical technical and aesthetic refinements.	Monitor for students who are "stuck" on feedback implementation.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
----------	------	---------

Reflection		Discuss: What was the most surprising piece of feedback you received?
Q&A	2 min	Address technical questions regarding text wraps and linked assets.
Wrap-up	1 min	Summarize: Refinement is about removing distractions from the message.
Homework/Next Session	2 min	Introduce Day 10: Weekly Studio Challenge (Multi-page Final).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of Peer Feedback forms.	Current Session SLO	
Summative	Evidence of technical refinement in the editorial draft.	Core Deliverable	
Soft Skill Gate	Professionalism in giving and receiving constructive critique.	TLO (Professional Foundations)	

Day 10: Weekly Studio Challenge (Multi-page Final)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Ensure all students have a centralized folder for their linked assets.

Module/Week	Week 2: Advanced Layout & Typography	Focus: Final assembly, technical verification, and presentation.
Session Title	Day 10: Weekly Studio Challenge (Multi-page Final)	Prepare a "Live PDF" presentation environment for class viewing.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 10, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.
Session Learning Objective (SLO)	Students will finalize a 4-page editorial spread, ensuring grid consistency and print-readiness.	Target: 0 technical text errors (widows/orphans).
Core Deliverable Link	Final 4-Page Editorial Spread (PDF/X)	This is the cumulative project for Week 2.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Studio Challenge: Final Submission Standards.
Handout/Worksheet	Final Submission Checklist.
Technology/Tools	Adobe InDesign, Affinity, PDF Viewer.
AI Tool Prompt	"Proofread this editorial text for any missed spelling or grammar errors."
Pre-Reading/Prep	Review Day 9 Technical Audit.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Today is the Studio Challenge: Bringing the 4-page narrative to life.
Review	2 min	Recap Week 2: Modular grids, typographic systems, and pacing.
Agenda & SLO	2 min	Goal: Final polish, technical preflight, and official submission.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Instruction)	10 min	Professional Preflight: How to package files and check for missing links/fonts.	Demonstrate the "Package" function to ensure all assets are included.
We Do	10 min	Final "Table Check": Peer-to-peer verification of bleeds and gutter safety.	Walk the room to clear any remaining technical "Preflight" red flags.
Critical Analysis & Assessment	10 min	"The Spread Test": Do the pages flow logically when viewed as a sequence?	Ensure the "Loud-Quiet-Loud" pacing is visually evident.
Hook & Context	10 min	Export final PDF/X files and submit according to the naming convention.	Verify that students have included crop marks and bleeds in exports.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Refection		Group discussion: What was the hardest part of managing 4 pages vs 1?
Q&A	2 min	Address any final export or portfolio-linking questions.

Wrap-up	1 min	Summarize: Managing multi-page systems is a core skill for publication designers.
Homework/Next Session	2 min	Introduce Week 3: Brand Identity & Packaging; research local brands.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Live "Preflight" status check in-software.	Current Session SLO	
Summative	Completion of the 4-Page Editorial Spread.	Core Deliverable	
Soft Skill Gate	Precision in following technical submission guidelines.	TLO (Professional Foundations)	

Day 11: Brand Identity Foundations for Print

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Shift focus from editorial layouts to brand-driven physical assets.
Module/Week	Week 3: Brand Identity & Packaging	Focus: Translating brand values into 3D and tactile formats.
Session Title	Day 11: Brand Identity Foundations for Print	Prepare examples of brand style guides that focus on print specs.

Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 11, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.
Session Learning Objective (SLO)	Students will develop a brand identity system including color palettes (CMYK/Pantone) and logo variations for print.	Focus on technical sustainability of the brand mark.
Core Deliverable Link	Brand Identity Component Sheet	Confirms ability to create cohesive brand assets.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Brand Systems for the Physical World.
Handout/Worksheet	Brand Component Checklist.
Technology/Tools	Affinity, Figma, Pantone Color Bridge (Digital).
AI Tool Prompt	"Generate a brand personality profile for a sustainable coffee brand."
Pre-Reading/Prep	"Logo Design Love" (David Airey), Brand Folder Style Guide Gallery.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Discuss why a logo is only 10% of a brand; the rest is the system.
Review	2 min	Recap Week 2: Using typographic systems as a brand's "voice."

Agenda & SLO	2 min	Define brand identity: Consistency across colors, type, and materials.
--------------	-------	--

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Instructor)	10 min	Deep dive into print-specific brand assets: CMYK vs Pantone and vector scalability.	Show how paper texture (Coated vs. Uncoated) affects brand colors.
We Do	10 min	Use ChatGPT to generate brand values and translate them into a color palette.	Assist students in selecting "accessible" and "printable" color ranges.
Critical Analysis & Assessment	10 min	Analysis of popular brands: Why do their identities work in print?	Look for simplicity and high-contrast marks.
Task	10 min	Begin drafting the Brand Identity Component Sheet.	Ensure logos are created in vector format for maximum versatility.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection		Group discussion: How does the choice of a color change when it's printed?
Q&A	2 min	Address questions regarding logo file formats (.EPS vs .SVG).
Wrap-up	1 min	Summarize: A brand identity must be a flexible, technical system.
Homework/Next Session	2 min	Introduce Day 12: Stationery & Collateral Design; bring logo drafts.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Initial color palette and logo sketch.	Current Session SLO	
Summative	Technical accuracy of CMYK/Pantone selections.	Core Deliverable	
Soft Skill Gate	Ability to articulate the "personality" of the designed brand.	TLO (Professional Foundations)	

Day 12: Stationery & Collateral Design

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Transition from the abstract brand system to tangible business touchpoints.
Module/Week	Week 3: Brand Identity & Packaging	Focus: Stationery design, business cards, and letterheads.
Session Title	Day 12: Stationery & Collateral Design	Prepare samples of premium paper stocks (linen, felt, recycled).
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 13, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.
Session Learning Objective (SLO)	Students will design a cohesive stationery set (business card, letterhead, envelope) applying brand standards.	Focus on technical setups: Bleeds and "Safety Margins."
Core Deliverable Link	Brand Stationery Set	Confirms ability to maintain brand consistency across formats.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Print Production for Stationery.
Handout/Worksheet	Print Spec Sheet for Stationery.
Technology/Tools	Adobe, Affinity, Figma.
AI Tool Prompt	"Write professional placeholder copy for a modern design studio's letterhead."
Pre-Reading/Prep	Moo.com Design Guidelines, Adobe Print Production Guide.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Discuss why the business card is often the "first handshake" of a brand.
Review	2 min	Recap Day 11: Applying the primary and secondary logo marks.
Agenda & SLO	2 min	Define technical constraints: Bleeds, slugs, and font legibility at small sizes.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Instruction)	10 min	Professional Document Setup: Setting up multi-artboard files with correct bleeds.	Show the difference between "Trim Size" and "Bleed Size."
We Do	10 min	Use AI to generate contact layouts, then manually align them to the grid.	Help students balance white space on a small 3.5" canvas.
Critical Analysis & Assessment	10 min	Peer audit: Is the font too small to read? Is the logo placed too close to the edge?	Use "The Arm's Length Test" to verify legibility.
Task	10 min	Complete the layout for the primary business card and letterhead.	Ensure all colors are switched to CMYK process.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Refection		Group discussion: How does the brand "vibe" change across different sizes?
Q&A	2 min	Address questions regarding paper weight (GSM) and textures.
Wrap-up	1 min	Summarize: Technical precision is as important as the visual design in stationery.
Homework/Next Session	2 min	Introduce Day 13: 3D Packaging & Dielines; find a box to deconstruct.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of artboard setups with bleeds.	Current Session SLO	
Summative	Brand consistency across the three stationery items.	Core Deliverable	
Soft Skill Gate	Attention to detail in technical file setup.	TLO (Professional Foundations)	

Day 13: 3D Packaging & Dielines

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Transition from 2D planes to 3D spatial design.
Module/Week	Week 3: Brand Identity & Packaging	Focus: Understanding dielines, folds, and spatial hierarchy.
Session Title	Day 13: 3D Packaging & Dielines	Focus on the "puzzle-solving" nature of 3D layout.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 13, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
-------	-------	---------------------

Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.
Session Learning Objective (SLO)	Students will understand packaging anatomy and learn to create/read a technical dieline.	Focus on "Spatial Logic"—what is the front, back, and bottom?
Core Deliverable Link	Technical Packaging Dieline	Confirms ability to set up a 3D structural template.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Anatomy of a Dieline.
Handout/Worksheet	Pitch Structure Outline
Technology/Tools	Adobe Illustrator (Pathfinder/Layers), Figma. Stress the use of non-printing "Technical Layers. Affinity Designer
AI Tool Prompt	"Describe the standard dimensions and panels for a tuck-end box." Use AI to verify the structural logic of the package.
Pre-Reading/Prep	The Dieline (Website), Packaging Design Workflow (Adobe). Explore the concept of "unboxing" as a brand experience.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Hold up a box: "Everything you see here started as a flat piece of paper."
Review	2 min	Recap Day 12: How brand stationery prepares us for small-scale precision.
Agenda & SLO	2 min	Define Cut lines vs. Score/Fold lines and the importance of Glue Flaps.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Instruction)	10 min	Demonstration: Building a basic box dieline from scratch using vector tools.	Explain panel orientation (Upside down vs. Right side up).
We Do	10 min	Use AI to calculate panel sizes based on product dimensions (e.g., a soap bar).	Assist students in visualizing how panels wrap around a 3D object.
Critical Analysis & Assessment	10 min	"The Reverse Fold": Analyze if the art will be oriented correctly once folded.	Warn students about "Upside Down" panels on box tops.
Task	10 min	Complete the structural skeleton of the box dieline.	Ensure all lines are on a dedicated, locked technical layer.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection		Group discussion: What is the most difficult part of thinking in 3D?
Q&A	2 min	Address questions regarding thickness (Caliper) and paper weight for boxes.
Wrap-up	1 min	Summarize: A package is a brand's most tactile and functional asset.
Homework/Next Session	2 min	Introduce Day 14: Packaging Graphics & Mockups; prepare brand assets.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Correct dieline notation (dashed vs solid).	Current Session SLO	
Summative	Structural integrity and accuracy of the vector dieline.	Core Deliverable	
Soft Skill Gate	Spatial reasoning and technical precision.	TLO (Professional Foundations)	

Day 14: Packaging Graphics & Mockups

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Transition from structural engineering to visual storytelling.
Module/Week	Week 3: Brand Identity & Packaging	Focus: Merging brand graphics with 3D structural dielines.
Session Title	Day 14: Packaging Graphics & Mockups	Prepare digital mockup templates for realistic 3D visualization.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 14, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.

Session Learning Objective (SLO)	Students will apply brand graphics to a dieline and create a 3D digital mockup for presentation.	Focus on the "Front of Pack" (FOP) hierarchy and legal info.
Core Deliverable Link	3D Packaging Mockup	Confirms ability to visualize 2D art in a 3D space.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Packaging Graphics & Shelf Impact.
Handout/Worksheet	Packaging Content Checklist.
Technology/Tools	Affinity Publisher, Adobe, Figma (PDF exports).
AI Tool Prompt	"Generate a list of mandatory product information for a luxury skincare box."
Pre-Reading/Prep	Packaging World Trends, Mockup World Gallery.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Discuss why packaging is often called "The Silent Salesman."
Review	2 min	Recap Day 13: The structural logic of the dieline.
Agenda & SLO	2 min	Goal: Map the brand identity onto the box panels and visualize in 3D.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
-------	------	--------------------------	---------------------------

I Do (Instruction)	10 min	Demonstration: Applying graphics to a dieline and using PSD mockups.	Show how to avoid "seam" errors.
We Do	10 min	Use AI to generate mandatory copy and place it on the side/back panels.	Assist students in balancing "Legal Info" with "Brand Beauty."
Critical Analysis & Assessment	10 min	Rotation Review: Does the brand message lead the eye from 3 feet away?	Test the hierarchy of the Front of Pack (FOP).
Task	10 min	Place finalized graphics into a 3D mockup template.	Ensure textures and lighting in the mockup look professional.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection		Group discussion: How did the design change once you saw it in 3D?
Q&A	2 min	Address questions regarding barcodes, QR codes, and print finishes.
Wrap-up	1 min	Summarize: Professional mockups sell the vision before the first print.
Homework/Next Session	2 min	Introduce Day 15: Weekly Studio Challenge (Full Brand Suite).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of graphic placement on the dieline.	Current Session SLO	

Summative	Visual quality and realism of the 3D packaging mockup.	Core Deliverable	
Soft Skill Gate	Ability to balance aesthetics with technical requirements.	TLO (Professional Foundations)	

Day 15: Weekly Studio Challenge (Full Brand Suite)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Focus on the synthesis of identity, stationery, and packaging.
Module/Week	Week 3: Brand Identity & Packaging	Focus: Finalizing the brand ecosystem for the weekly challenge.
Session Title	Day 15: Weekly Studio Challenge (Full Brand Suite)	Prepare a digital "Showcase" folder for class-wide review.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 15, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.

Session Learning Objective (SLO)	Students will finalize a cohesive brand suite including identity assets, stationery, and 3D packaging.	Focus on "Visual Consistency"—do all items feel like they belong together?
Core Deliverable Link	Full Brand Identity & Packaging Suite	Cumulative deliverable including identity sheet, stationery, and mockup.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Studio Challenge: The Power of Brand Cohesion.
Handout/Worksheet	Brand Suite Final Checklist.
Technology/Tools	Adobe Creative Suite, Affinity, Figma, PDF Compiler.
AI Tool Prompt	"Critique the visual consistency of this brand across stationery and packaging."
Pre-Reading/Prep	Review Day 11–14 Feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Today we prove the brand's strength by seeing it live on three different formats.
Review	2 min	Recap Week 3: From identity specs to stationery to 3D packaging.
Agenda & SLO	2 min	Goal: Finalize all components, verify technical specs, and submit.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Instruction)	10 min	Professional Presentation: How to layout a brand suite for a client or portfolio.	Demonstrate how to maintain white space in a small area.
We Do (Guided)	10 min	Final Peer "Consistency Check": Do colors and type match across all files?	Walk the room to check that CMYK values are identical in all documents.
Critical Analysis & Assessment	10 min	The "Squint Test": Does the brand remain recognizable across all items?	Ensure the logo is the anchor of the entire suite.
Hook & Context	10 min	Compile all assets into a single Presentation PDF and submit.	Verify all exports are high-resolution and professionally named.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection		Group discussion: Which brand touchpoint was the hardest to keep consistent?
Q&A	2 min	Address final questions regarding file organization and portfolio display.
Wrap-up	1 min	Summarize: A brand's power lies in its ability to adapt without losing its soul.
Homework/Next Session	2 min	Introduce Week 4: Large Format & Promotional Design; preview billboard specs.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
-----------------	-------------	----------------------	--------------

Formative	Review of the "Full Suite" cohesion during workshop.	Current Session SLO	
Summative	Completion of the Brand Identity & Packaging Suite.	Core Deliverable	
Soft Skill Gate	Professionalism in presenting the brand narrative.	TLO (Professional Foundations)	

Day 16: Designing for Scale (Billboards & Signage)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Transition to "Environmental Graphics" and massive-scale design.
Module/Week	Week 4: Large Format & Promotional Design	Focus: Billboards, signage, and high-visibility print.
Session Title	Day 16: Designing for Scale (Billboards & Signage)	Discuss the "3-Second Rule" for high-speed viewing.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 16, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.
Session Learning Objective (SLO)	Students will learn the technical requirements of large-format design	Focus on "Minimalist Messaging" for maximum impact.

		and the psychology of roadside legibility.	
Core Link	Deliverable	High-Impact Billboard Design	Confirms ability to design for extreme viewing distances.

III. Required Resources & Tech

Item	Details
Presentation/Slides	The Art of Large Format Design.
Handout/Worksheet	Large Format Spec Sheet.
Technology/Tools	Adobe Illustrator, Affinity (Vector-focused), Figma.
AI Tool Prompt	"Write a 5-word headline for a travel brand billboard."
Pre-Reading/Prep	OAAA (Out of Home Advertising) Creative Guidelines.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"You have 3 seconds. Can the driver read your message?"
Review	2 min	Recap Week 3: Transitioning from handheld packaging to 48-foot boards.
Agenda & SLO	2 min	Define the technical "math" of scale and the importance of contrast.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Instructor)	10 min	Deep dive into "Effective Distance" and resolution for large format.	Explain why 300 DPI isn't always needed for 40ft boards.

We Do	10 min	Use AI to generate punchy headlines; then test them for legibility on a scaled grid.	Help students cut unnecessary words and small details.
Critical Analysis & Assessment	10 min	The "Squint and Stand Back" test: Stand 10 feet from the monitor—is it readable?	Critique the hierarchy: Is the CTA (Call to Action) clear?
Task	10 min	Set up a vector-based billboard canvas with correct aspect ratios.	Ensure students are working at a 1:10 scale if necessary.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Refection		Group discussion: Why does a "pretty" design often fail as a billboard?
Q&A	2 min	Address questions regarding color bleeding and weather-resistant materials.
Wrap-up	1 min	Summarize: In large format, simplicity is the ultimate sophistication.
Homework/Next Session	2 min	Introduce Day 17: Promotional Collateral (Flyers & Posters); find event examples.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of headline brevity and font contrast.	Current Session SLO	

Summative	Technical setup and legibility of the billboard draft.	Core Deliverable	
Soft Skill Gate	Ability to simplify complex ideas for rapid consumption.	TLO (Professional Foundations)	

Day 17: Promotional Collateral (Flyers & Posters)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Bridge the gap between mass-scale outdoor ads and handheld marketing.
Module/Week	Week 4: Large Format & Promotional Design	Focus: High-density promotional print like flyers and posters.
Session Title	Day 17: Promotional Collateral (Flyers & Posters)	Focus on event-driven design and conversion-focused layouts.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 17, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.
Session Learning Objective (SLO)	Students will design a promotional flyer that effectively utilizes a hierarchy of information and a clear CTA.	Focus on the "Scannability" of promotional materials.

Core Link	Deliverable	Event Promotional Flyer	Confirms ability to organize dense info for quick reading.
-----------	-------------	-------------------------	--

III. Required Resources & Tech

Item	Details
Presentation/Slides	Hierarchy in Promotional Print.
Handout/Worksheet	Flyer Content Framework (AIDA).
Technology/Tools	Adobe Illustrator, Affinity, Canva, Figma.
AI Tool Prompt	"Structure the content for a music festival flyer with 10 bands and 3 ticket tiers."
Pre-Reading/Prep	Poster Design History, Eventbrite Marketing Guide.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Discuss the "Flyer Lifecycle": From being picked up to being acted upon.
Review	2 min	Students will design a Recap Day 16: Contrast and scale (billboards). flyer that effectively utilizes a hierarchy of information and a clear CTA.
Agenda & SLO	2 min	Define the 3 levels of hierarchy: The Hook, The Details, and The Action.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
-------	------	--------------------------	---------------------------

I Do (Instruction)	10 min	Deep dive into the "F-Pattern" for scanning flyers and the use of QR codes.	Show how to avoid the "Wall of Text" trap.
We Do	10 min	Use AI to refine event copy into bullet points; then map them onto a grid.	Assist students in prioritizing "Date, Time, Location" over decorative art.
Critical Analysis & Assessment	10 min	Peer Check: "Can you find the ticket price in under 2 seconds?"	Test the "Action" part of the AIDA framework.
Task	10 min	Finalize the typographic layout and CTA placement on the flyer.	Ensure the QR code is large enough to scan and has a "Safe Zone."

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection	2 min	Group discussion: How do you handle clients who want "too much text"?
Q&A	1 min	Address questions regarding paper coatings (UV Gloss vs. Matte).
Wrap-up	2 min	Summarize: A flyer's success is measured by the action it triggers.
Homework/Next Session		Introduce Day 18: Environmental Graphics & Wayfinding; research signage.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
-----------------	-------------	----------------------	--------------

Formative	Review of the flyer's information hierarchy.	Current Session SLO	
Summative	Effectiveness of the CTA and overall layout scannability.	Core Deliverable	
Soft Skill Gate	Strategic thinking in information organization.	TLO (Professional Foundations)	

Day 18: Environmental Graphics & Wayfinding

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Transition from marketing to functional, spatial communication.
Module/Week	Week 4: Large Format & Promotional Design	Focus: Environmental graphics, signage, and wayfinding.
Session Title	Day 18: Environmental Graphics & Wayfinding	Refining the narrative and visual deck.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 18, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's portfolio.
Session Learning Objective (SLO)	Students will design a directional signage system using universal icons and high-contrast typography.	Focus on "Inclusivity"—can someone with low vision read this?

Core Link	Deliverable	Wayfinding Signage Mockup	Confirms ability to design for architectural environments.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Wayfinding Systems & Environmental Design.
Handout/Worksheet	Signage Accessibility Checklist.
Technology/Tools	Adobe Illustrator, Affinity, (Vector), Icon libraries (The Noun Project).
AI Tool Prompt	"Propose a logic for a 3-level signage system for a 2-story museum."
Pre-Reading/Prep	SEGD (Society for Experiential Graphic Design) Basics.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"Have you ever been lost in an airport? That's a wayfinding design failure."
Review	2 min	Recap Day 17: Information hierarchy on flyers vs. spatial hierarchy.
Agenda & SLO	2 min	Define "Environmental Graphics": Scale, Contrast, and Iconography.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Instructor)	10 min	The "Four Types of Signage": Identification, Directional, Informational, and Regulatory.	Explain why Sans-Serif is king in environments.

We Do	10 min	Use AI to generate a list of symbols needed for a specific venue; then audit icon clarity.	Help students ensure the icon set looks "related" (stroke weight/style).
Critical Analysis & Assessment	10 min	The "Distance Test": Can you tell the difference between the 'Arrow' and 'Exit' at 20 feet?	Audit the thickness of iconography and text.
Task	10 min	Design a set of three cohesive signs for a chosen physical environment.	Ensure symbols are vector-based and easily scalable.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflections		Group discussion: How does the environment (lighting/material) affect your design?
Q&A	2 min	Address questions regarding ADA (Americans with Disabilities Act) standards.
Wrap-up	1 min	Summarize: Wayfinding design is the ultimate form of "Invisible Design."
Homework/Next Session	2 min	Introduce Day 19: Portfolio Polish & Technical Review; bring all Month 2 work.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of icon system consistency.	Current Session SLO	

Summative	Effectiveness and legibility of the signage system.	Core Deliverable	
Soft Skill Gate	Empathy for the user's navigation experience.	TLO (Professional Foundations)	

Day 19: Portfolio Polish & Technical Review

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	Transition from creation to professional presentation.
Module/Week	Week 4: Large Format & Promotional Design	Focus: Portfolio integration and technical production audit.
Session Title	Day 19: Portfolio Polish & Technical Review	Prepare a high-resolution export environment for all Month 2 assets.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 19, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Session Learning Objective (SLO)	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Focus on "Stage Presence" and technical readiness.
Learning Session Objective (SLO)	Students will curate, refine, and document their Month 2 print projects for professional portfolio display.	Focus on "Process Documentation"—showing the sketches and grids.
Core Deliverable Link	Month 2 Portfolio Case Study	Confirms ability to present print work in a digital/physical portfolio.

III. Resources

Item	Details
Presentation/Slides	Showcasing Print in a Digital Portfolio.
Handout/Worksheet	Portfolio Presentation Checklist.
Technology/Tools	Behance, Adobe Portfolio, Photoshop / Affinity (for high-end mockups).
AI Tool Prompt	"Write a professional project description for an editorial design case study."
Pre-Reading/Prep	Best Graphic Design Portfolios (AIGA), Case Study Writing Guide.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"Good work is invisible if it isn't presented well."
Review	2 min	Recap Month 2: From Day 1 basics to Day 18 wayfinding.
Agenda & SLO	2 min	Goal: Selecting the 'Hero' projects and writing the project narratives.

III. Session Flow (60 Minutes)

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Instructor)	10 min	The "Case Study" Structure: Context, Challenge, Solution, and Result.	Show how to use grid overlays to prove technical skill.

We Do	10 min	Use AI to draft project summaries; then peer-review for clarity and tone.	Help students highlight their specific technical skills (e.g., "Mastered dielines").
Critical Analysis & Assessment	10 min	Audit: Are the images high-res? Is the typography consistent with the work?	Ensure the portfolio itself is a testament to their design skill.
Hook & Context	10 min	Assemble the "Print & Publication" section of the portfolio.	Ensure mockups look consistent (lighting/shadows) across the project.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection		Group discussion: How does seeing your work in a case study change your view of it?
Q&A	2 min	Address questions regarding physical vs. digital portfolio formats.
Wrap-up	1 min	Summarize: Your portfolio is your most important print project.
Homework/Next Session	2 min	Introduce Day 20: Monthly Final Challenge (Full Print Campaign).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of project descriptions and narrative flow.	Current Session SLO	
Summative	Quality and organization of the Month 2 portfolio section.	Core Deliverable	

Soft Skill Gate	Ability to narrate a design process clearly.	TLO 1 (Professional Foundations)	

Day 20: Monthly Final Challenge (Full Print Campaign)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 2 — Print & Publication Design	The cumulative "Final Boss" session for the month.
Module/Week	Week 4: Large Format & Promotional Design	Focus: Multi-channel print campaign execution.
Session Title	Day 20: Monthly Final Challenge (Full Print Campaign)	Set up a "Campaign Launch" environment for student presentations.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 20, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Demonstrate foundational graphic design proficiency through a cohesive project.	Evaluate the holistic quality of the student's month-long progress.
Session Learning Objective (SLO)	Students will execute a comprehensive print campaign across editorial, packaging, and large-format media.	Final check for brand consistency across disparate scales.
Core Deliverable Link	Integrated Print Campaign Portfolio	The ultimate deliverable for Month 2 certification.

III. Resources

Item	Details
Presentation/Slides	Monthly Challenge: The Integrated Campaign.
Handout/Worksheet	Final Technical Audit Sheet.
Technology/Tools	Adobe Creative Suite, Affinity, Figma, PDF Compiler.
AI Tool Prompt	"Review this campaign for visual consistency and identify any brand drift."
Pre-Reading/Prep	Review Month 2 Instructor Feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"Today, your individual pieces become a complete brand story."
Review	2 min	Recap Month 2 milestones: Basics, Editorial, Branding, and Large Format.
Agenda & SLO	2 min	Goal: Final technical polish, assembly into a deck, and official submission.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Instruction)	10 min	Professional Handoff: How to package a "Brand Campaign" for a printer or client.	Demonstrate how to organize folders: Fonts, Links, and High-Res PDFs.
We Do (Guided)	10 min	Final "Table Check": Cross-checking colors (Pantone/CMYK) across all campaign assets.	Facilitate peer-to-peer "red-lining" to catch any last-minute errors.

Critical Analysis & Assessment	10 min	The "Cohesion Audit": Does the Billboard, Spread, and Box look like one brand?	Ensure no "brand drift" occurred between Week 1 and Week 4.
Task	10 min	Final Export and Submission of the Integrated Campaign Portfolio.	Confirm all files meet the professional naming and export standards.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection		Group discussion: What was your biggest breakthrough this month?
Q&A	2 min	Address questions regarding the transition to Month 3 (Digital & Web).
Wrap-up	1 min	Summarize: You are now proficient in the technical and creative world of Print.
Homework/Next Session	2 min	Celebrate! Prepare for Month 3: User Interface (UI) & Experience (UX) Design.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of campaign cohesion and technical specs.	Current Session SLO	
Summative	Successful submission of the Integrated Print Campaign.	Core Deliverable	
Soft Skill Gate	Professionalism, deadline management, and technical rigor.	TLO (Professional Foundations)	

Month 3 — Branding & Visual Identity Design

Day 1: Introduction to Branding & Brand Strategy

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	Ensure students understand the strategic foundation before any visual work begins.
Module/Week	Week 1: Brand Strategy & Research	Focus: Transitioning from graphic design to strategic brand thinking.
Session Title	Day 1: Introduction to Branding & Brand Strategy	Prepare real-world brand comparison examples for the opening hook.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 1, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO 1: Understand the strategic foundations of brand identity design.	Link session back to the capstone Brand Identity System deliverable.
Session Learning Objective (SLO)	Students will define brand strategy, articulate the difference between a logo and a brand identity, and analyze 3 real-world brand case studies using AI-assisted research.	Focus on the strategic layer of branding, not the visual execution.
Core Deliverable Link	Brand Strategy Canvas	First contribution: Brand audit and competitive analysis.

III. Resources

Item	Details
Presentation/Slides	What is a Brand? Strategy vs. Aesthetics.
Handout/Worksheet	Brand Strategy Canvas Template.
Technology/Tools	Figma, ChatGPT, Gemini, Notion.
AI Tool Prompt	"Analyze the brand strategy of [Company Name] and identify their positioning, tone, and target audience."
Pre-Reading/Prep	Marty Neumeier – The Brand Gap (excerpts); Brand Identity Basics (AIGA).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show two brands in the same industry with drastically different identities (Apple vs. Asus). Ask: "What makes a brand feel premium?"
Review	2 min	Overview of the Month 3 program structure and the capstone Brand Identity System deliverable.
Agenda & SLO	2 min	Define brand strategy and explain why aesthetics alone do not constitute a brand.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define brand, brand identity, and brand strategy. Discuss the emotional and functional role of branding.	Use Socratic questioning: "Why would two companies in the same industry feel completely different to you?"

I Do (Demo)	10 min	Demonstrate a live brand audit using ChatGPT: analyze a brand's personality, positioning, and tone of voice.	Focus on ethical AI use — for research and inspiration, not copying.
We Do	10 min	Students select a brand and complete a Brand Strategy Canvas with AI assistance.	Circulate to ensure students are articulating brand attributes, not just describing visuals.
Critical Analysis & Assessment	10 min	Groups share canvases; class critiques the strategic logic. Does the identity match the stated strategy?	Connect today's analysis to the Month 3 capstone: Brand Identity System.

C. Conclusion & Wrap-up (15 minutes)

Activity	Time	Details
Q&A	4 min	Clarify Brand Strategy Canvas requirements.
Wrap-up	3 min	Summary: Branding is a strategic system, not just a visual.
Homework/Next Session	4 min	Finalize Brand Strategy Canvas; research 2 competitor brands for Day 2.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Completed Brand Strategy Canvas uploaded.	Current Session SLO	
Summative	Evidence of brand audit in the final Brand Identity System.	Brand Identity System	
Soft Skill Gate	Active participation during brand critique.	TLO (Professional Foundations)	

Day 2: Competitive Analysis & Audience Research

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	Ensure students have completed their Brand Strategy Canvas from Day 1.
Module/Week	Week 1: Brand Strategy & Research	Focus: Using research to uncover brand positioning opportunities.
Session Title	Day 2: Competitive Analysis & Audience Research	Prepare 2–3 brand positioning map examples from real industries.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 2, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO 1: Understand the strategic foundations of brand identity design.	Link session to the competitive landscape research phase of the capstone.
Session Learning Objective (SLO)	Students will conduct a competitive brand audit, define a target audience persona, and identify a white-space opportunity for their capstone brand.	Focus on psychographic depth in persona development — not just demographics.
Core Deliverable Link	Competitor Audit & Audience Persona	Core research foundation for the capstone Brand Identity System.

III. Resources

Item	Details
Presentation/Slides	Competitive Analysis Frameworks; Audience Persona Design.
Handout/Worksheet	Competitor Audit Grid; Audience Persona Template.
Technology/Tools	Figma, ChatGPT, Google Trends.
AI Tool Prompt	"Generate a detailed target audience persona for a sustainable streetwear brand targeting Gen Z in urban markets."
Pre-Reading/Prep	Jobs-to-Be-Done Framework (IDEO); Competitor Analysis Guide (HubSpot Blog).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Display two near-identical brand logos in the same category. Ask: "How does research drive the difference between them?"
Review	2 min	Recap Day 1: Brand Strategy Canvas and key strategic attributes.
Agenda & SLO	2 min	Define the session goal: Using research to uncover brand positioning opportunities.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Introduce competitive mapping: Axes-based brand positioning maps. Show how research reveals white space in a market.	Prompt students: "Where does your brand sit on the map — and is that the right position?"
I Do (Demo)	10 min	Live demo: Use ChatGPT and Google Trends to build a competitor audit and generate an audience persona.	Show how to cross-reference AI output with real market data for accuracy.

We Do (Guided)	10 min	Workshop: Students complete competitor audit grids and draft their primary audience persona.	Ensure students are defining psychographics, not just demographics.
Critical Analysis & Assessment	10 min	Share personas: Does the white-space opportunity logically match the audience identified?	Link findings directly to the capstone brand they will design this month.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address questions on persona development and data interpretation.
Wrap-up	1 min	Recap: Research creates the strategic brief that guides all design decisions.
Homework/Next Session	2 min	Finalize Competitor Audit & Audience Persona; begin drafting Brand Brief for Day 3.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Competitor Audit Grid and Audience Persona submitted.	Current Session SLO	
Summative	Research feeds directly into the capstone Brand Identity System.	Brand Identity System	
Soft Skill Gate	Engagement in competitive analysis discussion.	TLO (Professional Foundations)	

Day 3: Brand Brief & Creative Direction

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	Ensure students have their competitor audit and persona ready before the session.
Module/Week	Week 1: Brand Strategy & Research	Focus: Translating strategy into a creative direction brief and mood board.
Session Title	Day 5: 1 Studio Challenge	Prepare a professional brand brief example to use as a reference standard.

Duration	3 Hours (1 hr Lesson / 2 hrs Task)	
Date	Day 3, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO 1: Translate brand strategy into a creative direction brief.	Ensure students understand the brief is a governing document for all Month 3 design decisions.
Session Learning Objective (SLO)	Students will write a brand brief, define a mood board that translates strategic attributes into visual direction, and receive peer critique.	Focus on the alignment between the written brief and the visual mood board.
Core Deliverable Link	Brand Brief & Mood Board	Establishes the visual direction for the capstone Brand Identity System.

III. Resources

Item	Details
Presentation/Slides	Brand Brief Anatomy; From Strategy to Aesthetics.
Handout/Worksheet	Brand Brief Template; Mood Board Evaluation Rubric.
Technology/Tools	Figma, Canva, ChatGPT.
AI Tool Prompt	"Write a brand brief for a [Brand Name] positioned as [adjective], targeting [audience]. Include tone, personality, and visual direction."
Pre-Reading/Prep	How to Write a Creative Brief (IDEO); Visual Brand Direction Case Studies.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a brand brief alongside the finished brand identity. Ask: "Can you see the brief in the design?"
Review	2 min	Recap Day 2: Competitor audit and audience persona findings.
Agenda & SLO	2 min	Define the session goal: Translating strategy into a mood board and creative direction statement.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define the Brand Brief structure: Mission, Vision, Audience, Tone, Visual Direction, and Keywords.	Emphasize that the brief is a contractual document — every design decision must be defensible against it.
I Do (Demo)	10 min	Live demo: Write a brand brief using AI for a fictional startup; then build a Figma mood board from its keywords.	Show how to curate intentionally — "everything on the board should earn its place."
We Do	10 min	Workshop: Students draft their brand briefs and begin their mood boards in Figma.	Circulate: Is the mood board visually cohesive? Does it reflect the brief keywords?
Critical Analysis & Assessment	10 min	Peer critique: Does the mood board visually communicate the brand personality written in the brief?	Link to capstone: This brief and mood board will govern all Month 3 design decisions.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address questions on mood board curation and brief writing.

Wrap-up	1 min	Recap: The brief is the foundation; the mood board is the first visual test.
Homework/Next Session	2 min	Finalize Brand Brief and Mood Board; prepare for Day 4 Practice + Support Day.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Brand Brief and Mood Board draft uploaded.	Current Session SLO	
Summative	Evidence included in the final Brand Identity System.	Brand Identity System	
Soft Skill Gate	Constructive participation in peer mood board critique.	TLO (Professional Foundations)	

Day 4: Practice + Support Day

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	Ensure all students have access to Days 1–3 assets and instructor feedback.
Module/Week	Week 1: Brand Strategy & Research	Focus: Buffer and studio time for consolidation of Week 1 strategy deliverables.
Session Title	Day 4: Practice + Support Day	Prepare the studio environment for peer critique circles.

Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 4, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO 1: Consolidate strategic brand research and direction deliverables.	Track student progress against Week 1 deliverables.
Session Learning Objective (SLO)	Students will refine their Brand Strategy Canvas, Competitor Audit, and Mood Board based on instructor and peer feedback.	Identify students falling behind for targeted intervention.
Core Deliverable Link	Week 1 Deliverables: Brand Strategy Canvas, Competitor Audit, Brand Brief, Mood Board	Confirm all students are caught up on all four Week 1 items.

III. Resources

Item	Details
Presentation/Slides	N/A (Studio Day)
Handout/Worksheet	Project Progress Checklist.
Technology/Tools	Figma, Canva, ChatGPT, Notion.
AI Tool Prompt	"Critique my brand brief for clarity, consistency, and strategic alignment."
Pre-Reading/Prep	Review instructor feedback from Days 1–3.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Explain the value of a dedicated studio day in professional brand development — even senior designers use refinement days.

Review	2 min	Overview of the 4 Week 1 deliverables and their role in the capstone.
Agenda & SLO	2 min	Define goals: Refinement, peer support, critique, and catching up.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Outline studio expectations: refinement, critique, and peer support norms.	Set strict norms for constructive feedback using design terminology.
I Do (Demo)	10 min	Demonstrate how to self-critique a mood board using the brand brief as a rubric.	Model the "Positive-Constructive-Positive" feedback structure.
We Do (Guided)	10 min	Peer critique circles and targeted instructor support for students who are behind.	Identify learners who need focused support on brand brief articulation.
Critical Analysis & Assessment	10 min	Individual refinement of Week 1 deliverables based on peer and instructor feedback.	Confirm all files are exported correctly and accessible.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address final roadblocks for Week 1 deliverable completion.
Wrap-up	1 min	Confirm the goal: All students are caught up on Week 1 deliverables.
Homework/Next Session	2 min	Finalize all Week 1 deliverables; prepare for Day 5 Weekly Studio Challenge.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of refined project drafts.	Current Session SLO	
Summative	Completion of Week 1 deliverables.	Brand Identity System	
Soft Skill Gate	Engagement in peer critique circles.	TLO (Professional Foundations)	

Day 5: Weekly Studio Challenge

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	Ensure students have finalized all Week 1 deliverables before the challenge.
Module/Week	Week 1: Brand Strategy & Research	Focus: Weekly Studio Challenge — Brand Direction Package Pitch.
Session Title	Day 5: Weekly Studio Challenge	Prepare the digital space for the Brand Direction Package pitch challenge.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	
Date	Day 5, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO 1: Apply brand strategy to produce a cohesive creative direction package.	Link challenge to the cumulative skills of Week 1.

Session Learning Objective (SLO)	Students will produce a complete Brand Direction Package (Brief + Mood Board + Strategy Canvas) and present it as a simulated client pitch.	Ensure students utilize AI for copywriting and critique support.
Core Deliverable Link	Brand Direction Package	Final Week 1 studio challenge submission.

III. Resources

Item	Details
Presentation/Slides	N/A
Handout/Worksheet	Challenge Requirements Checklist; Pitch Structure Guide.
Technology/Tools	Figma, Canva, ChatGPT.
AI Tool Prompt	"Simulate a client responding to my brand brief pitch and give me 3 tough questions they might ask."
Pre-Reading/Prep	Review Week 1 work and instructor feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Brief scenario: "You have just won a brand design pitch. Your client wants to see your complete creative direction before you touch a single logo."
Review	2 min	Recap Week 1 core principles: strategy, research, creative direction.
Agenda & SLO	2 min	Define the challenge: Assemble and pitch a complete Brand Direction Package.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Assign the challenge: Assemble the Brand Direction Package and prepare a 3-minute pitch.	Distribute the assessment rubric and challenge parameters.
I Do (Demo)	10 min	Demonstrate how to structure a brand direction pitch: Strategy first, then visual direction.	Model confident, clear design presentation language.
We Do	10 min	Workshop time: Students assemble their packages and rehearse pitches.	Use this time for targeted one-on-one support.
Critical Analysis & Assessment	10 min	Rapid peer-review pitches: Does the visual direction match the stated strategy?	Ensure design choices are justified by Week 1 research.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address specific questions from the pitch challenge.
Wrap-up	1 min	Summarize Week 1 accomplishments.
Homework/Next Session	2 min	Summarize Week 1 accomplishments.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Submission of Brand Direction Package.	Current Session SLO	
Summative	Completion of Week 1 deliverables.	Brand Identity System	

Soft Skill Gate	Active participation in pitch challenge.	TLO (Professional Foundations)	

Day 6: Logo Design Fundamentals & Sketching

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	Ensure students have their Brand Brief keywords ready before the session.
Module/Week	Week 2: Logo & Mark Design	Focus: Logo ideation — volume of ideas precedes quality of execution.
Session Title	Day 6: Logo Design Fundamentals & Sketching	Prepare paper sketch sheets or iPad apps for the thumbnail sketching exercise.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 6, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Complete and audit the Brand Guidelines document for professional delivery.	Ensure the guidelines document is thorough enough to govern the brand without the designer present.
Session Learning Objective (SLO)	Students will sketch 20+ logo thumbnail concepts using brand brief keywords and AI-generated direction, applying the 7 logo types.	Focus on technical accuracy: Hex codes, logo proportions, and usage rules must be exact.
Core Deliverable Link	Complete Brand Guidelines Document	Final audit and completion of the capstone Brand Identity System document.

--	--	--

III. Resources

Item	Details
Presentation/Slides	N/A (Studio Day)
Handout/Worksheet	Brand Guidelines Completion Audit Checklist.
Technology/Tools	Figma, Adobe InDesign.
AI Tool Prompt	"Review my Brand Guidelines document for any missing sections, inconsistencies, or unclear rules. The brand is [brief description]."
Pre-Reading/Prep	Review previous instructor feedback on Brand Guidelines draft.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"Your client is about to hand this document to their marketing team. Will they be able to apply the brand correctly without calling you?"
Review	2 min	Overview of all Brand Guidelines sections and current completion status.
Agenda & SLO	2 min	Define goals: Complete, audit, and finalize the Brand Guidelines document for export.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Walk through the Brand Guidelines completion checklist: Brand Story, Logo System, Color, Typography, Photography, Tone of Voice, Applications.	Identify the most commonly missing section: Application examples and do/don't rules.

I Do (Demo)	10 min	Demonstrate how to conduct a self-audit: Typography accuracy, color hex code verification, logo safe zone documentation.	Show how to export a multi-page Figma document as a polished PDF.
We Do	10 min	Studio time: Students complete their guidelines documents and conduct peer audits.	Circulate to verify technical accuracy: Are hex codes correct? Are logo rules clearly illustrated?
Critical Analysis & Assessment	10 min	Peer audit using the completion checklist: What is missing? What is unclear?	Final integration of mockups and application examples into the guidelines.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address export and final submission questions.
Wrap-up	1 min	Recap: The guidelines document is the final product.
Homework/Next Session	2 min	Finalize complete Brand Guidelines document; prepare for Day 19: Portfolio Polish & Technical Review.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of completed Brand Guidelines draft.	Current Session SLO	
Summative	Quality and completeness of the Brand Guidelines document.	Brand Identity System	
Soft Skill Gate	Thoroughness in self-audit and peer review.	TLO (Professional Foundations)	

Day 9: Logo & Typography Studio Day

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	Ensure all students have logo concepts and type specimens drafted before this session.
Module/Week	Week 2: Logo & Mark Design	Focus: Buffer and studio time for logo refinement and typography system consolidation.
Session Title	Day 9: Logo & Typography Studio Day	Prepare the studio environment for peer critique circles and one-on-one instructor support.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 9, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Refine logo and typography deliverables to professional standard.	Track student progress against Week 2 deliverables.
Session Learning Objective (SLO)	Students will refine their 3 digital logo concepts and brand typography system based on instructor and peer feedback, selecting their final logo direction.	Identify students falling behind for targeted intervention.
Core Deliverable Link	Refined Logo Concepts + Final Logo Selection + Brand Typography System	Confirm all students have a confirmed logo direction and complete type specimen.

III. Required Resources & Tech

Item	Details
Presentation/Slides	N/A (Studio Day)
Handout/Worksheet	Logo Refinement Checklist; Typography Consistency Audit.
Technology/Tools	Figma, Adobe Illustrator, ChatGPT.
AI Tool Prompt	"Critique my logo and typography system for visual consistency and brand alignment with these attributes: [list]."
Pre-Reading/Prep	Review instructor feedback from Days 6–8.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"Today you make the most important creative decision of Month 3: which logo direction will carry your entire brand identity."
Review	2 min	Recap Days 6–8: Sketching, vector development, and typography. All three must align with the brand brief.
Agenda & SLO	2 min	Define goals: Refine, critique, select a final logo direction, and consolidate the typography system.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Demonstrate how to evaluate 3 logo options against the brand brief criteria: Does each concept communicate the brand attributes?	Use a scoring rubric: Brand fit, Scalability, Distinctiveness, Versatility.
I Do (Demo)	10 min	Live demo: Refine the strongest logo concept — tighten proportions,	Show how small refinements (spacing, weight, proportion)

		adjust anchor points, test on a mock business card.	elevate a concept from good to professional.
We Do	10 min	Peer critique circles: Students present 3 logo options and receive structured feedback on final selection.	Guide students toward evidence-based selection — the brief is the judge, not personal preference.
Critical Analysis & Assessment	10 min	Students finalize their logo selection and document the rationale in their brand brief.	Confirm all logo files are properly constructed vectors before the Week 2 challenge.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address technical questions on logo finalization and file prep.
Wrap-up	1 min	Confirm goal: Every student has a final logo direction and a complete type specimen.
Homework/Next Session	2 min	Finalize all Week 2 deliverables; prepare for Day 10 Weekly Studio Challenge (Brand System Preview).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of refined logo concepts and final selection rationale.	Current Session SLO	
Summative	Final logo and typography system feed into the capstone Brand Identity System.	Brand Identity System	

Soft Skill Gate	Evidence-based decision making in final logo selection.	TLO (Professional Foundations)	
-----------------	---	--------------------------------	--

Day 10: Weekly Studio Challenge (Brand System Preview)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	Ensure all Week 2 deliverables are complete before the studio challenge.
Module/Week	Week 2: Logo & Mark Design	Focus: Weekly Studio Challenge — Brand System Preview.
Session Title	Day 10: Weekly Studio Challenge (Brand System Preview)	Prepare the Brand System Review Rubric for peer presentations.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 10, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Integrate logo and typography into a cohesive brand system preview.	Link challenge to the cumulative skills of Week 2.
Session Learning Objective (SLO)	Students will assemble a Brand System Preview board combining their final logo and typographic scale, and present it in a simulated brand review.	Ensure students can defend every design decision with reference to their brand brief.
Core Deliverable Link	Brand System Preview Board	Integrates Week 2 deliverables for peer presentation.

III. Required Resources & Tech

Item	Details
Presentation/Slides	N/A
Handout/Worksheet	Brand System Review Rubric.
Technology/Tools	Figma, ChatGPT.
AI Tool Prompt	"Act as a brand director reviewing my logo and typography system. Identify any inconsistency with the following brand brief: [brief summary]."
Pre-Reading/Prep	Review Week 2 instructor feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Brief scenario: "Your client has approved your strategy. Now they want to see the logo and typography before you proceed to color and applications."
Review	2 min	Recap Week 2 core skills: logo sketching, vector development, typography systems, and final logo selection.
Agenda & SLO	2 min	Define the challenge: Assemble and present a Brand System Preview Board.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Assign the challenge: Build a Brand System Preview board in Figma showing the final logo and typographic scale.	Distribute the assessment rubric: Logo clarity, Type hierarchy, Brand brief alignment, Scalability.

I Do (Demo)	10 min	Demonstrate how to arrange a professional brand system board for client presentation.	Model using aligned grids and consistent spacing for the board itself.
We Do	10 min	Workshop: Students build their boards and rehearse a 2-minute brand presentation.	Support students who are struggling with integration of logo and typography.
Critical Analysis & Assessment	10 min	Rapid peer presentations: Does the board feel like the beginning of a cohesive brand system?	Ensure students can defend every design decision with reference to the brand brief.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address specific technical questions.
Wrap-up	1 min	Summarize Week 2 accomplishments.
Homework/Next Session	2 min	Finalize Brand System Preview; preview Week 3: Color, Applications & Collateral Design.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Submission of Brand System Preview Board.	Current Session SLO	
Summative	Completion of Week 2 deliverables.	Brand Identity System	
Soft Skill Gate	Active participation in the brand review challenge.	TLO (Professional Foundations)	

--	--	--	--

Day 11: Color System & Brand Palette

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	Ensure students have browser access to Adobe Color, Coolers, and WebAIM before the session.
Module/Week	Week 3: Color, Applications & Collateral Design	Focus: Developing a comprehensive brand color system with accessibility compliance.
Session Title	Day 11: Color System & Brand Palette	Prepare the WebAIM Contrast Checker and Coolers for live demo.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 11, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	TLO: Develop a comprehensive brand color system and apply it to physical and digital collateral.	Track progress toward the final "Brand Identity Pack" deliverable.
Session Learning Objective (SLO)	Students will construct a brand color palette (Primary, Secondary, Accent, Neutral) with defined hex	Focus on the 60-30-10 proportion rule and WCAG 2.1 accessibility standards.

	values, usage rules, and accessibility compliance.	
Core Deliverable Link	Brand Color Palette & Usage Guide	Defines the complete chromatic system for the Brand Identity.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Color System Architecture; Accessibility in Brand Color.
Handout/Worksheet	Brand Color Palette Template.
Technology/Tools	Adobe Color, Coolers, Figma, WebAIM Contrast Checker.
AI Tool Prompt	"Generate 3 brand color palette options for a [brand type] with the following personality attributes: [list]. Include primary, secondary, accent, and neutral colors."
Pre-Reading/Prep	Color Theory for Designers (Smashing Magazine); WCAG 2.1 Color Contrast Guidelines.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a brand with a weak color system (too many colors, no hierarchy) vs. a disciplined palette. Discuss the cognitive impact.
Review	2 min	Recap Week 2: Final logo and typography system. Today we complete the visual identity trinity.
Agenda & SLO	2 min	Introduce brand color architecture: primary, secondary, accent, neutral, and the rules that govern their use.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
-------	------	--------------------------	---------------------------

Hook & Context	10 min	Define color system levels: Primary (hero brand color), Secondary (supporting), Accent (calls to action), Neutral (backgrounds/text).	Discuss the 60-30-10 color proportion rule in brand design.
I Do (Demo)	10 min	Live demo: Use Colors + AI to generate palette options, test accessibility in WebAIM, and build a Figma color style library.	Show how to document hex, RGB, CMYK, and Pantone equivalents in a professional brief.
We Do	10 min	Workshop: Students build their brand color palettes and test accessibility compliance.	Circulate: Ensure students are thinking about use cases — what color goes on what background?
Critical Analysis & Assessment	10 min	Palette review: Does each color reinforce the brand brief personality and pass the accessibility test?	Integrate the color palette with the logo and typography for a first full brand system preview.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address accessibility and color mode (RGB vs. CMYK vs. Pantone) questions.
Wrap-up	1 min	Recap: Color systems govern, not decorate.
Homework/Next Session	2 min	Finalize Brand Color Palette; prepare for Day 12: Stationery & Business Collateral Design.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Brand Color Palette & Usage Guide submitted.	Current Session SLO	

Summative	Evidence included in the final Brand Identity System.	Brand Identity System	
Soft Skill Gate	Engagement during color system critique and accessibility review.	TLO (Professional Foundations)	

Day 12: Stationery & Business Collateral Design

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	Ensure all students have their brand system (logo, type, color) finalized before this session.
Module/Week	Week 3: Color, Applications & Collateral Design	Focus: Translating the brand system into professional physical touchpoints.
Session Title	Day 12: Stationery & Business Collateral Design	Prepare examples of real-world business cards and letterheads for analysis.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 12, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Apply the brand identity system to professional business collateral.	Link challenge to the communication of a cohesive brand story.
Session Learning Objective (SLO)	Students will design a brand stationery suite (business card, letterhead, email signature) applying logo, typography, and color systems with professional print specifications.	Ensure students articulate <i>why</i> their choices fit the personality.

Core Link	Deliverable	Stationery Suite	First application of the brand identity to physical touchpoints.
-----------	-------------	------------------	--

III. Required Resources & Tech

Item	Details
Presentation/Slides	Brand Stationery Specifications; Print vs. Digital Specs.
Handout/Worksheet	Stationery Design Spec Sheet.
Technology/Tools	Figma, Adobe Illustrator. Affinity
AI Tool Prompt	"Generate a professional business card copy layout for a [brand name] including name, title, contact info, and tagline. Keep it minimal and impactful."
Pre-Reading/Prep	Business Card Design Best Practices (99designs); Letterhead Design Guide (Canva).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Pass around real-world business cards of varying quality. Ask: "What does this card say about the company before you read a single word?"
Review	2 min	Recap Day 11: Brand color palette. Today we apply the complete brand system to the first physical touchpoint.
Agenda & SLO	2 min	Define the session: Applying the brand identity to professional business collateral.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
-------	------	--------------------------	---------------------------

Hook & Context	10 min	Define the stationery suite: Business card, letterhead, envelope, and email signature. Discuss print specs: bleed, safe zone, CMYK.	Emphasize that brand consistency across every touchpoint is what builds trust.
I Do (Demo)	10 min	Live demo: Design a business card in Figma using brand colors, logo, and typography. Set up bleed and safe zone.	Show how to use Figma components to maintain consistency across multiple items.
We Do	10 min	Workshop: Students design their business card and letterhead using their brand system.	Circulate: Check for correct print setup, hierarchy, and brand consistency.
Critical Analysis & Assessment	10 min	Peer review: Does this stationery instantly communicate the brand? Is it print-ready?	Connect stationery to the Brand Identity System portfolio submission.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address print setup and export questions.
Wrap-up	1 min	Recap: Every touchpoint is a brand expression.
Homework/Next Session	2 min	Finalize stationery suite; prepare for Day 13: Social Media & Digital Brand Templates.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Stationery suite drafts uploaded.	Current Session SLO	

Summative	Stationery suite feeds into the capstone Brand Identity System.	Brand Identity System	
Soft Skill Gate	Attention to print specification detail.	TLO (Professional Foundations)	

Day 13: Social Media & Digital Brand Templates

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	Ensure students have access to social media dimension specs before the session.
Module/Week	Week 3: Color, Applications & Collateral Design	Focus: Extending the brand identity system into digital and social media formats.
Session Title	Day 13: Social Media & Digital Brand Templates	Verify students have access to Figma and the Social Media Spec Sheet.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 13, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
-------	-------	---------------------

Terminal Learning Outcome (TLO) Link	Extend the brand identity system into digital and social media formats.	Ensure digital templates maintain brand consistency and platform-specific specifications.
Session Learning Objective (SLO)	Students will design a set of social media templates (Instagram post, Story, LinkedIn banner) applying brand guidelines for digital environments.	Focus on platform-specific specifications: safe zones, format, and legibility at small sizes.
Core Deliverable Link	Social Media Template Suite	Digital application of the brand identity system.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Digital Brand Standards; Social Media Specification Guide.
Handout/Worksheet	Social Media Template Spec Sheet.
Technology/Tools	Figma, Canva, ChatGPT.
AI Tool Prompt	"Generate 3 social media caption templates for a [brand name] in a [tone] voice for an Instagram product launch post."
Pre-Reading/Prep	Social Media Design Specifications (Canva Blog); Hootsuite Brand Consistency Guide.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a brand that looks polished on their website but chaotic on social media. Ask: "How does this affect your perception of their professionalism?"
Review	2 min	Recap Day 12: Stationery suite design principles and brand application standards.
Agenda & SLO	2 min	Define the session goal: Extending the brand identity to the digital and social media ecosystem.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define platform-specific specs: Instagram (1080x1080, 1080x1920), LinkedIn (1584x396). Discuss safe zones for each.	Show how a disciplined brand template system allows non-designers to create on-brand content.
I Do (Demo)	10 min	Live demo: Build an Instagram post template in Figma using brand components. Show how to create a locked template with editable zones.	Demonstrate Figma's component publishing and how brand teams distribute templates.
We Do	10 min	Peer review: Across these templates, does the brand feel recognizable and consistent?	Circulate: Check for correct specifications, brand consistency, and legibility at small sizes.
Critical Analysis & Assessment	10 min	Peer review: Across these templates, does the brand feel recognizable and consistent?	Connect to the Brand Identity System: social templates are a core deliverable.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address template creation and Figma component questions.
Wrap-up	1 min	Recap: Digital templates protect brand consistency at scale.
Homework/Next Session	2 min	Finalize social media template suite; prepare for Day 14: Brand Application Studio Day.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Social media template suite uploaded.	Current Session SLO	
Summative	Social templates feed into the capstone Brand Identity System.	Brand Identity System	
Soft Skill Gate	Attention to platform-specific digital specifications.	TLO (Professional Foundations)	

Day 14: Brand Application Studio Day

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	Ensure all students have completed color palette, stationery, and social template drafts.
Module/Week	Week 3: Color, Applications & Collateral Design	Focus: Consolidation, refinement, and brand consistency audit across all Week 3 deliverables.
Session Title	Day 14: Brand Application Studio Day	Prepare the Brand Consistency Audit Checklist for peer critique circles.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 14, Week 3	

Instructor	Instructor Name	
------------	-----------------	--

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Consolidate brand application deliverables through refinement and critique.	Track student progress against Week 3 deliverables.
Session Learning Objective (SLO)	Students will refine their color palette, stationery suite, and digital templates based on peer and instructor critique, ensuring brand consistency across all touchpoints.	Identify students who need targeted support on technical execution.
Core Deliverable Link	Refined Color Palette, Stationery & Digital Templates	Portfolio-ready brand application suite.

III. Required Resources & Tech

Item	Details
Presentation/Slides	N/A (Studio Day)
Handout/Worksheet	Brand Consistency Audit Checklist.
Technology/Tools	Figma, Canva, Adobe Color.
AI Tool Prompt	"Conduct a brand consistency audit across my color palette, stationery, and social templates. Identify any deviations from the brand brief: [brief summary]."
Pre-Reading/Prep	Review Days 11–13 instructor feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show side-by-side: a brand's business card, social post, and palette swatch. Ask: "Does the brand feel the same across all three?"

Review	2 min	Overview of the three Week 3 deliverables and their role in the capstone.
Agenda & SLO	2 min	Define goals: Refinement, brand consistency audit, and peer support.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Introduce the Brand Consistency Audit process: Does every element pass the "same brand" test?	Set peer critique norms: Feedback must reference the brand brief.
I Do (Demo)	10 min	Demonstrate how to conduct a self-audit: Color match, typography usage, logo placement rules.	Show common mistakes: Unauthorized color variations, wrong logo proportions, font substitutions.
We Do	10 min	Peer critique circles: Conduct brand consistency audits on each other's deliverables.	Identify students who need targeted support on technical execution.
Critical Analysis & Assessment	10 min	Individual refinement of Week 3 deliverables based on audit findings.	Confirm all files are print-ready or export-ready before the challenge.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address final technical questions on brand application.
Wrap-up	1 min	Confirm goal: All students are caught up on Week 3 deliverables.

Homework/Next Session	2 min	Finalize all Week 3 deliverables; prepare for Day 15 Weekly Studio Challenge (Full Brand Suite).
-----------------------	-------	--

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of refined collateral drafts.	Current Session SLO	
Summative	Completion of Week 3 deliverables.	Brand Identity System	
Soft Skill Gate	Engagement in peer critique and brand consistency audit.	TLO (Professional Foundations)	

Day 15: Weekly Studio Challenge (Full Brand Suite)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	Ensure students have finalized all Week 3 deliverables before the challenge.
Module/Week	Week 3: Color, Applications & Collateral Design	Focus: Weekly Studio Challenge — Full Brand Suite Presentation.
Session Title	Day 15: Weekly Studio Challenge (Full Brand Suite)	Prepare a digital "Showcase" folder for class-wide review.

Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 15, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Demonstrate brand application mastery across a complete suite of touchpoints.	Link challenge to the cumulative skills of Week 3.
Session Learning Objective (SLO)	Students will present their complete Brand Suite (color palette + stationery + digital templates) as a unified brand ecosystem in a simulated client mid-project review.	Ensure students can defend every application decision with reference to their brand brief.
Core Deliverable Link	Full Brand Suite	Full Week 3 studio challenge submission.

III. Required Resources & Tech

Item	Details
Presentation/Slides	
Handout/Worksheet	Client Mid-Review Presentation Guide.
Technology/Tools	Figma, ChatGPT.
AI Tool Prompt	"Act as a brand consultant reviewing my Full Brand Suite. Evaluate whether the color palette, stationery, and digital templates are consistent, distinctive, and strategically aligned."
Pre-Reading/Prep	Review Week 3 deliverables and instructor feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
----------	------	---------

Hook & Context	3 min	Brief scenario: "Your client has reviewed the logo and typography. Now they want to see the full brand in the real world — color, print, and digital."
Review	2 min	Recap Week 3: Color palette, stationery, digital templates, and brand consistency principles.
Agenda & SLO	2 min	Define the challenge: Present the Full Brand Suite for peer and instructor critique.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Assign the challenge: Assemble the Full Brand Suite and prepare a client mid-review presentation.	Distribute the presentation rubric.
I Do (Demo)	10 min	Demonstrate how to present brand application work: Context first, then execution, then rationale.	Support students who are behind on any Week 3 deliverable.
We Do	10 min	Workshop: Students finalize their Brand Suites and prepare presentations.	Support students who are behind on any Week 3 deliverable.
Critical Analysis & Assessment	10 min	Rapid peer-review: Does the suite feel like one brand system? Is every touchpoint consistent?	Ensure students can justify every design decision with reference to the brand brief.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address specific presentation questions.
Wrap-up	1 min	Summarize Week 3 accomplishments.

Homework/Next Session	2 min	Finalize Full Brand Suite; preview Week 4: Brand Guidelines & Portfolio.
-----------------------	-------	--

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Submission of Full Brand Suite.	Current Session SLO	
Summative	Completion of Week 3 deliverables.	Brand Identity System	
Soft Skill Gate	Professional presentation of brand application work.	TLO (Professional Foundations)	

Day 16: Brand Guidelines Document Design

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	Ensure students have all Week 1–3 brand assets finalized and organized in Figma.
Module/Week	Week 4: Brand Guidelines & Portfolio	Focus: Codifying the brand system into a professional brand guidelines document.
Session Title	Day 16: Brand Guidelines Document Design	Prepare the Brand Guidelines Template in Figma and reference examples (Mailchimp, Spotify).

Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 16, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Produce a professional brand guidelines document.	Ensure the guidelines document is a design artifact in itself — not just documentation.
Session Learning Objective (SLO)	Students will design a multi-page Brand Guidelines document that codifies logo usage rules, color system, typography system, and application standards.	Focus on clarity: A stranger must be able to apply the brand correctly from this document alone.
Core Deliverable Link	Brand Guidelines Document	The definitive brand rulebook for the capstone Brand Identity System.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Anatomy of a Professional Brand Guidelines Document.
Handout/Worksheet	Brand Guidelines Template (Figma).
Technology/Tools	Figma, Adobe InDesign, ChatGPT.Affinity
AI Tool Prompt	"Write the 'Logo Usage Rules' section of a brand guidelines document for a [brand name]. Include do and don't examples for clear and incorrect usage."
Pre-Reading/Prep	Mailchimp Brand Guidelines (publicly available); Spotify Design Guidelines.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
----------	------	---------

Hook & Context	3 min	Show the Slack brand guidelines document. Ask: "Why does a company this size need 40 pages of rules?"
Review	2 min	Recap Weeks 1–3: Logo, typography, color, and application deliverables that will populate the guidelines.
Agenda & SLO	2 min	Define the session: Structuring and designing a professional brand guidelines document.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define the sections of a brand guidelines doc: Brand Story, Logo System, Color Palette, Typography, Photography Style, Tone of Voice, Application Examples.	Use real brand guidelines from Mailchimp or Spotify as structural references. Keep time strictly to ensure everyone presents.
I Do (Demo)	10 min	Live demo: Build the first 3 sections of the guidelines in Figma using their brand assets.	Show how to use Figma's grid system and auto layout for consistent multi-page documents.
We do	10 min	Workshop: Students begin building their brand guidelines documents.	Circulate: Check for clear hierarchy, consistent formatting, and accurate brand values.
Critical Analysis & Assessment	10 min	Peer review: Can a stranger use this document to apply the brand correctly without asking a question?	Connect to capstone: The guidelines document is the culminating deliverable of Month 3.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	1 min	Address questions on guidelines structure and content.

Wrap-up	2 min	Recap: The brand guidelines are the product — not just the documentation.
Reflection	2 min	Continue building Brand Guidelines document; prepare for Day 17: Brand Mockups & Visual Presentation.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Brand Guidelines draft (first 3 sections) uploaded.	Current Session SLO	
Summative	Brand Guidelines document is the core capstone deliverable.	Brand Identity System	
Soft Skill Gate	Attention to documentation clarity and professional formatting.	TLO (Professional Foundations)	

Day 17: Brand Mockups & Visual Presentation

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	Ensure students have access to Figma mockup plugins and free mockup resources.
Module/Week	Week 4: Brand Guidelines & Portfolio	Focus: Applying the brand identity to professional mockup visualizations.

Session Title	Day 17: Brand Mockups & Visual Presentation	Prepare Figma mockup plugin and Creative Market free mockup links.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 17, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Present the brand identity system through professional mockup visualizations.	Ensure mockups are photorealistic and accurately represent the brand.
Session Learning Objective (SLO)	Students will apply their brand identity to 5 professional mockups (business card, phone screen, billboard, tote bag, storefront) and integrate them into their brand guidelines.	Focus on realism, brand accuracy, and visual consistency across the mockup set.
Core Deliverable Link	Brand Mockup Set (5 Mockups)	Visual proof of the brand identity system applied to real-world contexts.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Mockup Photography: Lighting, Perspective, and Realism.
Handout/Worksheet	Mockup Selection Checklist.
Technology/Tools	Figma (Mockup plugins), Photoshop, Creative Market free mockups.
AI Tool Prompt	"Describe the visual narrative I should create with mockups to showcase a [brand name] identity. What environments and touchpoints would be most impactful?"

Pre-Reading/Prep	Mockup Photography Guide (Placeit Blog); Figma Mockup Plugin tutorials.
------------------	---

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show the same brand identity: first as flat files, then inside professional mockups. Ask: "Which version builds more confidence in the brand?"
Review	2 min	Recap Day 16: Brand Guidelines document progress.
Agenda & SLO	2 min	Define the session: Using mockups to visualize and sell the brand identity.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define the role of mockups in brand presentations. Show how lighting, environment, and context affect brand perception.	Discuss the difference between a "presentation mockup" and a "production-ready file."
I Do (Demo)	10 min	Live demo: Apply the brand to a business card mockup in Figma using the smart mockup plugin and in Photoshop using smart objects.	Show how to adjust shadows, lighting, and perspective for photorealistic results.
We Do	10 min	Workshop: Students select and populate 5 mockup templates with their brand identity.	Circulate: Check for realism, brand accuracy, and visual consistency across the mockup set.
Critical Analysis &	10 min	Gallery review: Which mockup is most convincing? What makes it feel real?	Integrate the best 3 mockups into the Brand Guidelines document.

Assess ment			
----------------	--	--	--

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address mockup technical questions.
Wrap-up	1 min	Recap: Mockups transform a design into a vision.
Homework/Next Session	2 min	Finalize Brand Mockup Set; prepare for Day 18: Brand Guidelines Completion & Audit.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Brand Mockup Set uploaded.	Current Session SLO	
Summative	Mockups integrated into the capstone Brand Identity System.	Brand Identity System	
Soft Skill Gate	Attention to mockup realism and brand accuracy.	TLO (Professional Foundations)	

Day 18: Brand Guidelines Completion & Audit

I. Program Overview & Philosophy

Field	Value	Customization Notes
-------	-------	---------------------

Program Title	Month 3 — Branding & Visual Identity Design	Ensure all students are close to completing their Brand Guidelines document.
Module/Week	Week 4: Brand Guidelines & Portfolio	Focus: Completing, auditing, and finalizing the Brand Guidelines document for professional delivery.
Session Title	Day 18: Brand Guidelines Completion & Audit	Prepare the Brand Guidelines Completion Audit Checklist for studio use.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 18, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Session Learning Objective (SLO)	Complete and audit the Brand Guidelines document for professional delivery.	Focus on "Stage Presence" and technical readiness.
Session Learning Objective (SLO)	Students will complete all sections of their Brand Guidelines document, conduct a technical audit for accuracy and completeness, and prepare the PDF for export.	Focus on technical accuracy: Hex codes, logo proportions, and usage rules must be exact.
Core Deliverable Link	Complete Brand Guidelines Document	Final audit and completion of the capstone Brand Identity System document.

III. Session Flow (60 Minutes)

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
-------	------	--------------------------	---------------------------

The Showcase	10 min	Students present their 5-minute pitches followed by 3 mins of Q&A.	Keep energy high; provide constructive feedback.
Retrospective	10 min	"The Journey": Each student shares their biggest hurdle and their biggest win.	Focus on the growth from Day 1 to Day 20.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Summative	Final Portfolio Showcase & UXCEL Certificate.	TLO (Startup Design & Launch)	

Day 19: Portfolio Polish & Technical Review

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	Transition from creation to professional presentation.
Module/Week	Week 4: Brand Guidelines & Portfolio	Focus: Portfolio integration and technical production audit.
Session Title	Day 19: Portfolio Polish & Technical Review	Prepare a high-resolution export environment for all Month 3 assets.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 19, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Demonstrate brand identity design proficiency through a cohesive project.	Focus on "Stage Presence" and technical readiness.

Session Learning Objective (SLO)	Students will curate, refine, and document their Month 3 brand identity projects for professional portfolio display.	Focus on "Process Documentation" — showing the sketches, grids, and iterations.
Core Deliverable Link	Month 3 Portfolio Case Study	Confirms ability to present brand identity work in a digital/physical portfolio.

III. Resources

Item	Details
Presentation/Slides	Showcasing Brand Identity in a Digital Portfolio.
Handout/Worksheet	Portfolio Presentation Checklist.
Technology/Tools	Behance, Adobe Portfolio, Figma.
AI Tool Prompt	"Write a professional project description for a brand identity design case study."
Pre-Reading/Prep	Best Graphic Design Portfolios (AIGA); Case Study Writing Guide.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"Good work is invisible if it isn't presented well."
Review	2 min	Recap Month 3: From Day 1 strategy to Day 18 Brand Guidelines. Today is about making that journey visible and compelling.
Agenda & SLO	2 min	Goal: Selecting the "Hero" projects and writing the project narratives.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
-------	------	--------------------------	---------------------------

Hook & Context	10 min	The "Case Study" Structure: Context, Challenge, Solution, and Result.	Show how to use grid overlays to prove technical skill.
I Do (Demo)	10 min	Use AI to draft project summaries; then peer-review for clarity and tone.	Help students highlight their specific technical skills (e.g., "Mastered logo grid construction").
We Do	10 min	Audit: Are the images high-res? Is the typography in the case study consistent with the brand work?	Ensure the portfolio itself is a testament to their design skill.
Critical Analysis & Assessment	10 min	Assemble the "Brand Identity" section of the portfolio.	Ensure mockups look consistent (lighting/shadows) across the project.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection		Group discussion: How does seeing your work in a case study change your view of it?
Q&A	2 min	Address questions regarding physical vs. digital portfolio formats.
Wrap-up	1 min	Summarize: Your portfolio is your most important brand application.
Homework/Next Session	2 min	Introduce Day 20: Monthly Final Challenge (Complete Brand Identity System Presentation); bring all Month 3 work.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of project descriptions and narrative flow.	Current Session SLO	

Summative	Quality and organization of the Month 3 portfolio section.	Brand Identity System	
Soft Skill Gate	Ability to narrate a design process clearly.	TLO (Professional Foundations)	

Day 20: Monthly Final Challenge (Complete Brand Identity System Presentation)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 3 — Branding & Visual Identity Design	The cumulative "Final Boss" session for Month 3.
Module/Week	Week 4: Brand Guidelines & Portfolio	Focus: Multi-touchpoint brand identity system execution and final presentation.
Session Title	Day 20: Monthly Final Challenge (Complete Brand Identity System Presentation)	Set up a "Brand Launch" environment for student final presentations.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 20, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Demonstrate complete brand identity design proficiency through a cohesive, professionally presented system.	Evaluate the holistic quality of the student's month-long brand identity design process.
Session Learning Objective (SLO)	Students will present their complete Brand Identity System — strategy, logo, typography, color,	Final check for brand consistency and strategic

	applications, guidelines, and portfolio case study — in a simulated client final presentation.	alignment across the complete system.
Core Deliverable Link	Integrated Brand Identity System Portfolio	The ultimate deliverable for Month 3 certification.

III. Resources

Item	Details
Presentation/Slides	Monthly Challenge: The Integrated Brand Identity System.
Handout/Worksheet	Final Technical Audit Sheet.
Technology/Tools	Figma, Behance, Adobe Portfolio, PDF Compiler.
AI Tool Prompt	"Review my Brand Identity System presentation for visual consistency and identify any brand drift."
Pre-Reading/Prep	Review Month 3 Instructor Feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"Today, your individual pieces become a complete brand story."
Review	2 min	Recap Month 3 milestones: Strategy & Research, Logo & Mark, Color & Applications, Guidelines & Portfolio.
Agenda & SLO	2 min	Final check: Does every element of the Brand Identity System tell one coherent brand story?

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
-------	------	--------------------------	---------------------------

I Do (Demo)	10 min	Demonstrate a final presentation structure: Open with strategy, show the system, end with mockups and guidelines.	Model confident, articulate brand presentation language.
We Do	10 min	Full brand presentations: Each student presents their complete Brand Identity System.	Panel critique: Instructor + 2 peers evaluate against the Brand Identity Rubric.
Critical Analysis & Assessment	10 min	Portfolio Showcase: Final presentations submitted and displayed.	Celebrate the transition from graphic design student to brand identity designer.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection	2 min	Each student shares their biggest design breakthrough of Month 3.
Wrap-up	1 min	Celebrate Month 3 completion. Preview Month 4: UX/UI Design (Website Design).
Homework/Next Session	2 min	Rest and prepare for Month 4: UX/UI Design (Website Design). Review the Month 4 brief.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Final presentation delivery and strategic articulation.	Current Session SLO	
Summative	Complete and professional Brand Identity System submission.	Brand Identity System	

Soft Skill Gate	Professional presentation composure and strategic brand articulation.	TLO (Professional Foundations)	
-----------------	---	--------------------------------	--

Month 4 — UX/UI Design (Website Design)

Day 1: Introduction to Graphic Design & Visual Literacy

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 4 — UX/UI Design (Website Design)	Ensure students understand the shift from brand aesthetics to user-centered design thinking.
Module/Week	Week 1: UX Research & Strategy	Focus: Establishing the UX mindset and the design thinking framework.
Session Title	Day 1: Introduction to UX/UI & the Double Diamond	Prepare a poorly designed website for the opening heuristic analysis.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 1, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
-------	-------	---------------------

Terminal Learning Outcome (TLO) Link	Understand UX/UI design principles and the design thinking process.	Link session back to the capstone Website Redesign project.
Session Learning Objective (SLO)	Students will define UX vs. UI, explain the Double Diamond framework, and analyze a real-world website using Nielsen's 10 Usability Heuristics.	Focus on critical evaluation skills — the ability to diagnose UX problems, not just describe them.
Core Deliverable Link	UX Heuristic Evaluation Report	First analytical deliverable — establishing critical UX evaluation skills.

III. Resources

Item	Details
Presentation/Slides	UX vs. UI: The Critical Distinction; The Double Diamond Framework.
Handout/Worksheet	Nielsen's 10 Usability Heuristics Reference Sheet.
Technology/Tools	Figma, ChatGPT, Maze (free tier).
AI Tool Prompt	"Evaluate the UX of [website URL] using Nielsen's 10 Usability Heuristics. Identify the top 3 usability issues and suggest improvements."
Pre-Reading/Prep	Nielsen Norman Group: UX Basics; Don't Make Me Think — Steve Krug (Chapter 1).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Open a poorly designed e-commerce website. Ask: "What would make you leave this site in the first 10 seconds?"
Review	2 min	Overview of the Month 4 program structure and the capstone Website Redesign project.

Agenda & SLO	2 min	Define UX and UI, introduce the Double Diamond, and set up the heuristic evaluation framework.
--------------	-------	--

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define UX (the experience) vs. UI (the interface). Use the "Building vs. Facade" analogy.	Ask: "Can something look beautiful and still be terrible UX? Give me an example."
I Do (Demo)	10 min	Live demo: Conduct a heuristic evaluation of a real website using ChatGPT and the Nielsen 10 heuristics checklist.	Show how to document findings: Issue, Heuristic Violated, Severity, Recommendation.
We Do	10 min	Workshop: Students conduct a heuristic evaluation of an assigned website.	Circulate: Ensure students are citing specific heuristics, not just general complaints.
Critical Analysis & Assessment	10 min	Share findings: What is the most critical UX failure? What is the easiest quick win?	Connect to capstone: Students will redesign a site using UX principles throughout Month 4.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Clarify heuristic evaluation methodology.
Wrap-up	1 min	Recap: UX design starts with ruthless evaluation of existing experiences.
Homework/Next Session	2 min	Finalize Heuristic Evaluation Report; select a website for the Month 4 capstone redesign project.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Heuristic Evaluation Report submitted.	Current Session SLO	
Summative	Evaluation findings will inform the capstone Website Redesign.	Website Redesign Project	
Soft Skill Gate	Critical thinking and evidence-based UX evaluation.	TLO 1 (Professional Foundations)	

Day 2: User Research — Interviews & Surveys

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 4 — UX/UI Design (Website Design)	Ensure students have selected their capstone website before the session.
Module/Week	Week 1: UX Research & Strategy	Focus: Conducting qualitative user research to uncover real user needs.
Session Title	Day 2: User Research — Interviews & Surveys	Prepare a sample interview script for the live demo.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 2, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Conduct and synthesize qualitative user research.	Link session back to the "Brand Identity Pack" capstone goal.

Session Learning Objective (SLO)	Students will design and conduct 2 user interviews, synthesize findings into affinity clusters, and identify 3 core user needs for the capstone website project.	Focus on open-ended questioning — prevent students from leading the participant toward a predetermined answer.
Core Deliverable Link	User Research Report	Qualitative research foundation for the Website Redesign capstone.

III. Resources

Item	Details
Presentation/Slides	Research Methods: Interviews, Surveys, and Observation.
Handout/Worksheet	User Interview Script Template; Affinity Mapping Template.
Technology/Tools	Figma (FigJam), Google Forms, ChatGPT.
AI Tool Prompt	"Generate 10 open-ended user interview questions for a [website type] targeting [audience]. Focus on uncovering frustrations, goals, and mental models."
Pre-Reading/Prep	Just Enough Research — Erika Hall (excerpts); NNGroup: How to Conduct User Interviews.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Share an example of a product designed without user research that failed. Ask: "What did they assume vs. what users actually needed?"
Review	2 min	Recap Day 1: Heuristic evaluation findings and their connection to real user needs.
Agenda & SLO	2 min	Define the session: Designing and conducting qualitative user interviews to uncover real user needs.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define qualitative vs. quantitative research. Introduce interview techniques: open-ended questions, the 5 Whys, avoiding leading questions.	Use the iceberg model: "What users say" vs. "what they do" vs. "what they feel."
I Do (Demo)	10 min	Live demo: Use ChatGPT to generate an interview script, then role-play a user interview with a student volunteer.	Show how to take notes that capture quotes, behaviors, and emotional signals.
We Do	10 min	Workshop: Students pair up and conduct 2-minute practice interviews using AI-generated scripts.	Circulate: Are students probing deeper with follow-up questions, or accepting surface answers?
Critical Analysis & Assessment	10 min	Affinity mapping exercise: Cluster interview findings to identify patterns and core user needs.	Connect to capstone: These user needs will drive the sitemap and information architecture.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address questions on interview methodology and affinity mapping.
Wrap-up	1 min	Recap: Users always tell you what they want — if you know how to listen.
Homework/Next Session	2 min	Complete 2 real user interviews; finalize User Research Report for Day 3.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: User Research Report and affinity map submitted.	Current Session SLO	
Summative	Research findings feed directly into the Website Redesign capstone.	Website Redesign Project	
Soft Skill Gate	Empathy and active listening during user interviews.	TLO (Professional Foundations)	

Day 3: User Personas & Journey Mapping

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 4 — UX/UI Design (Website Design)	Ensure students have completed their user interviews before the session.
Module/Week	Week 1: UX Research & Strategy	Focus: Synthesizing user research into actionable personas and journey maps.
Session Title	Day 3: User Personas & Journey Mapping	Prepare Figma persona and journey map templates for the workshop.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 3, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Synthesize user research into actionable personas and journey maps.	Ensure personas are grounded in research data, not assumptions.
Session Learning Objective (SLO)	Students will create 2 data-driven user personas and map a complete user journey (Awareness to Conversion) for the capstone website project.	Focus on the journey map's emotional layer — where do users feel frustrated, confused, or delighted?
Core Deliverable Link	User Personas & Journey Maps	Core UX strategy documents for the Website Redesign capstone.

III. Resources

Item	Details
Presentation/Slides	From Research to Persona; Journey Mapping Anatomy.
Handout/Worksheet	Persona Template (Figma); Journey Map Template (Figma).
Technology/Tools	Figma, FigJam, ChatGPT.
AI Tool Prompt	"Based on these user research insights: [paste insights], create 2 detailed user personas including demographics, goals, frustrations, behaviors, and tech habits."
Pre-Reading/Prep	NNGroup: Personas 101; Customer Journey Mapping (Adaptive Path).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show two websites with identical features — one designed for a generic user, one for a specific persona. Ask: "Which one feels like it was made for you?"

Review	2 min	Recap Day 2: User research findings and affinity clusters.
Agenda & SLO	2 min	Define the session goal: Transforming research data into the strategic design tools of personas and journey maps.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define persona components: Name, demographics, goals, frustrations, tech profile, quote. Discuss the difference between data-driven personas and fictional archetypes.	Emphasize: "A persona is not a stock photo with a name. It is a distillation of real user data."
I Do (Demo)	10 min	Live demo: Use ChatGPT to synthesize research notes into a persona, then build a visual persona card in Figma.	Show how to build a journey map: stages, touchpoints, emotions, and opportunities.
We Do	10 min	Workshop: Students create 2 user personas and begin their journey maps.	Circulate: Are the personas grounded in research, or are students making assumptions?
Critical Analysis & Assessment	10 min	Peer review: Does the journey map reveal a clear opportunity for the website redesign?	Connect to capstone: Personas will govern all sitemap and wireframe decisions.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address questions on persona development and journey mapping.
Wrap-up	1 min	Recap: Design for a specific someone, not an imaginary everyone.
Homework/Next Session	2 min	Finalize User Personas and Journey Maps; prepare for Day 4 Practice + Support Day.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: User Personas and Journey Map submitted.	Current Session SLO	
Summative	Personas and journey maps inform all capstone design decisions.	Website Redesign Project	
Soft Skill Gate	Empathy for the user experience demonstrated in persona work.	TLO (Professional Foundations)	

Day 4: Practice + Support Day

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 4 — UX/UI Design (Website Design)	Ensure all students have access to Days 1–3 research

		deliverables and instructor feedback.
Module/Week	Week 1: UX Research & Strategy	Focus: Buffer and studio time for consolidation of Week 1 UX research deliverables.
Session Title	Day 4: Practice + Support Day	Prepare the studio environment for peer critique circles.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 4, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Consolidate UX research deliverables for the capstone project.	Track student progress against Week 1 research deliverables.
Session Learning Objective (SLO)	Students will refine their Heuristic Evaluation, User Research Report, Personas, and Journey Maps based on instructor and peer feedback.	Identify students falling behind for targeted intervention.
Core Deliverable Link	Week 1 Deliverables: Heuristic Evaluation, User Research, Personas, Journey Map	Confirm all students are caught up on all four Week 1 UX research items.

III. Resources

Item	Details
Presentation/Slides	N/A (Studio Day)
Handout/Worksheet	UX Research Quality Audit Checklist.
Technology/Tools	Figma, FigJam, ChatGPT.

AI Tool Prompt	"Review my user persona for this website project and identify any assumptions not grounded in the research data: [paste research summary]."
Pre-Reading/Prep	Review instructor feedback from Days 1–3.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"In a real agency, your UX research brief is reviewed before any design work begins. Let's make yours bulletproof."
Review	2 min	Overview of the 4 Week 1 deliverables and their strategic role in the capstone.
Agenda & SLO	2 min	Goals: Refine, support, critique, and catch up on Week 1 UX research deliverables.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Outline studio expectations: refinement, research quality audit, and peer support.	Set constructive critique norms referencing UX principles.
I Do (Demo)	10 min	Demonstrate how to self-critique a persona against the research data: Is every attribute justified?	Model the "Research Check" process: trace every persona attribute back to a specific interview finding.
We Do (Guided)	10 min	Peer critique circles: Review each other's personas and journey maps for research grounding.	Identify learners who need targeted support on research synthesis.
Critical Analysis & Assessment	10 min	Individual refinement of Week 1 deliverables.	Confirm all Figma and FigJam files are exported and organized.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address final roadblocks for Week 1 completion.
Wrap-up	1 min	Confirm goal: All students are caught up on Week 1 deliverables.
Homework/Next Session	2 min	Finalize all Week 1 deliverables; prepare for Day 5 Weekly Studio Challenge.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of refined UX research deliverables.	Current Session SLO	
Summative	Completion of Week 1 deliverables.	iden	
Soft Skill Gate	Engagement in peer critique and research audit.	TLO (Professional Foundations)	

Day 5: Weekly Studio Challenge (UX Research Package)

I. Program Overview & Philosophy

Field	Value	Customization Notes
-------	-------	---------------------

Program Title	Month 4 — UX/UI Design (Website Design)	Ensure students have finalized all Week 1 deliverables before the challenge.
Module/Week	Week 1: UX Research & Strategy	Focus: Weekly Studio Challenge — UX Research Package Discovery Presentation.
Session Title	Day 5: Weekly Studio Challenge (UX Research Package)	Prepare the Discovery Presentation Rubric.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	
Date	Day 5, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Present a complete UX Research Package for peer and instructor review.	Link challenge to the cumulative skills of Week 1.
Session Learning Objective (SLO)	Students will assemble and present a complete UX Research Package (Heuristic Evaluation + Personas + Journey Map) as a simulated client discovery presentation.	Ensure students can defend every research insight with specific evidence.
Core Deliverable Link	UX Research Package	Final Week 1 studio challenge submission.

III. Resources

Item	Details
Presentation/Slides	
Handout/Worksheet	Discovery Presentation Rubric.
Technology/Tools	Figma, FigJam, ChatGPT.

AI Tool Prompt	"Simulate a client asking tough questions after my UX discovery presentation. What would they push back on about my research methodology?"
Pre-Reading/Prep	Review Week 1 research deliverables and instructor feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Brief scenario: "Your client wants to understand the user before approving the design brief. You have 5 minutes to present your discovery findings."
Review	2 min	Recap Week 1 core UX research skills: heuristics, interviews, personas, journey mapping.
Agenda & SLO	2 min	Define the challenge: Present the complete UX Research Package as a discovery deck.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Assign the challenge: Assemble the UX Research Package and prepare a 5-minute discovery presentation.	Distribute the presentation rubric.
I Do (Demo)	10 min	Demonstrate how to structure a discovery presentation: Problem, Research, Insights, Opportunities.	Model confident, clear UX presentation language.
We Do	10 min	Workshop: Students finalize packages and rehearse presentations.	Targeted support for students behind on persona or journey map work.
Critical Analysis & Assessment	10 min	Peer presentations: Does the research reveal a clear design opportunity?	Ensure students can defend every insight with specific research evidence.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address specific presentation questions.
Wrap-up	1 min	Summarize Week 1 accomplishments.
Homework/Next Session	2 min	Finalize UX Research Package; preview Week 2: Information Architecture & Wireframing.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Submission of UX Research Package.	Current Session SLO	
Summative	Completion of Week 1 deliverables.	Website Redesign Project	
Soft Skill Gate	Professional discovery presentation delivery.	TLO (Professional Foundations)	

Day 6: Information Architecture & Sitemap Design

I. Program Overview & Philosophy

Field	Value	Customization Notes
-------	-------	---------------------

Program Title	Month 4 — UX/UI Design (Website Design)	Ensure students have their user personas and journey maps ready before the session.
Module/Week	Week 2: Information Architecture & Wireframing	Focus: Designing a user-centered information architecture and sitemap.
Session Title	Day 6: Information Architecture & Sitemap Design	Prepare the Card Sorting Exercise Cards and FigJam Sitemap Template.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 6, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Design a clear information architecture for a website.	Ensure the sitemap is organized by user goals, not business org chart.
Session Learning Objective (SLO)	Students will create a complete sitemap for the capstone website using card sorting results and user mental models, applying IA best practices.	Focus on the user's mental model — organize content the way users think, not the way the business is structured.
Core Deliverable Link	Website Sitemap	The structural blueprint for the capstone Website Redesign.

III. Resources

Item	Details
Presentation/Slides	Information Architecture Fundamentals; Card Sorting Methods.
Handout/Worksheet	Card Sorting Exercise Cards; Sitemap Template (FigJam).
Technology/Tools	FigJam, Optimal Workshop (free), ChatGPT.

AI Tool Prompt	"Suggest a logical sitemap structure for a [website type] that serves [persona description]. Organize by user goals, not business org chart."
Pre-Reading/Prep	Information Architecture for the Web — Peter Morville (excerpts); Card Sorting Guide (NNGroup).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show two websites: one with intuitive navigation (user-centered IA) and one that mirrors the internal org chart. Ask: "Where did you get lost?"
Review	2 min	Recap Week 1: Persona goals and journey maps. The sitemap must serve these specific user needs.
Agenda & SLO	2 min	Define the session: Building a user-centered information architecture using card sorting and mental model analysis.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define IA components: Sitemap, navigation, categories, content hierarchy. Show how bad IA causes abandonment.	Use the "Trunk Test": Close your eyes, open to any page. Can you tell where you are?
I Do (Demo)	10 min	Live demo: Conduct a card sort exercise in FigJam using AI-generated content categories.	Show how to read card sorting results to identify the user's mental model.
We Do (Guided)	10 min	Workshop: Students conduct a card sort and draft their capstone website sitemap.	Circulate: Is the sitemap organized by user goals or by the client's internal structure?
Critical Analysis &	10 min	Peer review: Can a stranger navigate the sitemap and find information intuitively?	Connect to Week 2: This sitemap will drive all wireframe decisions.

Assessment			
------------	--	--	--

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address sitemap structure and content hierarchy questions.
Wrap-up	1 min	Recap: The sitemap is the user's roadmap — design it from their perspective. Summarize the key takeaway (Color sets the brand voice).
Homework/Next Session	2 min	Finalize Website Sitemap; prepare for Day 7: Wireframing Core Pages.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Website Sitemap submitted in FigJam.	Current Session SLO	
Summative	Sitemap feeds directly into the wireframe and prototype phases.	Website Redesign Project	
Soft Skill Gate	User-centered thinking in sitemap construction.	TLO (Professional Foundations)	

Day 7: Wireframing Core Pages

I. Program Overview & Philosophy

Field	Value	Customization Notes
-------	-------	---------------------

Program Title	Month 4 — UX/UI Design (Website Design)	Ensure students have their sitemap finalized before the session.
Module/Week	Week 2: Information Architecture & Wireframing	Focus: Creating low-fidelity wireframes for core website pages.
Session Title	Day 7: Wireframing Core Pages	Prepare the Figma Wireframe Component Library for student access.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	
Date	Day 7, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Create low-fidelity wireframes for core website pages.	Focus on structure and content hierarchy — no colors, fonts, or visual design at this stage.
Session Learning Objective (SLO)	Students will produce low-fidelity wireframes for 5 core pages (Homepage, About, Services/Products, Contact, and one secondary page) in Figma.	Focus on content hierarchy and user flow, not visual design.
Core Deliverable Link	Low-Fidelity Wireframes (5 pages)	Core structural wireframes for the Website Redesign capstone.

III. Resources

Item	Details
Presentation/Slides	Wireframing Principles: From Skeleton to Interface.
Handout/Worksheet	Wireframe Component Library (Figma).
Technology/Tools	Figma.

AI Tool Prompt	"Suggest the optimal content hierarchy and component order for a [page type] page on a [website type] website targeting [persona name]."
Pre-Reading/Prep	Wireframing Guide (Figma Blog); UX Wireframes 101 (Interaction Design Foundation).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a lo-fi wireframe vs. a finished UI. Ask: "At what point in this process can you catch a navigation problem before spending 40 hours on design?"
Review	2 min	Recap Day 6: Sitemap structure. Wireframes are the spatial translation of the sitemap.
Agenda & SLO	2 min	Introduce wireframing as structural design — removing all visual decoration to expose the architecture.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define the wireframe spectrum: Lo-fi (structure) → Mid-fi (layout) → Hi-fi (visual). Discuss when to use each.	Emphasize: "At the wireframe stage, no colors, no real fonts, no imagery. Only structure and hierarchy."
I Do (Demo)	10 min	Live demo: Wireframe a Homepage in Figma from scratch using a component library.	Show how to use Figma's wireframe kit and sticky-note pattern to test layout logic.
We Do	10 min	Workshop: Students wireframe their 5 core pages using the Figma component library.	Circulate: Are students focusing on content hierarchy and user flow, not visual design?

Critical Analysis & Assessment	10 min	Wireframe review: Walk through the homepage wireframe as if you are the persona. Does the content hierarchy serve the primary user goal?	Connect to Week 3: These wireframes will become mid-fidelity UI designs.
--------------------------------	--------	--	--

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address Figma wireframing tool questions.
Wrap-up	1 min	Recap: A well-structured wireframe needs no visual design to be understood.
Homework/Next Session	2 min	Complete wireframes for all 5 pages; prepare for Day 8: User Flow & Interaction Design.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: 5-page lo-fi wireframe set submitted.	Current Session SLO	
Summative	Wireframes serve as the structural foundation for the UI design phase.	Website Redesign Project	
Soft Skill Gate	Structural thinking without visual distraction.	TLO (Professional Foundations)	

Day 8: User Flow & Interaction Design

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 4 — UX/UI Design (Website Design)	Ensure students have completed their 5-page wireframe set before the session.
Module/Week	Week 2: Information Architecture & Wireframing	Focus: Mapping user flows and defining interaction patterns for key website tasks.
Session Title	Day 8: User Flow & Interaction Design	Prepare the FigJam User Flow Template and Wireframe Annotation Guide.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 8, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Map user flows and define interaction patterns for key website tasks.	Ensure user flows reveal friction points before the visual design phase begins.
Session Learning Objective (SLO)	Students will map 2 primary user flows (e.g., Homepage to Purchase, Homepage to Contact) and annotate interaction design decisions in their wireframes.	Focus on annotation specificity — annotations must be clear enough for a developer to build from.
Core Deliverable Link	User Flow Maps & Annotated Wireframes	Interaction design layer for the Website Redesign capstone.

III. Resources

Item	Details
Presentation/Slides	User Flows: From Touchpoint to Conversion; Interaction Design Principles.
Handout/Worksheet	User Flow Template (FigJam); Wireframe Annotation Guide.
Technology/Tools	FigJam, Figma.
AI Tool Prompt	"Map out the optimal user flow for a [user type] trying to [complete task] on a [website type] website. Identify the key decision points and potential drop-off moments."
Pre-Reading/Prep	Interaction Design Basics (IxDF); NNGroup: User Flow Mapping.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Walk through a real checkout flow and identify every friction point. Ask: "What is the one step most people abandon — and why?"
Review	2 min	Recap Day 7: 5-page wireframe structure and content hierarchy decisions.
Agenda & SLO	2 min	Define the session: Mapping the paths users take through the site and the micro-interactions that guide them.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define user flows: Happy path, alternative paths, error states. Show how flows reveal hidden friction points.	Show real e-commerce flow analytics: "At this step, 60% of users left. Why?"

I Do (Demo)	10 min	Live demo: Map a purchase user flow in FigJam and annotate the wireframes with interaction triggers and states.	Show how to document: hover states, click targets, loading states, error messages.
We Do	10 min	Workshop: Students map their 2 primary user flows and begin annotating wireframes.	Circulate: Are annotations specific enough to guide a developer?
Critical Analysis & Assessment	10 min	User flow walk-through: Navigate the mapped flow as the persona. Where would you get confused?	Connect to prototype phase: The user flow becomes the prototype navigation map.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address user flow and annotation questions.
Wrap-up	1 min	Recap: A great UX is an invisible one — the user never has to think about navigation.
Homework/Next Session	2 min	Finalize User Flow Maps and Annotated Wireframes; prepare for Day 9 Wireframe Refinement & Usability Feedback.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: User Flow Maps and Annotated Wireframes submitted.	Current Session SLO	
Summative	Flows and annotations feed directly into the prototype phase.	Website Redesign Project	

Soft Skill Gate	Empathy for the user navigation experience.	TLO (Professional Foundations)	
-----------------	---	--------------------------------	--

Day 9: Wireframe Refinement & Usability Feedback

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 4 — UX/UI Design (Website Design)	Ensure all students have completed their wireframes and user flows before this session.
Module/Week	Week 2: Information Architecture & Wireframing	Focus: Buffer and studio time for wireframe refinement based on usability feedback.
Session Title	Day 9: Wireframe Refinement & Usability Feedback	Prepare the Guerrilla Usability Test Script and Usability Issue Log.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 9, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Refine wireframes based on usability feedback.	Ensure revisions are driven by test evidence, not personal preference.
Session Learning Objective (SLO)	Students will conduct a guerrilla usability test on their wireframes, document 3 usability issues, and implement revisions based on findings.	Focus on the Think Aloud protocol — students must observe silently without correcting or guiding the participant.

Core Deliverable Link	Refined Wireframes with Usability Notes	Usability-tested and refined wireframe set for the capstone.
-----------------------	---	--

III. Resources

Item	Details
Presentation/Slides	N/A (Studio Day with Usability Testing Focus)
Handout/Worksheet	Guerrilla Usability Test Script; Usability Issue Log.
Technology/Tools	Figma, Maze (free).
AI Tool Prompt	"Based on these usability test findings: [paste findings], suggest the top 3 wireframe changes that would most improve task completion rates."
Pre-Reading/Prep	Rocket Surgery Made Easy — Steve Krug (excerpts); NNGroup: Guerrilla Usability Testing.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"The only way to know if your design works is to watch someone use it. And the first time you do this, prepare to be humbled."
Review	2 min	Recap Days 7–8: Wireframe structure and user flows. Today we test whether they work.
Agenda & SLO	2 min	Define the session: Conducting real usability tests and implementing data-driven revisions.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
-------	------	--------------------------	---------------------------

Hook & Context	10 min	Define guerrilla usability testing: Quick, informal, high-value. Show how to moderate a test without leading the participant.	Introduce the Think Aloud protocol: "Tell me what you are thinking as you navigate."
I Do (Demo)	10 min	Demonstrate how to run a 5-minute guerrilla test on a classmate's wireframe using Figma presentation mode.	Show how to document findings without interpreting in the moment — capture, analyze later.
We Do	10 min	Students conduct paired usability tests on each other's wireframes using the Think Aloud protocol.	Ensure observers are silent during tests — no hints, no explanations.
Critical Analysis & Assessment	10 min	Issue prioritization: Using severity ratings to decide which usability problems to fix first. Students implement the top 2 wireframe revisions.	Confirm all revised wireframes are updated before the challenge.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address usability testing methodology and revision prioritization.
Wrap-up	1 min	Recap: Design is only as good as the evidence that tests it.
Homework/Next Session	2 min	Finalize refined wireframes; prepare for Day 10 Weekly Studio Challenge (IA & Wireframe Presentation).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Usability Issue Log and revised wireframes submitted.	Current Session SLO	

Summative	Refined wireframes serve as the foundation for UI design.	Website Redesign Project	
Soft Skill Gate	Openness to critique and willingness to revise based on evidence.	TLO (Professional Foundations)	

Day 10: Weekly Studio Challenge (IA & Wireframe Presentation)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 4 — UX/UI Design (Website Design)	Ensure students have finalized all Week 2 deliverables before the challenge.
Module/Week	Week 2: Information Architecture & Wireframing	Focus: Weekly Studio Challenge — IA & Wireframe Package Presentation.
Session Title	Day 10: Weekly Studio Challenge (IA & Wireframe Presentation)	Prepare the UX Design Review Rubric.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 10, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Present the complete Information Architecture and Wireframe Package.	Link challenge to the application of Week 2 concepts.
Session Learning Objective (SLO)	Students will present their complete Week 2 deliverables — Sitemap, User Flows, Wireframes, and	Ensure every structural decision is defended with user research evidence.

	Usability Findings — in a simulated UX design review.	
Core Deliverable Link	IA & Wireframe Package	Complete Week 2 studio challenge submission.

III. Resources

Item	Details
Presentation/Slides	
Handout/Worksheet	UX Design Review Rubric.
Technology/Tools	Figma, FigJam.
AI Tool Prompt	"Act as a UX director reviewing my wireframe package. Identify the top 3 structural improvements I should make before moving into visual design."
Pre-Reading/Prep	Review Week 2 deliverables and instructor feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Brief scenario: "Your UX research is approved. Now you have one meeting to present the architecture and wireframes before the visual design phase begins."
Review	2 min	Recap Week 2 core deliverables: Sitemap, Wireframes, User Flows, Usability Testing.
Agenda & SLO	2 min	Define the challenge: Present a complete IA and Wireframe Package in a UX design review format.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
-------	------	--------------------------	---------------------------

Hook & Context	10 min	Assign the challenge: Structure and present the IA & Wireframe Package.	Distribute the UX Design Review Rubric.
I Do (Demo)	10 min	Demonstrate a professional wireframe presentation: Start with the user problem, show the sitemap, walk through key user flows, present wireframes.	Model using annotations to explain design decisions during a live review.
We Do	10 min	Workshop: Students finalize packages and prepare presentations.	Targeted support for students behind on wireframe completion.
Critical Analysis & Assessment	10 min	Peer design reviews: Does the IA serve the persona's primary goals?	Ensure students can defend structural decisions with user research evidence.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address specific review questions.
Wrap-up	1 min	Summarize Week 2 accomplishments.
Homework/Next Session	2 min	Finalize IA & Wireframe Package; preview Week 3: UI Design & Visual Interface.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Submission of IA & Wireframe Package.	Current Session SLO	

Summative	Completion of Week 2 deliverables.	Website Redesign Project	
Soft Skill Gate	Professional UX design review delivery.	TLO (Professional Foundations)	

Day 11: UI Design System Setup

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 4 — UX/UI Design (Website Design)	Ensure students have their wireframes finalized and the brand color/type system from Month 3 available.
Module/Week	Week 3: UI Design & Visual Interface	Focus: Establishing a UI Design System in Figma to govern all visual design work.
Session Title	Day 11: UI Design System Setup	Verify student access to Figma and the UI Design System template.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 11, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Apply UI design principles to create a professional visual interface.	Ensure the design system is the single source of truth for all visual decisions.

Session Learning Objective (SLO)	Students will establish a UI Design System (colors, typography, spacing, components) in Figma and apply it to a Homepage mid-fidelity design.	Focus on system thinking — one change to a component must update everywhere.
Core Deliverable Link	UI Design System + Homepage Mid-Fi	Design system foundation for the Website Redesign capstone.

III. Required Resources & Tech

Item	Details
Presentation/Slides	UI Design Systems: Why Consistency Scales; Figma Styles & Components.
Handout/Worksheet	UI Design System Setup Checklist.
Technology/Tools	Figma.
AI Tool Prompt	"Suggest a UI design system color palette, type scale, and component set for a [website type] targeting [audience description]. Keep it clean and accessible."
Pre-Reading/Prep	Figma Design System Guide; Design Tokens Explained (Smashing Magazine).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a website before and after a design system is applied. Ask: "What changed? What stayed the same? Why does this matter at scale?"
Review	2 min	Recap Week 2: Wireframes and sitemap. Today we add the visual layer on top of the proven structure.
Agenda & SLO	2 min	Introduce UI design systems and set up the Figma component library that will govern all Week 3 work.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define a design system: Color styles, text styles, spacing tokens, component library. Show the Ant Design or Material Design system as references.	Use Socratic Method: "How is a brand more than just a logo?"
I Do (Demo)	10 min	Live demo: Set up a Figma design system (color styles, text styles, button components) from the brand palette and typography.	Show how to use Figma auto layout for responsive component construction.
We Do	10 min	Workshop: Students set up their UI design system and apply it to a mid-fidelity Homepage design.	Circulate: Check for consistent spacing, correct style usage, and component application.
Critical Analysis & Assessment	10 min	Design system audit: Are all styles published? Are components responsive? Does the Homepage mid-fi feel like the brand?	Connect to Week 3: This design system will be used for all remaining UI page designs.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address Figma styles, components, and auto layout questions.
Wrap-up	1 min	Recap: The design system is not decoration — it is infrastructure.
Homework/Next Session	2 min	Finalize UI Design System and Homepage mid-fi; prepare for Day 12: Core Page UI Design.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: UI Design System and Homepage mid-fi submitted.	Current Session SLO	
Summative	Design system governs all UI design for the capstone Website Redesign.	Website Redesign Project	
Soft Skill Gate	Systematic thinking and attention to component consistency.	TLO (Professional Foundations)	

Day 12: Core Page UI Design (High Fidelity)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 4 — UX/UI Design (Website Design)	Ensure students have their UI Design System finalized before this session.

Module/Week	Week 3: UI Design & Visual Interface	Focus: Designing high-fidelity UI screens for core website pages.
Session Title	Day 12: Core Page UI Design (High Fidelity)	Prepare Unsplash access and AI copy generation prompts for the workshop.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 12, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Design high-fidelity UI screens for core website pages.	Ensure design system styles are applied consistently across every page.
Session Learning Objective (SLO)	Students will design 4 additional high-fidelity UI pages (About, Services/Products, Contact, and one secondary page) applying the established design system.	Focus on visual hierarchy — every page must have a clear primary action above the fold.
Core Deliverable Link	High-Fidelity UI Designs (5 pages)	Complete page designs for the Website Redesign capstone.

III. Required Resources & Tech

Item	Details
Presentation/Slides	From Mid-Fi to Hi-Fi: Adding Imagery, Micro-copy, and Motion Intent.
Handout/Worksheet	Hi-Fi Page Design Checklist.
Technology/Tools	Figma, Unsplash (imagery), ChatGPT (copy).
AI Tool Prompt	"Generate website copy for the About Us page of a [brand name] with the following brand voice: [description]. Include headline, subheadline, and 2 paragraphs."
Pre-Reading/Prep	UI Design Trends (Awwwards); Typography in Web UI (Smashing Magazine).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show 3 websites with identical structure but wildly different visual execution. Ask: "Same wireframe. Different visual design. Completely different experience. Why?"
Review	2 min	Recap Day 11: Design system setup. Today we apply it at high fidelity across all core pages.
Agenda & SLO	2 min	Define the session: Building high-fidelity UI designs for all core website pages using the established design system.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define hi-fi UI design: Real copy, real imagery, brand colors and typography, accessibility compliance.	Show the checklist for hi-fi: "Every pixel has a reason. Every decision references the design system."
I Do (Demo)	10 min	Live demo: Design the About page hi-fi in Figma using design system components, Unsplash imagery, and AI-generated copy.	Show how to maintain visual hierarchy across multiple pages in a multi-page Figma file.
We Do	10 min	Workshop: Students design their remaining 4 hi-fi pages.	Circulate: Are design system styles being applied consistently? Is accessibility being maintained?
Critical Analysis & Assessment	10 min	Page-by-page review: Do all 5 pages feel like the same website?	Accessibility check: Run a contrast check on the primary call-to-action elements.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address hi-fi design and Figma technical questions.
Wrap-up	1 min	Recap: Hi-fi is where the design system pays for itself.
Homework/Next Session	2 min	Complete all 5 hi-fi page designs; prepare for Day 13: Prototype & Navigation Design.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: 5-page hi-fi design set submitted.	Current Session SLO	
Summative	Hi-fi page designs form the core of the Website Redesign capstone.	Website Redesign Project	
Soft Skill Gate	Attention to visual consistency and design system discipline.	TLO (Professional Foundations)	

Day 13: Prototype Design & Interactive Navigation

I. Program Overview & Philosophy

Field	Value	Customization Notes
-------	-------	---------------------

Program Title	Month 4 — UX/UI Design (Website Design)	Focus: Building an interactive Figma prototype for the website design.
Module/Week	Week 3: UI Design & Visual Interface	Focus: Building an interactive Figma prototype for the website design.
Session Title	Day 13: Prototype Design & Interactive Navigation	Verify student access to Figma Prototype Mode.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 13, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Build an interactive Figma prototype for the website design.	Ensure the prototype covers all primary user flows mapped in Week 2.
Session Learning Objective (SLO)	Students will connect all hi-fi pages into a fully navigable Figma prototype, adding hover states, micro-interactions, and a working navigation flow.	Focus on connection logic — broken links and missing states are unprofessional in a client presentation.
Core Deliverable Link	Interactive Website Prototype (Figma)	Navigable prototype for usability testing and presentation.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Prototyping in Figma: Connections, Overlays, and Animations.
Handout/Worksheet	Prototype Connection Checklist.
Technology/Tools	Figma (Prototype Mode).
AI Tool Prompt	"Describe 5 micro-interactions I should include in a [website type] prototype to improve the perceived quality of the user experience."

Pre-Reading/Prep	Figma Prototype Tutorial (Figma Help Center); Micro-interactions — Dan Saffer (excerpts).
------------------	---

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a flat wireframe export vs. a live Figma prototype. Ask: "What does interaction reveal that static screens never can?"
Review	2 min	Recap Day 12: 5-page hi-fi design set. Today we bring it to life.
Agenda & SLO	2 min	Introduce Figma prototype mode and the principles of interaction design in website prototypes.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define prototype fidelity levels: Click-through, animated, and fully interactive. Show when each is appropriate.	Discuss: "The prototype is your most powerful user testing and client presentation tool."
I Do (Demo)	10 min	Live demo: Connect all 5 hi-fi pages in Figma prototype mode. Add hover states to buttons, an overlay navigation menu, and a CTA scroll animation.	Show how to configure presentation mode for client-ready prototype sharing.
We Do	10 min	Workshop: Students connect their hi-fi pages and add the top 5 micro-interactions.	Circulate: Check for broken connections, correct interaction triggers, and smooth navigation flow.
Critical Analysis & Assessment	10 min	Prototype walk-through: Navigate the prototype as the primary persona completing the primary user task. Where does the experience break?	Identify and fix the top 2 interaction issues before the next session.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address Figma prototype connection and animation questions.
Wrap-up	1 min	Recap: The prototype is where design becomes experience.
Homework/Next Session	2 min	Complete interactive prototype; prepare for Day 14 UI Design Studio Day.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Figma prototype link submitted.	Current Session SLO	
Summative	Prototype is used for usability testing and final capstone presentation.	Website Redesign Project	
Soft Skill Gate	Precision in connecting interactions and navigation flows.	TLO (Professional Foundations)	

Day 14: UI Design Studio Day

I. Program Overview & Philosophy

Field	Value	Customization Notes
-------	-------	---------------------

Program Title	Month 4 — UX/UI Design (Website Design)	Ensure all students have completed their hi-fi pages and prototype before this session.
Module/Week	Week 3: UI Design & Visual Interface	Focus: Buffer and studio time for UI design refinement and prototype polish.
Session Title	Day 14: UI Design Studio Day	Prepare the Design Review Rubric for peer critique circles.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 14, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Refine UI design deliverables to professional standard through critique and iteration.	Track student progress against Week 3 deliverables.
Session Learning Objective (SLO)	Students will refine their design system, hi-fi pages, and prototype based on peer and instructor feedback, ensuring visual consistency and interaction integrity.	Identify students who need targeted support on hi-fi completion or prototype connections.
Core Deliverable Link	Refined Hi-Fi Pages + Polished Prototype	Portfolio-ready UI design package.

III. Required Resources & Tech

Item	Details
Presentation/Slides	N/A (Studio Day)
Handout/Worksheet	UI Design Consistency Checklist.
Technology/Tools	Figma, Canva, Presentation tools
AI Tool Prompt	"Act as a UI design director reviewing my website design. Evaluate visual hierarchy, accessibility, consistency, and brand alignment."

Pre-Reading/Prep	Review Days 11–13 instructor feedback.
------------------	--

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"The difference between a good design and a great one is the 24 hours of refinement after you think you're done."
Review	2 min	Overview of the three Week 3 deliverables: Design System, Hi-Fi Pages, Prototype.
Agenda & SLO	2 min	Define goals: Refinement, consistency audit, prototype testing, and peer support.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Introduce the UI Consistency Checklist: Color usage, typography application, component usage, spacing.	Set peer critique norms: Every piece of feedback must reference the design system or brand brief.
I Do (Demo)	10 min	Demonstrate how to conduct a design system compliance audit on hi-fi pages: Are all components from the library? Are all colors from the style guide?	Show how to use Figma's "Select matching layers" to identify inconsistent elements.
We Do	10 min	Peer critique circles: Review each other's hi-fi pages and prototype for visual consistency.	Identify students who need targeted support on prototype connections or hi-fi completion.
Critical Analysis & Assessment	10 min	Individual refinement of hi-fi pages and prototype based on audit findings.	Confirm all Figma files are organized and prototype links are working.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address final technical questions on UI design and prototyping.
Wrap-up	1 min	Confirm goal: All students have a complete, polished hi-fi design and working prototype.
Homework/Next Session	2 min	Finalize all Week 3 deliverables; prepare for Day 15 Weekly Studio Challenge (UI Design Review).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of refined hi-fi pages and prototype.	Current Session SLO	
Summative	Completion of Week 3 deliverables.	Website Redesign Project	
Soft Skill Gate	Engagement in peer critique and design consistency audit.	TLO (Professional Foundations)	

Day 15: Weekly Studio Challenge (UI Design Review)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 4 — UX/UI Design (Website Design)	Ensure students have finalized all Week 3 deliverables before the challenge.
Module/Week	Week 3: UI Design & Visual Interface	Focus: Weekly Studio Challenge — UI Design Package Presentation.
Session Title	Day 15: Weekly Studio Challenge (UI Design Review)	Prepare the Design Review Rubric.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 15, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Present the complete UI Design Package for peer and instructor review.	Link challenge to the cumulative skills of Week 3.
Session Learning Objective (SLO)	Students will present their Design System, Hi-Fi Pages, and Interactive Prototype in a simulated design review, defending every visual decision with UX rationale.	Ensure every design decision is justified with research or design principles — not personal preference.
Core Deliverable Link	UI Design Package	Full Week 3 studio challenge submission.

III. Required Resources & Tech

Item	Details
Presentation/Slides	
Handout/Worksheet	Design Review Rubric.
Technology/Tools	Figma

AI Tool Prompt	"Act as a UI design director reviewing my website design. Evaluate the visual hierarchy, accessibility, consistency, and brand alignment of my design system."
Pre-Reading/Prep	Review Week 3 deliverables and instructor feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Brief scenario: "The client has approved the wireframes and is now seeing the visual design for the first time. This is the meeting that makes or breaks the project."
Review	2 min	Recap Week 3: Design system, hi-fi pages, and prototype.
Agenda & SLO	2 min	Define the challenge: Present the complete UI Design Package in a formal design review.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Assign the challenge: Present the UI Design Package in a structured design review format.	Distribute the Design Review Rubric.
I Do (Demo)	10 min	Demonstrate the design review format: Design system first, then page-by-page, then live prototype walk-through.	Model how to present visual decisions using UX evidence, not personal preference.
We Do	10 min	Workshop: Students prepare and rehearse their design reviews.	Targeted support for students who are behind on hi-fi or prototype.
Critical Analysis &	10 min	Peer design reviews: Does the visual design serve the user and the brand equally?	Ensure every design decision is justified with research or design principles.

Assessment			
------------	--	--	--

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address specific review and prototype questions.
Wrap-up	1 min	Summarize Week 3 accomplishments.
Homework/Next Session	2 min	Finalize UI Design Package; preview Week 4: Responsive Design, Accessibility & Portfolio.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Submission of UI Design Package.	Current Session SLO	
Summative	Completion of Week 3 deliverables.	Website Redesign Project	
Soft Skill Gate	Evidence-based design review delivery.	TLO (Professional Foundations)	

Day 16: Responsive Design & Accessibility

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 4 — UX/UI Design (Website Design)	Ensure students have their hi-fi desktop designs finalized before this session.
Module/Week	Week 4: Responsive Design, Accessibility & Portfolio	Focus: Adapting the website design for mobile breakpoints and ensuring accessibility compliance.
Session Title	Day 16: Responsive Design & Accessibility	Prepare Figma auto layout resources and the WebAIM Contrast Checker.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 16, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	adapt the website design for responsive breakpoints and WCAG 2.1 AA accessibility standards.	Ensure mobile designs respect thumb zones and touch target minimums.
Session Learning Objective (SLO)	Students will design responsive mobile versions of the Homepage and one secondary page, and conduct a WCAG 2.1 AA accessibility audit on their desktop designs.	Focus on mobile-first thinking — the hardest constraint reveals the most important content.
Core Deliverable Link	Mobile Responsive Designs + Accessibility Audit	Demonstrates full-stack UI capability for the capstone portfolio.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Responsive Design Principles; WCAG 2.1 AA Standards for Designers.
Handout/Worksheet	Responsive Breakpoint Reference Sheet; Accessibility Audit Checklist.
Technology/Tools	Figma, WebAIM Contrast Checker, Stark (Figma plugin).
AI Tool Prompt	"Describe the top 5 UX changes I should make when adapting a desktop website to mobile. Focus on navigation, content hierarchy, and touch targets."
Pre-Reading/Prep	Google Mobile-First Indexing Guide; Web Accessibility Guidelines (WCAG 2.1).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Open a non-responsive website on mobile. Ask: "How does this experience feel?" Then show a mobile-first website. "Same content. Completely different experience."
Review	2 min	Recap Week 3: Hi-fi desktop designs. Today we adapt them for the device most users actually use.
Agenda & SLO	2 min	Introduce responsive design principles and WCAG 2.1 AA accessibility standards.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define breakpoints: Mobile (375px), Tablet (768px), Desktop (1440px). Show how content stacks, navigation transforms, and touch targets resize.	Explain mobile-first design philosophy: "Design the hardest constraint first, then expand."

I Do (Demo)	10 min	Live demo: Adapt the Homepage desktop design to mobile in Figma using auto layout and responsive components. Then run a Stark accessibility audit.	Show how hamburger navigation, collapsed sections, and thumb-zone design differ from desktop.
We Do	10 min	Workshop: Students adapt their Homepage and one secondary page to mobile, then run an accessibility audit.	Circulate: Are CTAs thumb-accessible? Is navigation hidden appropriately? Do all contrast ratios pass?
Critical Analysis & Assessment	10 min	Responsive review: Test both breakpoints side-by-side. Does the brand feel consistent? Does it pass WCAG AA?	Identify the top 2 issues and revise before the next session.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address responsive design and accessibility questions.
Wrap-up	1 min	Recap: Mobile is not a compromise — it is the primary canvas. Accessibility is not optional — it is a baseline.
Homework/Next Session	2 min	Finalize mobile responsive designs and accessibility audit; prepare for Day 17: Design Handoff.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Mobile responsive designs and accessibility audit submitted.	Current Session SLO	

Summative	Responsive designs and accessibility audit complete the capstone.	Website Redesign Project	
Soft Skill Gate	Inclusive design thinking and mobile-first empathy.	TLO (Professional Foundations)	

Day 17: Design Handoff & Developer Annotation

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 4 — UX/UI Design (Website Design)	Ensure students have finalized all hi-fi designs and responsive screens before this session.
Module/Week	Week 4: Responsive Design, Accessibility & Portfolio	Focus: Producing a developer-ready design handoff package.
Session Title	Day 17: Design Handoff & Developer Annotation	Prepare Figma Inspect Mode tutorial and the Handoff Annotation Template.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 17, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Produce a developer-ready design handoff package.	Ensure annotations are specific enough for a developer to build without asking a single question.

Session Learning Objective (SLO)	Students will add developer annotations to their Figma file, document spacing, components, and interaction specs, and prepare a complete design handoff package.	Focus on developer empathy — annotations must communicate intent, not just describe what is visible.
Core Deliverable Link	Design Handoff Package	Developer-ready design package for the Website Redesign capstone.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Figma Design Handoff Best Practices; Writing Annotations for Developers.
Handout/Worksheet	Handoff Annotation Template.
Technology/Tools	Figma, Figma Inspect Mode.
AI Tool Prompt	"Write developer annotations for a [component name] in a website design. Include spacing, states, interaction triggers, and accessibility requirements."
Pre-Reading/Prep	Figma Inspect Mode Tutorial; Design Handoff Best Practices (Zeplin Blog).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"A design file without annotations is like a blueprint without dimensions. Technically it's there — but no one can build from it."
Review	2 min	Recap Day 16: Responsive designs and accessibility audit. Today we make everything buildable.
Agenda & SLO	2 min	Define the session: Producing a developer-ready handoff package with complete annotations.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define design handoff components: Spacing, component specs, interaction states, asset exports, and accessibility notes.	Show Figma Inspect mode: How a developer reads spacing, styles, and component specs from the design.
I Do (Demo)	10 min	Live demo: Add developer annotations to a Homepage component in Figma. Document spacing values, hover states, and accessibility requirements.	Show how to use sticky notes and annotation layers to keep the Figma file organized.
We Do	10 min	Workshop: Students annotate their hi-fi files and prepare their handoff package.	Circulate: Are annotations specific enough? Does each interactive element have its states documented?
Critical Analysis & Assessment	10 min	Handoff review: Can a developer build this design from the Figma file without asking a question?	Integrate the handoff package into the capstone portfolio case study.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address handoff annotation and Figma export questions.
Wrap-up	1 min	Recap: A great designer is also a great collaborator.
Homework/Next Session	2 min	Finalize Design Handoff Package; prepare for Day 18: Portfolio Polish & Technical Review.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Annotated Figma file and handoff package submitted.	Current Session SLO	
Summative	Design handoff package completes the capstone.	Website Redesign Project	
Soft Skill Gate	Developer empathy and attention to annotation specificity.	TLO (Professional Foundations)	

Day 18: Portfolio Polish & Technical Review

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 4 — UX/UI Design (Website Design)	Transition from design execution to professional presentation.
Module/Week	Week 4: Responsive Design, Accessibility & Portfolio	Focus: Structuring the Month 4 Website Redesign as a professional UX/UI portfolio case study.
Session Title	Day 18: Portfolio Polish & Technical Review	Prepare world-class UX portfolio case study references from NNGroup or UX Collective.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.

Date	Day 18, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Curate and refine the Month 4 Website Redesign case study for professional portfolio display.	Ensure the case study shows the process, not just the final screens.
Session Learning Objective (SLO)	Students will structure their Month 4 work into a cohesive UX/UI Website Redesign Case Study incorporating research, wireframes, UI designs, prototype, and process documentation.	Focus on process narrative — hiring managers want to see your thinking, not just your screens.
Core Deliverable Link	Month 4 Portfolio Case Study	Professional portfolio documentation of the Website Redesign project.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Showcasing UX/UI Work in a Digital Portfolio.
Handout/Worksheet	Portfolio Presentation Checklist.
Technology/Tools	Behance, Figma, Adobe Portfolio.
AI Tool Prompt	"Write a 200-word project description for a UX/UI website redesign case study. Emphasize the research process, key design decisions, and measurable outcomes."
Pre-Reading/Prep	Best UX Portfolio Case Studies (NNGroup); Writing a UX Case Study (UX Collective).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
----------	------	---------

Hook & Context	3 min	"Your UX portfolio is judged differently from a graphic design portfolio. Hiring managers want to see your thinking, not just your screens."
Review	2 min	Recap Month 4: Research, IA, wireframes, UI, prototype, responsive design, and handoff.
Agenda & SLO	2 min	Goal: Structure Month 4 work as a compelling, process-forward UX/UI case study.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Assemble the UX/UI section of the student portfolio.	Ensure mockups and screens look consistent and professional throughout.
I Do (Instructor)	10 min	The UX Case Study structure: Problem, Research, Define, Ideate, Prototype, Test, and Outcome.	Show how to include process artifacts: affinity maps, wireframe iterations, usability findings.
We Do	10 min	Use AI to draft project descriptions; peer-review for clarity, specificity, and UX thinking evidence.	Help students articulate their design decisions, not just describe what they built.
Critical Analysis & Assessment	10 min	Portfolio audit: Are all deliverables high-res? Is the case study narrative compelling and process-focused?	Ensure the portfolio demonstrates the full design process, not just the final UI.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection	2 min	Group discussion: What is the one design decision you are most proud of — and why?

Q&A	1 min	Address portfolio platform and case study questions.
Wrap-up	2 min	Address portfolio platform and case study questions.
Homework/Next Session	2 min	Finalize Month 4 Portfolio Case Study; prepare for Day 19: Final Showcase Rehearsal.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of portfolio case study quality.	Current Session SLO	
Summative	Month 4 Portfolio Case Study quality and process depth.	Website Redesign Project	
Soft Skill Gate	Ability to narrate a design process compellingly.	TLO (Professional Foundations)	

Day 19: Final Showcase Rehearsal & Polishing

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 4 — UX/UI Design (Website Design)	Transition from creation to professional presentation.
Module/Week	Week 4: Responsive Design, Accessibility & Portfolio	Focus: Final technical rehearsal and polish before the Day 20 Showcase.

Session Title	Day 19: Final Showcase Rehearsal & Polishing	Prepare a "Technical Panic Checklist" for students to troubleshoot prototype issues.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 19, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Demonstrate complete UX/UI design proficiency through professional presentation delivery.	Focus on "Stage Presence" and technical readiness.
Session Learning Objective (SLO)	Students will refine their final presentation based on peer feedback and ensure the Figma prototype is stable and ready for the Day 20 Showcase.	Focus on removing friction: broken prototype links, unclear slide transitions, and weak talking points.
Core Deliverable Link	Finalized Website Redesign Presentation Deck	Ready for the Day 20 Showcase.

III. Required Resources & Tech

Item	Details
Presentation/Slides	
Handout/Worksheet	Feedback Matrix; Technical Panic Checklist.
Technology/Tools	Figma; Presentation Software; Zoom/Meet
AI Tool Prompt	"Simulate a tough question a stakeholder might ask about my website redesign's mobile accessibility approach."
Pre-Reading/Prep	Video: How to handle Q&A — TED Talks; Preparing for a design presentation — UX Collective.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"The difference between a good and great presentation is the 24 hours before it. Let's use this time well."
Review	2 min	Recap the pitch structure from Day 18.
Agenda & SLO	2 min	Today is about removing friction: technical bugs, unclear slide transitions, and prototype dead-ends.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Managing presentation anxiety and technical troubleshooting for remote and in-person delivery.	Explain the importance of having backup static screenshots if the prototype fails.
I Do (Demo)	10 min	Demonstrate the Technical Dry Run: Screen sharing, switching between presentation slides and the Figma prototype.	Emphasize: always test your prototype link on the device and connection you will present from.
We Do	10 min	Full-group dress rehearsal: Each student presents 3 minutes of their pitch for peer feedback.	Focus feedback on clarity, pacing, and visual flow.
Critical Analysis & Assessment	10 min	The Stress Test: Peer Q&A. Challenge students on their design decisions and research evidence.	Coach students on how to say "I don't know, but here is my hypothesis" with confidence.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Last-minute technical advice.

Wrap-up	1 min	You are ready. Trust the process.
Homework/Next Session	2 min	Final rest and polish; Tomorrow: Graduation and Showcase.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Green light signal for presentation readiness.	Current Session SLO	
Summative	Finalized presentation deck and prototype link.	Website Redesign Project	
Soft Skill Gate	Professional composure and resilience under pressure.	TLO (Professional Foundations)	

Day 20: Monthly Final Challenge (Website Redesign Showcase)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 4 — UX/UI Design (Website Design)	The cumulative "Final Boss" session for Month 4.
Module/Week	Week 4: Responsive Design, Accessibility & Portfolio	Focus: Multi-phase website redesign execution and final showcase presentation.
Session Title	Day 20: Monthly Final Challenge (Website Redesign Showcase)	Set up a "Design Review Panel" environment for student final presentations.

Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 20, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Demonstrate complete UX/UI design proficiency through a research-driven, professionally presented website redesign.	Evaluate the holistic quality of the student's month-long UX/UI design process.
Session Learning Objective (SLO)	Students will present their complete Website Redesign — research, IA, wireframes, UI, prototype, responsive design, and handoff — in a simulated final client delivery.	Final check: Does every design decision trace back to a user insight?
Core Deliverable Link	Integrated Website Redesign Portfolio	The ultimate deliverable for Month 4 certification.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Monthly Challenge: The Website Redesign Final Showcase.
Handout/Worksheet	Final Presentation Rubric.
Technology/Tools	Figma, Behance.
AI Tool Prompt	"Act as a critical client reviewing my website redesign presentation. What are the 3 toughest questions they would ask about my design decisions?"
Pre-Reading/Prep	Review Month 4 Instructor Feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
----------	------	---------

Hook & Context	3 min	"Today, four weeks of research, architecture, design, and testing become a complete, professional product. This is what a UX/UI designer delivers."
Review	2 min	Recap Month 4 milestones: Research & Personas, IA & Wireframes, UI Design & Prototype, Responsive & Accessibility.
Agenda & SLO	2 min	Final check: Does the complete presentation tell a coherent user-centered design story?

III. Session Flow (60 Minutes)

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Demo)	10 min	Demonstrate the final presentation structure: User problem → Research → Architecture → UI → Prototype → Outcomes.	Model how to frame design decisions around user needs, not personal aesthetics.
We Do	10 min	Full presentations: Each student presents their complete Website Redesign.	Panel critique: Instructor + 2 peers evaluate against the Website Redesign Rubric.
Critical Analysis & Assessment	20 min	Portfolio Showcase: Final presentations submitted and reviewed.	Celebrate the growth from graphic design student to UX/UI designer.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Final presentation delivery and UX rationale.	Current Session SLO	

Summative	Final presentation delivery and UX rationale.	Final presentation delivery and UX rationale.	
Soft Skill Gate	Professional UX presentation composure and user-centered articulation.	TLO (Professional Foundations)	

Month 5 — Mobile App Design

Day 1: Introduction to Mobile App Design & Platform Conventions

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 5 — Mobile App Design	Ensure students understand the shift from web design to the mobile interaction paradigm.
Module/Week	Week 1: Mobile UX Research & Strategy	Focus: Establishing mobile platform literacy and the unique constraints of the mobile medium.
Session Title	Day 1: Introduction to Mobile App Design & Platform Conventions	Focus: Establishing mobile platform literacy and the unique constraints of the mobile medium.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 1, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
-------	-------	---------------------

Terminal Learning Outcome (TLO) Link	Understand mobile design conventions and the unique constraints of the mobile medium.	Link session back to the capstone Mobile App Design project.
Session Learning Objective (SLO)	Students will differentiate iOS (Human Interface Guidelines) and Android (Material Design 3) conventions, analyze 2 top-tier mobile apps using a UX audit, and define the capstone app brief.	Focus on platform literacy — every design decision must be appropriate for the target platform.
Core Deliverable Link	Mobile App UX Audit + App Brief	First analytical deliverable — establishing mobile platform literacy.

III. Resources

Item	Details
Presentation/Slides	Mobile vs. Web: The Critical Differences; iOS vs. Android Design Conventions.
Handout/Worksheet	Platform Convention Reference Card (iOS/Android); App Brief Template.
Technology/Tools	Figma, ChatGPT.
AI Tool Prompt	"Audit the UX of [app name] using mobile usability principles. Identify 3 things it does exceptionally well and 2 areas for improvement."
Pre-Reading/Prep	Apple Human Interface Guidelines; Google Material Design 3 Guidelines.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Open the same task (booking a ride) on two different apps. Ask: "What gesture did you expect? What happened instead? How did that feel?"

Review	2 min	Overview of the Month 5 program structure and the capstone Mobile App Design project.
Agenda & SLO	2 min	Define mobile-specific design principles and set the foundation for the Month 5 capstone app.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define the mobile medium: Touch interfaces, small screens, attention scarcity, thumb zones, and interrupted usage patterns.	Ask: "When do people use mobile apps? What else are they doing at the same time?"
I Do (Demo)	10 min	Live demo: Side-by-side audit of an iOS and Android version of the same app. Identify platform convention differences.	Demonstrate the thumb zone map: Comfortable, reachable, and difficult zones for one-handed use.
We Do	10 min	Workshop: Students conduct UX audits on assigned apps and draft their Month 5 app brief.	Circulate: Ensure audit findings are grounded in mobile UX principles, not personal preference.
Critical Analysis & Assessment	10 min	App brief review: Is the proposed app solving a real user need? Is the target platform clearly defined?	Connect to capstone: Every design decision will be governed by platform guidelines and the app brief.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Clarify platform convention distinctions and app brief requirements.
Wrap-up	1 min	Recap: Mobile is not a smaller website — it is a fundamentally different interaction paradigm.

Homework/Next Session	2 min	Finalize Mobile App UX Audit and App Brief; select primary target platform (iOS or Android).
-----------------------	-------	--

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: UX Audit and App Brief submitted.	Current Session SLO	
Summative	Audit and brief inform all capstone design decisions.	Mobile App Design Project	
Soft Skill Gate	Platform-specific critical thinking in UX evaluation.	TLO 1 (Professional Foundations)	

Day 2: Mobile User Research & Behavioral Analysis

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 5 — Mobile App Design	Ensure students have selected their target platform and app concept before the session.
Module/Week	Week 1: Mobile UX Research & Strategy	Focus: Conducting mobile-specific user research and behavioral analysis.
Session Title	Day 2: Mobile User Research & Behavioral Analysis	Prepare App Store and Google Play access for review analysis.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 2, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Conduct mobile-specific user research and behavioral analysis.	Ensure research captures mobile context — when, where, and how the app is used in real life.
Session Learning Objective (SLO)	Students will conduct 2 mobile-contextual user interviews, analyze app store reviews for behavioral insights, and build a mobile-specific user persona.	Focus on mobile usage context — "lab-based research misses the interruptions of real mobile use."
Core Deliverable Link	Mobile User Research Report	Qualitative research foundation for the Mobile App Design capstone.

III. Resources

Item	Details
Presentation/Slides	Mobile Research Methods: Context is Everything.
Handout/Worksheet	Mobile Contextual Interview Script; App Store Review Analysis Template.
Technology/Tools	FigJam, ChatGPT, App Store/Google Play.
AI Tool Prompt	"Analyze the top 20 negative reviews of [app name] on the App Store. Identify the top 3 recurring user pain points and the emotional language users use to describe their frustration."
Pre-Reading/Prep	Contextual Inquiry for Mobile UX (NNGroup); Mobile UX Personas Guide.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
----------	------	---------

Hook & Context	3 min	Read 5 scathing App Store reviews aloud. Ask: "What emotion is this user feeling? What unmet expectation triggered this review?"
Review	2 min	Recap Day 1: Mobile platform conventions and app brief.
Agenda & SLO	2 min	Define the session: Conducting mobile-specific research using contextual interviews and app store behavioral analysis.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Introduce contextual research: Observing users in their natural mobile context (commuting, queuing, multitasking).	Explain: "Lab-based research often misses the interruptions and distractions of real mobile use."
I Do (Demo)	10 min	Live demo: Analyze 20 App Store reviews using ChatGPT to cluster pain points and emotional language.	Show how to conduct a 5-minute contextual mobile interview: Watch first, interview second.
We Do	10 min	Workshop: Students analyze app store reviews and draft a mobile user persona.	Circulate: Are personas capturing mobile context (when/where/how the app is used)?
Critical Analysis & Assessment	10 min	Persona review: Does the persona describe a real mobile usage context, not just demographics?	Connect to capstone: Persona usage context will govern all navigation and gesture design decisions.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address mobile research methodology questions.
Wrap-up	1 min	Recap: Mobile users are always somewhere else. Design for their real context.
Homework/Next Session	2 min	Complete 2 contextual interviews; finalize Mobile User Research Report.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Mobile User Research Report submitted.	Current Session SLO	
Summative	Research findings drive all capstone design decisions.	Mobile App Design Project	
Soft Skill Gate	Empathy for mobile users in real-world contexts.	TLO (Professional Foundations)	

Day 3: Mobile User Flows & Navigation Architecture

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 5 — Mobile App Design	Ensure students have completed their user interviews and persona before the session.
Module/Week	Week 1: Mobile UX Research & Strategy	Focus: Designing mobile-optimized user flows and navigation architecture.
Session Title	Day 3: Mobile User Flows & Navigation Architecture	Prepare the FigJam User Flow Template and Mobile Navigation Pattern Reference Card.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 3, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Design mobile-optimized user flows and navigation architectures.	Ensure the navigation pattern chosen is appropriate for the target platform and user context.
Session Learning Objective (SLO)	Students will map 3 primary mobile user flows and design a navigation architecture (tab bar, hamburger, or gesture-based) appropriate for the target platform and user context.	Focus on the thumb zone — navigation elements must be reachable with one hand.
Core Deliverable Link	Mobile User Flows & Navigation Architecture	Core structural foundation for the Mobile App Design capstone.

III. Resources

Item	Details
Presentation/Slides	Mobile Navigation Patterns: Tab Bar, Drawer, Bottom Sheet, Gestures.
Handout/Worksheet	Mobile Navigation Pattern Reference Card; User Flow Template.
Technology/Tools	FigJam, Figma.
AI Tool Prompt	"Design a mobile app navigation architecture for a [app type] used primarily by [persona]. Choose the optimal navigation pattern and explain your rationale."
Pre-Reading/Prep	Mobile Navigation Patterns (NNGroup); iOS Navigation Conventions (Apple HIG).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Demonstrate swiping between apps on a real phone. Ask: "What gesture did you just use? Did you have to think about it? Why not?"

Review	2 min	Recap Day 2: Mobile user persona and key pain points driving the app concept.
Agenda & SLO	2 min	Define the session: Designing mobile navigation architecture optimized for the platform and user context.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Compare mobile navigation patterns: Tab Bar (iOS), Bottom Navigation (Android), Drawer Nav, Gesture-driven. Show when each is appropriate.	Show the thumb zone impact on navigation placement: Bottom nav is reachable; top hamburger is not.
I Do (Demo)	10 min	Live demo: Map a 3-flow user journey in FigJam and design the navigation architecture for a fitness app.	Demonstrate the gesture vocabulary: Swipe, pinch, long-press, double-tap — and when to use each.
We Do	10 min	Workshop: Students map their 3 primary user flows and design their app's navigation architecture.	Circulate: Does the navigation pattern match the platform guidelines and the user's context?
Critical Analysis & Assessment	10 min	Navigation review: Can the primary user task be completed in 3 taps or fewer?	Connect to wireframe phase: User flows become the wireframe navigation map.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address mobile navigation pattern and gesture design questions.
Wrap-up	1 min	Recap: Great mobile navigation is invisible — the user never has to think about it.

Homework/Next Session	2 min	Finalize Mobile User Flows and Navigation Architecture; prepare for Day 4 Practice + Support Day.
-----------------------	-------	---

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Mobile User Flows and Navigation Architecture submitted.	Current Session SLO	
Summative	Daily Exit Ticket: Mobile User Flows and Navigation Architecture submitted.	Mobile App Design Project	
Soft Skill Gate	Platform-appropriate navigation thinking.	TLO (Professional Foundations)	

Day 4: Practice + Support Day

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 5 — Mobile App Design	Ensure all students have access to Days 1–3 research deliverables and instructor feedback.

Module/Week	Week 1: Mobile UX Research & Strategy	Focus: Buffer and studio time for consolidation of Week 1 mobile UX research deliverables.
Session Title	Day 4: Practice + Support Day	Prepare the studio environment for peer critique circles and platform compliance audits.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 4, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Consolidate mobile UX research and navigation architecture deliverables.	Track student progress against Week 1 research deliverables.
Session Learning Objective (SLO)	Students will refine their App Brief, User Research Report, and Navigation Architecture based on instructor and peer feedback.	Identify students falling behind for targeted intervention.
Core Deliverable Link	Week 1 Deliverables: App Brief, User Research, Personas, Navigation Architecture	Confirm all students are caught up on all four Week 1 mobile UX research items.

III. Resources

Item	Details
Presentation/Slides	N/A (Studio Day)
Handout/Worksheet	Mobile UX Research Quality Audit Checklist.
Technology/Tools	FigJam, Figma, ChatGPT.
AI Tool Prompt	"Review my mobile app navigation architecture for compliance with [iOS or Android] platform guidelines. Identify any patterns that violate platform conventions."

Pre-Reading/Prep	Review instructor feedback from Days 1–3.
------------------	---

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"In professional mobile design, the strategy phase is where 80% of usability problems are created or avoided. Let's make our foundation bulletproof."
Review	2 min	Overview of Week 1 mobile UX deliverables and their role in the capstone.
Agenda & SLO	2 min	Goals: Refinement, platform compliance check, and peer support.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Outline studio expectations: refinement, platform compliance check, and peer support.	Set constructive critique norms: Feedback must reference mobile UX principles.
I Do (Demo)	10 min	Demonstrate how to conduct a platform compliance audit on a navigation architecture using Apple HIG or Material Design 3.	Set constructive critique norms: Feedback must reference mobile UX principles.
We Do (Guided)	10 min	Peer critique circles: Audit each other's navigation architectures for platform compliance and user-centeredness.	Identify learners who need targeted support on user flow mapping.
Critical Analysis & Assessment	10 min	Individual refinement of Week 1 deliverables.	Confirm all FigJam and Figma files are organized and exported.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address final roadblocks for Week 1 completion.
Wrap-up	1 min	Confirm goal: All students are caught up on Week 1 deliverables.
Homework/Next Session	2 min	Finalize all Week 1 deliverables; prepare for Day 5 Weekly Studio Challenge.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of refined Week 1 mobile UX deliverables.	Current Session SLO	
Summative	Completion of Week 1 deliverables.	Mobile App Design Project	
Soft Skill Gate	Engagement in platform compliance critique.	TLO (Professional Foundations)	

Day 5: Weekly Studio Challenge (Mobile UX Research Package)

I. Program Overview & Philosophy

Field	Value	Customization Notes
-------	-------	---------------------

Program Title	Month 5 — Mobile App Design	Ensure students have finalized all Week 1 deliverables before the challenge.
Module/Week	Week 1: Mobile UX Research & Strategy	Focus: Weekly Studio Challenge — Mobile UX Research Package Presentation.
Session Title	Day 5: Weekly Studio Challenge (Mobile UX Research Package)	Prepare the Product Strategy Meeting Rubric.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	
Date	Day 5, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Present the complete Mobile UX Research and Strategy Package.	Link challenge to the cumulative skills of Week 1.
Session Learning Objective (SLO)	Students will assemble and present their Mobile UX Research Package in a simulated mobile product strategy meeting.	Ensure every design decision is supported by user research evidence.
Core Deliverable Link	Mobile UX Research Package	Final Week 1 studio challenge submission.

III. Resources

Item	Details
Presentation/Slides	
Handout/Worksheet	Product Strategy Meeting Rubric.
Technology/Tools	Figma, FigJam.

AI Tool Prompt	"Simulate a product manager challenging my mobile app concept with tough questions about market fit, user research validity, and navigation logic."
Pre-Reading/Prep	Review Week 1 research deliverables and instructor feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Brief scenario: "You have pitched your app concept. The product team wants to see your research before green-lighting the design phase."
Review	2 min	Recap Week 1: App brief, user research, personas, and navigation architecture.
Agenda & SLO	2 min	Define the challenge: Present the Mobile UX Research Package in a product strategy meeting format.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Assign the challenge: Structure and present the Mobile UX Research Package as a product strategy briefing.	Distribute the Product Strategy Meeting Rubric.
I Do (Demo)	10 min	Demonstrate the product strategy briefing format: Market opportunity, user research, personas, navigation architecture.	Model confident, data-driven product presentation language.
We Do	10 min	Workshop: Students finalize packages and rehearse presentations.	Targeted support for students behind on navigation architecture.
Critical Analysis &	10 min	Peer presentations: Does the research justify the app concept and navigation choices?	Ensure every decision is supported by user research evidence.

Assessment			
------------	--	--	--

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address specific presentation questions.
Wrap-up	1 min	Summarize Week 1 accomplishments.
Homework/Next Session	2 min	Finalize Mobile UX Research Package; preview Week 2: Mobile Wireframing & Prototyping.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Submission of Mobile UX Research Package.	Current Session SLO	
Summative	Completion of Week 1 deliverables.	Mobile App Design Project	
Soft Skill Gate	Professional discovery presentation delivery.	TLO (Professional Foundations)	

Day 6: Mobile Wireframing Core Screens

I. Program Overview & Philosophy

Field	Value	Customization Notes
-------	-------	---------------------

Program Title	Month 5 — Mobile App Design	Ensure students have their user flows and navigation architecture finalized before the session.
Module/Week	Week 2: Mobile Wireframing & Prototyping	Focus: Creating low-fidelity wireframes for core mobile app screens.
Session Title	Day 6: Mobile Wireframing Core Screens	Prepare the Figma mobile wireframe component library at 375x812.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 6, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Create low-fidelity wireframes for core mobile app screens.	Focus on structure and content hierarchy — no colors, fonts, or visual design at this stage.
Session Learning Objective (SLO)	Students will produce lo-fi wireframes for the Onboarding Flow, Home Screen, Core Feature Screen, and Settings Screen of the capstone mobile app.	Focus on screen anatomy — respect status bars, safe areas, and minimum touch target sizes.
Core Deliverable Link	Mobile Lo-Fi Wireframes (8+ screens)	Core structural wireframes for the Mobile App Design capstone.

III. Resources

Item	Details
Presentation/Slides	Mobile Wireframing Best Practices; Screen Anatomy: iOS and Android.
Handout/Worksheet	Mobile Wireframe Component Library (Figma).
Technology/Tools	Figma (375x812 mobile frame).

AI Tool Prompt	"Suggest the optimal content hierarchy and screen structure for the home screen of a [app type] mobile app targeting [persona description]."
Pre-Reading/Prep	Mobile Wireframing Guide (Figma Blog); iOS and Android Screen Anatomy (official guidelines).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a mobile app wireframe next to the finished product. Ask: "At what stage could you have caught a navigation problem that would take 3 weeks to fix in production?"
Review	2 min	Recap Week 1: Navigation architecture and user flows. Wireframes are the spatial translation of the app architecture.
Agenda & SLO	2 min	Introduce mobile wireframing conventions: screen anatomy, safe areas, and gesture-driven interaction patterns.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define mobile screen anatomy: Status bar, navigation bar, tab bar, safe areas, notch, and home indicator.	Emphasize: "Every pixel on mobile is precious. There is no wasted space."
I Do (Demo)	10 min	Live demo: Wireframe the Onboarding Flow (3 screens) and Home Screen in Figma at 375x812.	Show how to use the mobile wireframe kit with pre-built components: cells, nav bars, tab bars.
We Do (Guided)	10 min	Workshop: Students wireframe their core screens (Onboarding, Home, Core Feature, Settings).	Circulate: Are screens respecting safe areas? Are touch targets minimum 44x44pt?
Critical Analysis & Assessment	10 min	Wireframe review: Walk through the screen flow as the persona. Does the hierarchy support the primary task?	Identify the one screen that is most confusing and explain why.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address Figma mobile wireframing tool questions.
Wrap-up	1 min	Recap: Mobile wireframes are structural decisions, not aesthetic ones.
Homework/Next Session	2 min	Complete all core screen wireframes; prepare for Day 7: Advanced Screen Patterns & Edge Cases.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Mobile lo-fi wireframe set submitted.	Current Session SLO	
Summative	Wireframes serve as the structural foundation for the UI design phase.	Mobile App Design Project	
Soft Skill Gate	Mobile-specific structural thinking and platform awareness.	TLO (Professional Foundations)	

Day 7: Advanced Screen Patterns & Edge Cases

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 5 — Mobile App Design	Ensure students have completed their core screen wireframes before the session.

Module/Week	Week 2: Mobile Wireframing & Prototyping	Focus: Designing advanced mobile screen patterns including empty states and error handling.
Session Title	Day 7: Advanced Screen Patterns & Edge Cases	Prepare the Edge Case Screen Checklist for the workshop.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	
Date	Day 7, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Design advanced mobile screen patterns including empty states and error handling.	Ensure the complete screen library covers every state the user might encounter.
Session Learning Objective (SLO)	Students will design error states, empty states, loading states, and success confirmation screens for the capstone app, ensuring a complete interaction narrative.	Focus on UX writing — error messages must be helpful, human, and actionable.
Core Deliverable Link	Complete Screen Library Including Edge Cases	Full-coverage wireframe library for the Mobile App Design capstone.

III. Resources

Item	Details
Presentation/Slides	The Forgotten Screens: Empty States, Errors, and Loading.
Handout/Worksheet	Edge Case Screen Checklist.
Technology/Tools	Figma.
AI Tool Prompt	"Design a friendly, brand-appropriate empty state screen for a [app type] app when the user has no [content type] yet. Include illustration concept, headline, and CTA."

Pre-Reading/Prep	Empty States in Mobile Design (NNGroup); Designing Error Messages (UX Writing Hub).
------------------	---

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a bare error screen vs. a well-designed, brand-consistent empty state. Ask: "Which app would you delete? Which one makes you smile?"
Review	2 min	Recap Day 6: Core screen wireframes. Today we design the screens most developers forget — until users hit them.
Agenda & SLO	2 min	Define the session: Designing the full spectrum of mobile screen states for a complete user experience.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define screen state taxonomy: Empty state, loading state, error state, success state, permission request.	Show how empty states are brand opportunities — not dead ends.
I Do (Demo)	10 min	Live demo: Design an empty state screen for a social app in Figma: Illustration, headline, body copy, and CTA.	Show how to write non-jargon error messages: "What happened? Why? What can they do?"
We Do	10 min	Workshop: Students design empty state, error state, and loading state screens for their capstone app.	Circulate: Check for brand voice in the copy, helpfulness in error messages, and clear CTAs.
Critical Analysis & Assessment	10 min	State screen review: Do these screens feel like the same app as the core screens?	Integrate edge case screens into the full wireframe library.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address screen state design and UX writing questions.
Wrap-up	1 min	Recap: Great apps anticipate the moments when things go wrong.
Homework/Next Session	2 min	Finalize complete screen library; prepare for Day 8: Interactive Mobile Prototype.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Edge case screens submitted.	Current Session SLO	
Summative	Complete screen library feeds into the prototype and UI design phases.	Mobile App Design Project	
Soft Skill Gate	Anticipatory design thinking for edge cases.	TLO (Professional Foundations)	

Day 8: Interactive Mobile Prototype

I. Program Overview & Philosophy

Field	Value	Customization Notes
-------	-------	---------------------

Program Title	Month 5 — Mobile App Design	Ensure students have completed their full screen library before this session.
Module/Week	Week 2: Mobile Wireframing & Prototyping	Focus: Building a navigable interactive prototype of the mobile app.
Session Title	Day 8: Interactive Mobile Prototype	Verify student access to Figma Prototype Mode and the Figma mobile app for device testing.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 8, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Build a navigable interactive prototype of the mobile app.	Ensure the prototype covers all 3 primary user flows mapped in Week 1.
Session Learning Objective (SLO)	Students will connect all wireframe screens into a fully navigable Figma prototype with gesture interactions (swipe, tap, back), simulating the real mobile app experience.	Focus on gesture appropriateness — swipe directions must be intuitive and platform-consistent.
Core Deliverable Link	Interactive Mobile Wireframe Prototype	Functional prototype for usability testing.

III. Resources

Item	Details
Presentation/Slides	Focus on gesture appropriateness — swipe directions must be intuitive and platform-consistent.
Handout/Worksheet	Mobile Prototype Interaction Checklist.

Technology/Tools	Figma (Prototype Mode).
AI Tool Prompt	"Describe the most effective transition animations I should use for [screen type] in a mobile app prototype to convey the navigation depth hierarchy."
Pre-Reading/Prep	Figma Mobile Prototype Guide; iOS Transition Patterns (Apple HIG).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a click-through wireframe prototype vs. one with swipe gestures and slide transitions. Ask: "Which one feels like a real app?"
Review	2 min	Recap Days 6–7: Complete wireframe library including core and edge case screens.
Agenda & SLO	2 min	Define the session: Connecting screens into a gesture-driven interactive prototype.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define mobile prototype interaction types: Tap, swipe left/right, swipe up/down, pinch, long-press, and back navigation.	Show how transition type (slide left, dissolve, push) communicates navigation direction.
I Do (Demo)	10 min	Live demo: Connect the Onboarding Flow and Home Screen with swipe and tap interactions in Figma prototype mode.	Live demo: Connect the Onboarding Flow and Home Screen with swipe and tap interactions in Figma prototype mode.
We Do	10 min	Workshop: Students connect all their screens into a navigable prototype with gesture interactions.	Circulate: Check for broken connections, correct gesture types, and appropriate transition animations.

Critical Analysis & Assessment	10 min	Prototype walk-through: Navigate as the persona completing the primary task. Where does it break?	Identify and fix the top 2 interaction issues.
--------------------------------	--------	---	--

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address Figma prototype gesture and transition questions.
Wrap-up	1 min	Recap: The prototype is where wireframes become an experience.
Homework/Next Session	2 min	Complete interactive prototype; prepare for Day 9 Wireframe Studio Day.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Figma mobile prototype link submitted.	Current Session SLO	
Summative	Prototype used for usability testing and final presentation.	Mobile App Design Project	
Soft Skill Gate	Precision in gesture-based interaction design.	TLO (Professional Foundations)	

Day 9: Wireframe & Prototype Studio Day

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 5 — Mobile App Design	Ensure all students have completed their screen library and interactive prototype before this session.
Module/Week	Week 2: Mobile Wireframing & Prototyping	Focus: Buffer and studio time for wireframe refinement, usability testing, and prototype polishing.
Session Title	Day 9: Wireframe & Prototype Studio Day	Prepare the Mobile Usability Test Script for the studio exercise.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 9, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Refine mobile wireframes and prototype based on usability feedback.	Ensure revisions are driven by test evidence, not personal preference.
Session Learning Objective (SLO)	Students will conduct a mobile usability test using the Figma prototype on a real device, document 3+ usability issues, and implement revisions.	Focus on the Think Aloud protocol — students must observe silently without correcting or guiding the participant.
Core Deliverable Link	Mobile Usability Test Report & Revised Prototype	Usability-validated prototype for the capstone.

III. Resources

Item	Details
Presentation/Slides	N/A (Studio Day with Usability Testing Focus)

Handout/Worksheet	Mobile Usability Test Script; Issue Severity Rating Scale.
Technology/Tools	Figma (on mobile device), Maze.
AI Tool Prompt	"Based on these mobile usability test findings: [paste], prioritize the top 3 changes that would most improve task completion rates on the primary user flow."
Pre-Reading/Prep	Mobile Usability Testing Methods (NNGroup); How to Test a Mobile Prototype.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"Today we do the most important thing a designer can do: stop designing and start listening."
Review	2 min	Recap Day 8: Interactive prototype. Today we put it in front of a real user.
Agenda & SLO	2 min	Define the session: Conducting mobile usability tests and implementing data-driven revisions.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define mobile testing protocol: Share Figma prototype to mobile device, use Think Aloud, set clear tasks, observe without intervening.	Introduce severity ratings: Critical (blocks task), Serious (impedes), Minor (annoyance).
I Do (Demo)	10 min	Demonstrate a 5-minute mobile usability test: Set the task, observe, document issues without interpreting.	Show how to share the Figma prototype via the Figma mobile app.
We Do	10 min	Paired mobile usability tests using Figma prototypes on real devices.	Observers document issue, location, severity, and user quote.

Critical Analysis & Assessment	10 min	Prioritize the top 3 usability issues and implement the most critical revision.	Students update their prototype based on test findings before the challenge.
--------------------------------	--------	---	--

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address mobile usability testing and revision questions.
Wrap-up	1 min	Recap: Every test reveals something you never would have found in front of your own screen.
Homework/Next Session	2 min	Finalize revised prototype and Usability Test Report; prepare for Day 10 Weekly Studio Challenge.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Usability Test Report and revised prototype submitted.	Current Session SLO	
Summative	Usability-tested prototype feeds into UI design phase.	Mobile App Design Project	
Soft Skill Gate	Openness to critique and evidence-based design revision.	TLO (Professional Foundations)	

Day 10: Weekly Studio Challenge (Wireframe & Prototype Review)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 5 — Mobile App Design	Ensure students have finalized all Week 2 deliverables before the challenge.
Module/Week	Week 2: Mobile Wireframing & Prototyping	Focus: Weekly Studio Challenge — Mobile Wireframe and Prototype Package Presentation.
Session Title	Day 10: Weekly Studio Challenge (Wireframe & Prototype Review)	Prepare the Mobile Design Review Rubric.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 10, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Present the complete Mobile Wireframe and Prototype Package.	Link challenge to the cumulative skills of Week 2.
Session Learning Objective (SLO)	Students will present their mobile wireframes, prototype, and usability test findings in a simulated product design review.	Ensure usability findings are clearly connected to implemented design revisions.
Core Deliverable Link	Mobile Wireframe & Prototype Package	Full Week 2 studio challenge submission.

III. Resources

Item	Details
Presentation/Slides	
Handout/Worksheet	Mobile Design Review Rubric.
Technology/Tools	Figma.

AI Tool Prompt	"Act as a mobile UX director reviewing my wireframe and prototype package. Identify the top 3 structural improvements I should make before moving into visual design."
Pre-Reading/Prep	Review Week 2 deliverables and instructor feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Brief scenario: "The product manager has approved the research. The engineering team wants to see the wireframes and prototype before the visual design phase begins."
Review	2 min	Recap Week 2: Wireframes, edge cases, prototype, and usability testing.
Agenda & SLO	2 min	Define the challenge: Present the Mobile Wireframe and Prototype Package in a product design review.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Assign the challenge: Structure and present the wireframe and prototype package.	Distribute the Mobile Design Review Rubric.
I Do (Demo)	10 min	Demonstrate the product design review format: Start with user flow, walk through key screens, demonstrate the prototype.	Model using usability test data to justify design decisions.
We Do	10 min	Workshop: Students finalize packages and prepare presentations.	Targeted support for students behind on prototype or usability testing.
Critical Analysis &	10 min	Peer design reviews: Does the architecture serve the primary user need?	Ensure usability findings are clearly connected to implemented revisions.

Assessment			
------------	--	--	--

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address specific review questions.
Wrap-up	1 min	Summarize Week 2 accomplishments.
Homework/Next Session	2 min	Finalize Mobile Wireframe & Prototype Package; preview Week 3: Mobile UI Design.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Submission of Mobile Wireframe & Prototype Package.	Current Session SLO	
Summative	Completion of Week 2 deliverables.	Mobile App Design Project	
Soft Skill Gate	Professional mobile product design review delivery.	TLO (Professional Foundations)	

Day 11: Mobile UI Design System & Component Library

I. Program Overview & Philosophy

Field	Value	Customization Notes
-------	-------	---------------------

Program Title	Month 5 — Mobile App Design	Ensure students have their wireframes and prototype finalized before this session.
Module/Week	Week 3: Mobile UI Design & Visual Design	Focus: Building a mobile-specific UI design system and component library in Figma.
Session Title	Day 11: Mobile UI Design System & Component Library	Prepare the platform-specific component checklist (iOS or Android) for each student's target platform.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 11, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Build a mobile-specific UI design system and component library in Figma.	Ensure all components respect platform touch target minimums and design conventions.
Session Learning Objective (SLO)	Students will create a complete mobile design system (colors, type scale, spacing, and core components: buttons, cells, nav bar, tab bar, cards) for the capstone app.	Focus on Figma variants — one component must contain all states: default, pressed, disabled.
Core Deliverable Link	Mobile UI Design System & Component Library	Design system foundation for the Mobile App Design capstone.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Mobile Design Systems: Scale, Consistency, and Platform Compliance.
Handout/Worksheet	Mobile Component Checklist (iOS or Android).
Technology/Tools	Figma.

AI Tool Prompt	"Suggest a mobile UI design system for a [app type] targeting [audience]. Include color palette, type scale, spacing system, and core component list."
Pre-Reading/Prep	Material Design 3 Component Library; Apple Human Interface Guidelines Components.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a screenshot of an app with 12 different button styles and 4 inconsistent font sizes. Ask: "What does this tell you about the team's process?"
Review	2 min	Recap Week 2: Wireframe structure. Today we add the visual and component layer on top of the proven architecture.
Agenda & SLO	2 min	Build the mobile design system that will govern all Week 3 visual design work.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define mobile design system components: Buttons (primary, secondary, destructive), cells, nav bar, tab bar, input fields, cards, and modals.	Show how Figma variants allow one component to contain all states: default, hover, pressed, disabled.
I Do (Demo)	10 min	Live demo: Build a primary button component with all states using Figma variants and auto layout.	Demonstrate how to publish styles and components to the Figma team library.
We Do	10 min	Workshop: Students build their mobile design system — colors, type scale, and 5 core components.	Circulate: Check component anatomy — does each component respect platform touch target minimums?

Critical Analysis & Assessment	10 min	Design system audit: Are all components using published styles? Do components work at all screen sizes?	Connect to Week 3: This design system will govern all mobile UI screen designs.
--------------------------------	--------	---	---

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address Figma variants, auto layout, and component publishing questions.
Wrap-up	1 min	Recap: The design system is the foundation. Build it right and everything else follows.
Homework/Next Session	2 min	Complete mobile design system and component library; prepare for Day 12: Core Screen UI Design.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Mobile Design System and Component Library submitted.	Current Session SLO	
Summative	Design system governs all UI design for the capstone app.	Mobile App Design Project	
Soft Skill Gate	Systematic component thinking and platform compliance.	TLO (Professional Foundations)	

Day 12: Core Screen UI Design (High Fidelity)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 5 — Mobile App Design	Ensure students have their mobile design system and component library finalized before this session.
Module/Week	Week 3: Mobile UI Design & Visual Design	Focus: Applying the mobile design system to produce high-fidelity mobile UI screens.
Session Title	Day 12: Core Screen UI Design (High Fidelity)	Prepare Unsplash access and Mobbin.com as a reference tool for real-world mobile UI inspiration.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 12, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Apply the mobile design system to produce high-fidelity mobile UI screens.	Ensure design system styles are applied consistently across all 10+ screens.
Session Learning Objective (SLO)	Students will design high-fidelity UI screens for all core app screens (Onboarding, Home, Core Feature, Settings, and 4 additional screens)	Focus on micro-copy — every label, button, and error message must feel human and on-brand.

	using the established design system.	
Core Deliverable Link	High-Fidelity Mobile UI Screens (10+ screens)	Complete hi-fi screen set for the Mobile App Design capstone.

III. Required Resources & Tech

Item	Details
Presentation/Slides	From Wireframe to Hi-Fi: Imagery, Micro-copy, and Animation Intent.
Handout/Worksheet	Hi-Fi Mobile Screen Checklist.
Technology/Tools	Figma, Unsplash, ChatGPT.
AI Tool Prompt	"Generate micro-copy for a [screen type] in a [app type] app. Include headline (max 5 words), body (max 2 lines), and CTA button text (max 3 words). Tone: [brand tone]."
Pre-Reading/Prep	Mobile UI Design Trends (Mobbin); App Icon and Typography Design (Apple HIG).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a wireframe screen and its hi-fi equivalent side-by-side. Ask: "The structure is identical. What changed? What does color, imagery, and type add to the user experience?"
Review	2 min	Recap Day 11: Design system and component library. Today we apply it at full visual fidelity.
Agenda & SLO	2 min	Design high-fidelity mobile UI screens applying the design system across all core app screens.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
-------	------	--------------------------	---------------------------

Hook & Context	10 min	Define hi-fi mobile UI: Real copy, real imagery/iconography, brand colors and typography, WCAG AA contrast, and correct component states.	Introduce Mobbin.com as a reference tool for real-world hi-fi mobile UI inspiration.
I Do (Demo)	10 min	Live demo: Design the Home Screen hi-fi in Figma using design system components, photography, and AI-generated micro-copy.	Show how to use Unsplash and custom icon sets within the design system framework.
We Do	10 min	Workshop: Students design all 10+ hi-fi screens.	Circulate: Are design system styles applied consistently? Are all copy and imagery appropriate to the brand?
Critical Analysis & Assessment	10 min	Screen set review: Do all 10 screens feel like the same app?	Accessibility check: Primary CTA contrast ratio — does it pass WCAG AA?

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address hi-fi design, micro-copy, and component questions.
Wrap-up	1 min	Recap: Hi-fi is where design meets craft.
Homework/Next Session	2 min	Complete all hi-fi screens; prepare for Day 13: Hi-Fi Prototype & Micro-Animation Design.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: 10+ hi-fi mobile screens submitted.	Current Session SLO	

Summative	Hi-fi screens form the core of the Mobile App Design capstone.	Mobile App Design Project	
Soft Skill Gate	Visual consistency and design system discipline across 10+ screens.	TLO (Professional Foundations)	

Day 13: Hi-Fi Prototype & Micro-Animation Design

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 5 — Mobile App Design	Ensure students have completed all 10+ hi-fi screens before this session.
Module/Week	Week 3: Mobile UI Design & Visual Design	Focus: Building a high-fidelity interactive prototype with micro-animations.
Session Title	Day 13: Hi-Fi Prototype & Micro-Animation Design	Verify student access to Figma Smart Animate and prototype mode.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 13, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Build a high-fidelity interactive prototype with micro-animations.	Ensure every animation has a functional purpose — not just decoration.

Session Learning Objective (SLO)	Students will connect all hi-fi screens into a fully navigable Figma prototype with micro-animations (Smart Animate, dissolve, slide), creating a client-ready app demo.	Focus on platform timing conventions — iOS and Android have different animation speeds and easing curves.
Core Deliverable Link	High-Fidelity Interactive Prototype	Client-ready interactive app demo.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Micro-animations in Mobile UI: Delight, Feedback, and Continuity.
Handout/Worksheet	Micro-animation Best Practice Guide.
Technology/Tools	Figma (Prototype Mode + Smart Animate).
AI Tool Prompt	"Describe 5 specific micro-animations I should add to a [app type] app that would improve the perceived quality and delight of the user experience, without slowing it down."
Pre-Reading/Prep	The Role of Animation in Mobile UX (NNGroup); Figma Smart Animate Tutorial.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a static hi-fi prototype next to one with Smart Animate transitions. Ask: "Same screens. Same design. Completely different experience. What changed?"
Review	2 min	Recap Day 12: 10+ hi-fi screens. Today we connect them with motion that communicates meaning.
Agenda & SLO	2 min	Introduce Figma Smart Animate and the principles of purposeful micro-animation.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define purposeful vs. decorative animation. Show how motion communicates navigation hierarchy, system feedback, and brand personality.	Principle: Every animation should have a functional purpose — not just look cool.
I Do (Demo)	10 min	Live demo: Connect hi-fi screens in Figma prototype mode. Add Smart Animate to a card expansion, a tab switch, and a form submission confirmation.	Show how to control animation duration and easing for iOS vs. Android conventions.
We Do	10 min	Workshop: Students connect all hi-fi screens and add 5 micro-animations.	Circulate: Are animations purposeful? Do they respect platform timing conventions?
Critical Analysis & Assessment	10 min	Hi-fi prototype walk-through on mobile device. Does the animation add clarity or confusion?	Refine the 2 most awkward animations before the next session.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Refine the 2 most awkward animations before the next session.
Wrap-up	1 min	Recap: Animation is the voice of the interface.
Homework/Next Session	2 min	Complete hi-fi interactive prototype; prepare for Day 14 Mobile UI Studio Day.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
-----------------	-------------	----------------------	--------------

Formative	Daily Exit Ticket: Hi-fi prototype link submitted.	Current Session SLO	
Summative	Hi-fi prototype is the primary deliverable for client and portfolio presentation.	Mobile App Design Project	
Soft Skill Gate	Purposeful animation design and platform convention awareness.	TLO (Professional Foundations)	

Day 14: UI Design Studio Day

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 5 — Mobile App Design	Ensure all students have completed their hi-fi screens and prototype before this session.
Module/Week	Week 3: Mobile UI Design & Visual Design	Focus: Buffer and studio time for hi-fi screen refinement and prototype polish.
Session Title	Day 14: Mobile UI Studio Day	Prepare the Mobile Design Review Rubric for peer critique circles.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 14, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Refine mobile UI design deliverables to professional standard through critique and iteration.	Track student progress against Week 3 deliverables.
Session Learning Objective (SLO)	Students will refine their design system, hi-fi screens, and prototype based on peer and instructor feedback, ensuring visual consistency and interaction integrity.	Identify students who need targeted support on hi-fi completion or animation polish.
Core Deliverable Link	Refined Hi-Fi Screens + Polished Mobile Prototype	Portfolio-ready mobile UI design package.

III. Required Resources & Tech

Item	Details
Presentation/Slides	N/A (Studio Day)
Handout/Worksheet	Mobile UI Consistency Checklist.
Technology/Tools	Figma.
AI Tool Prompt	"Act as a mobile product design director. Review my hi-fi screens and prototype for visual quality, platform compliance, brand consistency, and interaction clarity."
Pre-Reading/Prep	Review Days 11–13 instructor feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"The difference between a good mobile design and a great one is the refinement session nobody sees."
Review	2 min	Overview of the three Week 3 deliverables: Design System, Hi-Fi Screens, Prototype.

Agenda & SLO	2 min	Define goals: Refinement, platform compliance check, prototype testing, and peer support.
--------------	-------	---

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Introduce the Mobile UI Consistency Checklist: Touch target sizes, platform convention compliance, animation purposefulness, contrast ratios.	Set peer critique norms: Every piece of feedback must reference the design system or platform guidelines.
I Do (Demo)	10 min	Demonstrate how to conduct a platform compliance audit: Are all components platform-appropriate? Are touch targets minimum 44x44pt?	Show how to test the prototype on a real device using the Figma Mirror app.
We Do	10 min	Peer critique circles: Review each other's hi-fi screens and prototype for visual consistency and platform compliance.	Identify students who need targeted support on animation or hi-fi completion.
Critical Analysis & Assessment	10 min	Individual refinement of hi-fi screens and prototype based on audit findings.	Confirm all Figma files are organized and prototype links are working on device.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address final technical questions on mobile UI and prototyping.
Wrap-up	1 min	Confirm goal: All students have a complete, polished hi-fi design and working prototype.

Homework/Next Session	2 min	Finalize all Week 3 deliverables; prepare for Day 15 Weekly Studio Challenge (UI Design Review).
-----------------------	-------	--

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of refined hi-fi screens and prototype.	Current Session SLO	
Summative	Completion of Week 3 deliverables.	Mobile App Design Project	
Soft Skill Gate	Engagement in peer critique and platform compliance audit.	TLO (Professional Foundations)	

Day 15: Weekly Studio Challenge (Mobile UI Design Review)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 5 — Mobile App Design	Ensure students have finalized all Week 3 deliverables before the challenge.
Module/Week	Week 3: Mobile UI Design & Visual Design	Focus: Weekly Studio Challenge — Mobile UI Design Package Presentation.

Session Title	Day 15: Weekly Studio Challenge (Mobile UI Design Review)	Prepare the Mobile Design Review Rubric.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 15, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Present the complete Mobile UI Design Package.	Link challenge to the cumulative skills of Week 3.
Session Learning Objective (SLO)	Students will present their Design System, Hi-Fi Screens, and Interactive Prototype in a simulated mobile product design review.	Ensure every design decision is justified with research or design principles — not personal preference.
Core Deliverable Link	Mobile UI Design Package	Full Week 3 studio challenge submission.

III. Required Resources & Tech

Item	Details
Presentation/Slides	
Handout/Worksheet	Design Review Rubric.
Technology/Tools	Figma
AI Tool Prompt	"Act as a mobile product design director. Review my hi-fi screens and prototype for visual quality, platform compliance, brand consistency, and interaction clarity."
Pre-Reading/Prep	Review Week 3 deliverables and instructor feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
----------	------	---------

Hook & Context	3 min	Brief scenario: "The engineering team and the CEO are in the same room. You have 10 minutes to demonstrate your mobile app design before they commit to building it."
Review	2 min	Recap Week 3: Design system, hi-fi screens, and prototype.
Agenda & SLO	2 min	Define the challenge: Present the complete Mobile UI Design Package in a product design review.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Assign the challenge: Present the Mobile UI Design Package.	Distribute the Mobile Design Review Rubric.
I Do (Demo)	10 min	Demonstrate the product design review: Design system overview, screen-by-screen walkthrough, then live prototype demo.	Model how to narrate animation intent: "This transition communicates that the user is moving deeper in the hierarchy."
We Do	10 min	Workshop: Students prepare and rehearse design reviews.	Targeted support for students behind on prototype or hi-fi completion.
Critical Analysis & Assessment	10 min	Peer reviews: Does the visual design serve the user and the brand? Does the prototype feel like a real app?	Ensure every design decision is justified with research or design principles.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address specific review and prototype questions.
Wrap-up	1 min	Summarize Week 3 accomplishments.

Homework/Next Session	2 min	Finalize Mobile UI Design Package; preview Week 4: App Store Presence, Accessibility & Portfolio.
-----------------------	-------	---

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Submission of Mobile UI Design Package.	Current Session SLO	
Summative	Completion of Week 3 deliverables.	Mobile App Design Project	
Soft Skill Gate	Professional mobile product design review delivery.	TLO (Professional Foundations)	

Day 16: App Icon Design & App Store Presence

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 5 — Mobile App Design	Ensure students have their hi-fi UI design system finalized before this session.
Module/Week	Week 4: App Store Presence, Accessibility & Portfolio	Focus: Designing a professional app icon and App Store presence.

Session Title	Day 16: App Icon Design & App Store Presence	Prepare Apple App Icon Design Guidelines and Google Play Icon Design Guidelines for reference.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 16, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Design a professional app icon and App Store presence that communicates the app's value proposition before download.	Ensure the app icon works at every size — from 1024px to 29px.
Session Learning Objective (SLO)	Students will design a scalable app icon (1024x1024) and produce a set of 5 App Store screenshots that communicate the app's core value proposition.	Focus on the icon squint test — it must be recognizable at thumbnail size.
Core Deliverable Link	App Icon + App Store Screenshots	Public-facing brand assets for the Mobile App Design capstone.

III. Required Resources & Tech

Item	Details
Presentation/Slides	App Icon Design: Rules, Constraints, and Craft; App Store Optimization Basics.
Handout/Worksheet	App Icon Design Constraints Reference; App Store Screenshot Spec Sheet.
Technology/Tools	Figma.
AI Tool Prompt	"Design a concept for an app icon for a [app type] with brand attributes: [list]. Describe the shape, symbol, color, and visual metaphor. Do not generate an image — describe the concept."

Pre-Reading/Prep	Apple App Icon Design Guidelines; Google Play Icon Design Guidelines; Best App Store Screenshots (Storemaven Blog).
------------------	---

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Browse 20 app icons in the App Store without reading names. Ask: "Which icon made you want to tap it? Which looked trustworthy? Which looked amateur? Why?"
Review	2 min	Recap Week 3: Hi-fi UI design. The app icon is the first touchpoint before the user ever opens the app.
Agenda & SLO	2 min	Design an app icon and App Store screenshot set that communicates the app's value proposition before the user downloads it.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define app icon constraints: No text, works at 1024x1024 and 60x60, must be instantly recognizable, platform-appropriate shape (iOS squircle, Android adaptive).	Show the icon designs of the top 10 apps in the App Store. Discuss what makes each work.
I Do (Demo)	10 min	Live demo: Design an app icon in Figma from scratch, testing at multiple sizes from 1024 to 29px.	Show how to test icon recognition at small sizes using blur/squint tests.
We Do	10 min	Workshop: Students design 3 app icon concepts and begin App Store screenshots.	Circulate: Does the icon work at small sizes? Is it immediately recognizable?
Critical Analysis &	10 min	Icon review: Which concept best communicates the app's purpose in one glance?	App Store screenshot review: Does the first screenshot

Assessment			communicate the primary value proposition?
------------	--	--	--

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address app icon design and App Store specification questions.
Wrap-up	1 min	Recap: The app icon is a 1024px first impression.
Homework/Next Session	2 min	Finalize App Icon and App Store Screenshots; prepare for Day 17: Accessibility & Developer Handoff.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: App Icon and App Store Screenshots submitted.	Current Session SLO	
Summative	App icon and screenshots feed into the capstone portfolio case study.	Mobile App Design Project	
Soft Skill Gate	Attention to icon scalability and App Store presentation quality.	TLO (Professional Foundations)	

Day 17: Accessibility & Developer Handoff

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 5 — Mobile App Design	Ensure students have finalized their hi-fi screens and app icon before this session.
Module/Week	Week 4: App Store Presence, Accessibility & Portfolio	Focus: Producing an accessible, developer-ready mobile app handoff.
Session Title	Day 17: Accessibility & Developer Handoff	Prepare the Stark Figma plugin and Figma Inspect Mode tutorial.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 17, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Produce an accessible, developer-ready mobile app handoff.	Ensure the handoff package is comprehensive enough for a developer to build without asking questions.
Session Learning Objective (SLO)	Students will audit their app design for WCAG 2.1 AA mobile compliance, add developer annotations, and export a complete handoff package.	Focus on developer empathy — annotations must communicate intent, not just describe what is visible.
Core Deliverable Link	Accessible Mobile Design + Handoff Package	Developer-ready mobile design package.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Mobile Accessibility Standards; Figma Inspect for Mobile Handoff.
Handout/Worksheet	Mobile Accessibility Audit Checklist; Handoff Annotation Guide.
Technology/Tools	Figma, Stark (plugin), Figma Inspect.

AI Tool Prompt	"Review my mobile app design for WCAG 2.1 AA compliance on mobile. Identify issues with contrast ratios, minimum touch target sizes, and focus order."
Pre-Reading/Prep	Mobile Accessibility Guidelines (WCAG 2.1); Figma Handoff for Developers Tutorial.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a user with low vision using a mobile app with failing color contrast. Ask: "Who did we design for? Who did we forget?"
Review	2 min	Recap Day 16: App icon and screenshots. Today we make the design work for every user and every developer.
Agenda & SLO	2 min	Conduct accessibility audits and produce a developer-ready handoff package.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define design handoff components: Spacing, component specs, interaction states, asset exports, and accessibility notes.	Show Apple Accessibility features: how the app looks with increased contrast, bold text, and large fonts enabled.
I Do (Demo)	10 min	Live demo: Run Stark accessibility audit on key screens. Annotate the Figma file with component specs for handoff.	Show Figma Inspect mode: How a developer reads spacing, component names, and interaction specs.
We Do	10 min	Workshop: Students conduct accessibility audits and add developer annotations.	Circulate: All CTAs must pass 4.5:1 contrast; all touch targets 44x44pt minimum.

Critical Analysis & Assessment	10 min	Handoff review: Can a developer build this app from the Figma file without asking a question?	Integrate handoff into the portfolio case study.
--------------------------------	--------	---	--

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Address accessibility and handoff questions.
Wrap-up	1 min	Recap: Accessibility is not optional — and it makes the app better for everyone.
Homework/Next Session	2 min	Finalize Accessible Mobile Design and Handoff Package; prepare for Day 18: Portfolio Polish & Case Study Design.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Accessibility audit results and handoff package submitted.	Current Session SLO	
Summative	Accessible design and handoff complete the capstone.	Mobile App Design Project	
Soft Skill Gate	Inclusive design thinking and developer empathy.	TLO (Professional Foundations)	

Day 18: Portfolio Polish & Case Study Design

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 5 — Mobile App Design	Transition from design execution to professional presentation.
Module/Week	Week 4: App Store Presence, Accessibility & Portfolio	Focus: Structuring the Month 5 Mobile App Design project as a professional portfolio case study.
Session Title	Day 18: Portfolio Polish & Case Study Design	Prepare world-class mobile app portfolio case study references from Dribbble or Behance.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 18, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Structure the Mobile App Design project as a professional portfolio case study.	Ensure the case study tells the story of the process, not just the output.
Session Learning Objective (SLO)	Students will curate and document their Month 5 work as a mobile app design case study incorporating research, architecture, UI design, prototype, and App Store assets.	Focus on on-device mockups — they are the most impactful way to present mobile work.
Core Deliverable Link	Month 5 Mobile App Portfolio Case Study	Professional portfolio documentation of the Mobile App Design project.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Presenting Mobile App Design Work: The Case Study That Gets You Hired.
Handout/Worksheet	Mobile Portfolio Case Study Writing Template.
Technology/Tools	Behance, Figma, Adobe Portfolio.
AI Tool Prompt	"Write a 200-word project description for a mobile app design case study. The app is [description], and my key design contributions were [list]. Emphasize user-centered process and measurable outcomes."
Pre-Reading/Prep	Best Mobile App Portfolio Case Studies (Dribbble, Behance); Writing Mobile App Case Studies (UX Collective).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"Mobile app portfolios are judged on one question: Does this designer understand mobile users? Let's prove that you do."
Review	2 min	Recap Month 5: Research, flows, wireframes, UI, prototype, App Store assets, and accessibility.
Agenda & SLO	2 min	Structure Month 5 work as a compelling, process-forward mobile app design case study.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define the mobile app case study structure: Problem, Research, User Flows, Key Design Decisions, Prototype, and Outcomes.	Show how to present on-device mockups for maximum visual impact.

I Do (Instruction)	10 min	Use AI to draft project descriptions; peer-review for specificity, UX thinking, and compelling narrative.	Help students highlight specific mobile design skills: "Designed for one-handed use with thumb-zone navigation."
We Do	10 min	Portfolio audit: High-res screens, on-device mockups, clear narrative, visible design process.	Ensure the prototype link is accessible and working in the case study.
Critical Analysis & Assessment	10 min	Assemble the Mobile App Design section of the student portfolio.	Ensure app icon, screenshots, and mockups look consistent throughout.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection	2 min	Group discussion: What is the one mobile design principle that surprised you most this month?
Q&A	1 min	Address portfolio platform questions.
Wrap-up	2 min	Recap: Your portfolio proves you design for real mobile users.
Homework/Next Session	2 min	Finalize Month 5 Portfolio Case Study; prepare for Day 19: Final Showcase Rehearsal.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of portfolio case study narrative quality.	Current Session SLO	

Summative	Month 5 Mobile App Portfolio Case Study quality.	Mobile App Design Project	
Soft Skill Gate	Ability to narrate a mobile design process compellingly.	TLO (Professional Foundations)	

Day 19: Final Showcase Rehearsal & Polishing

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 5 — Mobile App Design	Transition from creation to professional presentation.
Module/Week	Week 4: App Store Presence, Accessibility & Portfolio	Focus: Final technical rehearsal and polish before the Day 20 Showcase.
Session Title	Day 19: Final Showcase Rehearsal & Polishing	Prepare a "Technical Panic Checklist" for students to troubleshoot prototype issues.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 19, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Demonstrate complete mobile app design proficiency through professional presentation delivery.	Focus on "Stage Presence" and technical readiness.
Session Learning Objective (SLO)	Students will refine their final presentation based on peer feedback and ensure the Figma prototype is stable and ready for the Day 20 Showcase.	Focus on the live prototype demo — always have static backup screenshots ready.

Core Link	Deliverable	Finalized Mobile App Presentation Deck	Ready for the Day 20 Showcase.

III. Required Resources & Tech

Item	Details
Presentation/Slides	
Handout/Worksheet	Feedback Matrix; Technical Panic Checklist.
Technology/Tools	Figma; Presentation Software; Zoom/Meet
AI Tool Prompt	"Simulate tough questions a product manager might ask about my mobile app UX decisions during a live prototype demo."
Pre-Reading/Prep	Preparing for a product design presentation — UX Collective.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"You have built something impressive. Today we make sure your presentation does it justice."
Review	2 min	Recap the pitch structure from Day 18.
Agenda & SLO	2 min	Remove all friction: prototype bugs, unclear slides, and weak talking points.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
-------	------	--------------------------	---------------------------

Hook & Context	10 min	Managing live prototype presentations: What to do when something breaks in front of an audience.	Always have a static backup: Screenshot the key screens in case the prototype fails.
I Do (Demo)	10 min	Technical Dry Run: Screen sharing, switching between slides and the Figma mobile prototype.	Show how to use Figma Mirror app for an authentic on-device prototype demo.
We Do	10 min	Full-group dress rehearsal: Each student presents 3 minutes for peer feedback.	Focus feedback on confidence, clarity, and prototype fluency.
Critical Analysis & Assessment	10 min	Stress Test: Peer Q&A challenging design decisions and research validity.	Coach students on handling "Why did you choose this over that?" with confidence.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	2 min	Final technical advice.
Wrap-up	1 min	You are ready. Trust your process.
Homework/Next Session	2 min	Final rest and polish; Tomorrow: Showcase.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Green light signal for presentation readiness.	Current Session SLO	
Summative	Finalized presentation deck and prototype.	Mobile App Design Project	

Soft Skill Gate	Professional composure and resilience under pressure.	TLO (Professional Foundations)	

Day 20: Monthly Final Challenge (Website Redesign Showcase)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 5 — Mobile App Design	The cumulative "Final Boss" session for Month 5.
Module/Week	Week 4: App Store Presence, Accessibility & Portfolio	Focus: Complete mobile app design execution and final showcase presentation.
Session Title	Day 20: Monthly Final Challenge (Mobile App Design Showcase)	Set up a "Product Launch" environment for student final presentations.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 20, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Demonstrate complete mobile app design proficiency through a research-driven, professionally presented mobile product.	Evaluate the holistic quality of the student's month-long mobile design process.
Session Learning Objective (SLO)	Students will present their complete Mobile App Design — research, wireframes, hi-fi design, prototype, App Store assets, and case study — in a simulated app launch pitch.	Final check: Does every design decision reflect mobile-first thinking and user-centered research?

Core Deliverable Link	Integrated Mobile App Design Portfolio	The ultimate deliverable for Month 5 certification.
-----------------------	--	---

III. Required Resources & Tech

Item	Details
Presentation/Slides	Monthly Challenge: The Mobile App Design Final Showcase.
Handout/Worksheet	Final Presentation Rubric.
Technology/Tools	Figma, Behance.
AI Tool Prompt	"Simulate a venture capitalist evaluating my mobile app design. What are the 3 toughest questions they would ask about the user experience and market positioning?"
Pre-Reading/Prep	Review Month 5 Instructor Feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"Today you are not just a student presenting an app. You are a mobile product designer showcasing your craft."
Review	2 min	Recap Month 5 milestones: Research & Platform Conventions, Wireframes & Prototype, UI Design & Animation, App Store & Accessibility.
Agenda & SLO	2 min	Final check: Does the complete presentation tell a coherent, mobile-first user-centered design story?

III. Session Flow (60 Minutes)

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Demo)	10 min	Demonstrate the final presentation structure: Research insight → Architecture → UI walkthrough → Live prototype demo → App Store presence.	Model how to present the on-device prototype for maximum impact.
We Do	10 min	Full presentations: Each student presents their complete Mobile App Design.	Panel critique: Instructor + 2 peers evaluate against the Mobile App Design Rubric.
Critical Analysis & Assessment	20 min	Portfolio Showcase: Final presentations submitted.	Celebrate the growth from graphic design student to mobile product designer.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Final presentation delivery and quality.	Current Session SLO	
Summative	Complete and professional Mobile App Design submission.	Mobile App Design Project	
Soft Skill Gate	Professional mobile app presentation delivery.	TLO (Professional Foundations)	

Month 6 — SaaS Platform Design

Day 1: Introduction to SaaS Design & Product Thinking

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Ensure students understand the shift from consumer-facing design to enterprise product design.
Module/Week	Week 1: SaaS Product Strategy & Research	Focus: Establishing SaaS product thinking and the unique design challenges of enterprise software.
Session Title	Day 1: Introduction to SaaS Design & Product Thinking	Prepare a professional SaaS dashboard (Notion, Linear, or HubSpot) for the opening analysis.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 1, Week 1	

Instructor	Instructor Name	
------------	-----------------	--

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Understand the unique design challenges of SaaS product design.	Link session back to the capstone SaaS Platform Design project.
Session Learning Objective (SLO)	Students will define SaaS product design principles, differentiate B2B from B2C UX, analyze a professional SaaS dashboard, and define the capstone SaaS product brief.	Focus on enterprise UX principles — power users need efficiency, not hand-holding.
Core Deliverable Link	SaaS Product Brief & Competitive Audit	Strategic foundation for the Month 6 capstone SaaS Platform project.

III. Required Resources & Tech

Item	Details
Presentation/Slides	What is SaaS Design? The Shift from Consumer to Enterprise UX.
Handout/Worksheet	SaaS Product Brief Template; SaaS Competitive Audit Framework.
Technology/Tools	Figma, ChatGPT.
AI Tool Prompt	"Audit the dashboard UX of [SaaS product name] from the perspective of a power user. Identify 3 strengths and 3 weaknesses in the information architecture and data visualization."
Pre-Reading/Prep	The Design of Everyday SaaS (Intercom Blog); UX for Enterprise Software (NNGroup).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
----------	------	---------

Hook & Context	3 min	Open a professional SaaS dashboard (Notion, Linear, or HubSpot). Ask: "What makes this feel different from a consumer app? What is the primary goal of a user here?"
Review	2 min	Overview of the Month 6 program structure and the capstone SaaS Platform Design project.
Agenda & SLO	2 min	Define SaaS design principles and establish the product brief for the capstone project.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define SaaS design characteristics: Data-dense interfaces, power users, multi-role access, onboarding complexity, retention-focused UX.	Contrast: "A consumer app must be learned in 30 seconds. A SaaS product may take 30 days — but must reward that investment."
I Do (Instructor)	10 min	Live demo: Conduct a SaaS competitive audit using ChatGPT. Analyze dashboard structure, key workflows, and monetization cues.	Show how enterprise UX prioritizes efficiency over aesthetics: "The best dashboard is the one you never have to look at."
We Do	10 min	Workshop: Students draft their SaaS product brief and conduct a competitive audit of 2 competitors.	Circulate: Is the product brief defining a real workflow problem, not just a feature list?
Critical Analysis & Assessment	10 min	Product brief review: Is the SaaS product solving a specific, measurable workflow problem for a defined user role?	Connect to capstone: Every design decision must solve the workflow problem defined today.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
----------	------	---------

Q&A	1 min	Clarify SaaS product brief and competitive audit requirements.
Wrap-up	2 min	Recap: SaaS design is about making complex workflows feel inevitable.
Homework/Next Session	2 min	Finalize SaaS Product Brief and Competitive Audit; research target user role for Day 2.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: SaaS Product Brief and Competitive Audit submitted.	Current Session SLO	
Summative	Brief and audit inform all capstone design decisions.	SaaS Platform Design Project	
Soft Skill Gate	Enterprise-level product thinking in brief development.	TLO (Professional Foundations)	

Day 2: SaaS User Research & Stakeholder Mapping

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Ensure students have selected their target industry and user role before the session.
Module/Week	Day 2: SaaS User Research & Stakeholder Mapping	Focus: Conducting SaaS-specific user research and stakeholder mapping.

Session Title	Day 2: SaaS User Research & Stakeholder Mapping	Prepare the Workflow Interview Script and Stakeholder Map Template.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 2, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Conduct SaaS-specific user research and stakeholder mapping.	Ensure research captures the multi-role complexity of enterprise software — buyers, champions, and daily users are different people.
Session Learning Objective (SLO)	Students will map the SaaS user ecosystem (Admin, Power User, Occasional User), conduct 2 workflow interviews, and identify the 3 primary workflow pain points driving the capstone design.	Focus on workflow specificity — "Walk me through your last Monday morning in [tool]. Step by step."
Core Deliverable Link	SaaS User Research Report & Stakeholder Map	Multi-role research foundation for the SaaS Platform capstone.

III. Required Resources & Tech

Item	Details
Presentation/Slides	SaaS User Ecosystems: Multi-Role, Multi-Goal Research.
Handout/Worksheet	Workflow Interview Script; Stakeholder Map Template.
Technology/Tools	Figma, ChatGPT.
AI Tool Prompt	"Generate 10 workflow-focused interview questions for a [user role] who uses a [SaaS type] tool daily. Focus on inefficiencies, workarounds, and ideal outcomes."
Pre-Reading/Prep	Stakeholder Mapping for Product Design (IxDF); B2B User Research Methods (Maze Blog).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a SaaS pricing page with 3 tiers: Individual, Team, Enterprise. Ask: "Who is making the buying decision? Who is doing the daily work? Are they the same person?"
Review	2 min	Recap Day 1: SaaS product brief and competitive audit.
Agenda & SLO	2 min	Define the session: Mapping the SaaS user ecosystem and conducting workflow-focused research.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define SaaS user roles: Economic Buyer (makes purchase decisions), Champion (internal advocate), Power User (daily user), Occasional User (periodic user).	Show how each role has different success metrics: The buyer wants ROI; the power user wants speed; the occasional user wants simplicity.
I Do (Instructor)	10 min	Live demo: Map the SaaS user ecosystem in FigJam and design a workflow-focused interview script using ChatGPT.	Show how to probe for the real workflow: "Walk me through your last Monday morning in [tool]. Step by step."
We Do	10 min	Workshop: Students map their user ecosystem and conduct a 5-minute workflow interview with a classmate.	Circulate: Are interview findings capturing specific workflow friction points, not general opinions?
Critical Analysis & Assessment	10 min	Research synthesis: What is the #1 workflow inefficiency driving the capstone product design?	Connect to Information Architecture: The workflow must drive the navigation structure.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	1 min	Address SaaS research methodology questions.
Wrap-up	2 min	Recap: SaaS design starts with workflow, not interface.
Homework/Next Session	2 min	Complete 2 workflow interviews; finalize SaaS User Research Report.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: SaaS User Research Report and Stakeholder Map submitted.	Current Session SLO	
Summative	Research drives the capstone information architecture and workflow design.	SaaS Platform Design Project	
Soft Skill Gate	Empathy for enterprise user roles and workflow complexity.	TLO (Professional Foundations)	

Day 3: SaaS Information Architecture & Navigation Design

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Ensure students have completed their workflow interviews and

		stakeholder map before the session.
Module/Week	Day 3: SaaS Information Architecture & Navigation Design	Focus: Designing a scalable SaaS information architecture and navigation system.
Session Title	Day 1: Introduction to SaaS Design & Product Thinking	Prepare the FigJam IA Sitemap Template and SaaS Navigation Pattern Reference.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 3, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Design a scalable SaaS information architecture.	Ensure the IA is organized by user workflow, not by product feature taxonomy.
Session Learning Objective (SLO)	Students will design a multi-level SaaS navigation structure (sidebar nav, breadcrumbs, contextual menus) and sitemap that scales from single user to enterprise team.	Focus on scalability — "If we added 10 more features tomorrow, where would they go?"
Core Deliverable Link	SaaS IA Sitemap & Navigation Architecture	Structural blueprint for the SaaS Platform capstone.

III. Required Resources & Tech

Item	Details
Presentation/Slides	SaaS Navigation Patterns: Sidebar, Top Nav, Contextual Menus.
Handout/Worksheet	SaaS Navigation Pattern Reference; IA Sitemap Template.
Technology/Tools	FigJam, Figma.
AI Tool Prompt	"Design a navigation architecture for a [SaaS type] used by teams of 10-500 people. Include primary nav, secondary nav, and contextual menus. Organize by user role and workflow frequency."

Pre-Reading/Prep	SaaS Navigation Design Patterns (Smashing Magazine); Enterprise IA Principles (NNGroup).
------------------	--

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Compare the navigation of a consumer app (5 tabs) vs. a SaaS platform (30+ features in a sidebar). Ask: "How does this scale? How do you prevent the sidebar from becoming a maze?"
Review	2 min	Recap Day 2: User research workflow findings. The IA must reflect the workflow, not the org chart.
Agenda & SLO	2 min	Design a multi-level SaaS navigation architecture that scales with user role and product growth.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define SaaS IA patterns: Sidebar navigation (primary), command palette (power user), breadcrumbs (deep-linking), contextual menus (action-on-selection).	Show how Notion, Linear, and Figma each solve the "scale" problem differently.
I Do (Instructor)	10 min	Live demo: Design a SaaS sidebar navigation architecture in FigJam and build the first pass in Figma.	Show how to use Figma frames for the nav pattern: collapsed, expanded, and mobile-responsive states.
We Do	10 min	Workshop: Students design their SaaS IA sitemap and primary navigation architecture.	Circulate: Is the navigation organized by user workflow or product feature taxonomy?
Critical Analysis &	10 min	Navigation review: Can a new user find the 3 primary features in under 20 seconds?	Connect to wireframe phase: Navigation architecture governs all screen wireframes.

Assessment			
------------	--	--	--

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	1 min	Address SaaS navigation and IA questions.
Wrap-up	2 min	Recap: SaaS navigation is an information architecture problem, not a visual design problem.
Homework/Next Session	2 min	Finalize SaaS IA Sitemap and Navigation Architecture; prepare for Day 4 Practice + Support Day.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: SaaS IA Sitemap and Navigation Architecture submitted.	Current Session SLO	
Summative	IA and navigation drive all wireframe and dashboard decisions.	SaaS Platform Design Project	
Soft Skill Gate	Workflow-driven information architecture thinking.	TLO (Professional Foundations)	

Day 4: Practice + Support Day

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Ensure all students have access to Days 1–3 research deliverables and instructor feedback.
Module/Week	Week 1: SaaS Product Strategy & Research	Focus: Buffer and studio time for consolidation of Week 1 SaaS product strategy deliverables.
Session Title	Day 4: Practice + Support Day	Prepare the SaaS Strategy Quality Audit Checklist for studio use.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 4, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Consolidate SaaS product strategy and IA deliverables.	Track student progress against Week 1 deliverables.
Session Learning Objective (SLO)	Students will refine their SaaS Product Brief, User Research Report, and Navigation Architecture based on instructor and peer feedback.	Confirm all students are caught up on all four Week 1 SaaS strategy deliverables.
Core Deliverable Link	Week 1 Deliverables: Product Brief, User Research, Stakeholder Map, IA & Navigation	Confirm all students are caught up on all four Week 1 SaaS strategy deliverables.

III. Required Resources & Tech

Item	Details
Presentation/Slides	N/A (Studio Day)

Handout/Worksheet	SaaS Strategy Quality Audit Checklist.
Technology/Tools	FigJam, Figma, ChatGPT.
AI Tool Prompt	"Review my SaaS navigation architecture for enterprise scalability. Will this structure still work when the product has 3x the current features?"
Pre-Reading/Prep	Review instructor feedback from Days 1–3.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"In SaaS design, a wrong architectural decision in Week 1 costs 10x more to fix in Week 3. Today we get the architecture right."
Review	2 min	Overview of Week 1 SaaS strategy deliverables and their role in the capstone.
Agenda & SLO	2 min	Goals: Refine, support, and catch up on Week 1 SaaS product strategy and IA deliverables.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Outline studio expectations: refinement, enterprise scalability check, and peer support.	Set constructive critique norms: Feedback must reference SaaS UX principles.
I Do (Instructor)	10 min	Demonstrate how to audit a SaaS navigation architecture for scalability: "If we added 10 more features tomorrow, where would they go?"	Model the scalability test: Add 5 hypothetical features to the architecture and see if it breaks.

We Do	10 min	Peer critique circles: Audit each other's navigation architectures for workflow alignment and scalability.	Identify learners who need targeted support on IA structure.
Critical Analysis & Assessment	10 min	Individual refinement of Week 1 deliverables.	Confirm all FigJam and Figma files are organized and accessible.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	1 min	Address final roadblocks for Week 1 completion.
Wrap-up	2 min	Confirm goal: All students are caught up on Week 1 deliverables.
Homework/Next Session	2 min	Finalize all Week 1 deliverables; prepare for Day 5 Weekly Studio Challenge.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of refined Week 1 SaaS strategy deliverables.	Current Session SLO	
Summative	Completion of Week 1 deliverables.	SaaS Platform Design Project	
Soft Skill Gate	Enterprise-level scalability thinking in IA critique.	TLO (Professional Foundations)	

Day 5: Weekly Studio Challenge (SaaS Product Strategy Package)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Ensure students have finalized all Week 1 deliverables before the challenge.
Module/Week	Week 1: SaaS Product Strategy & Research	Focus: Weekly Studio Challenge — SaaS Product Strategy Package Presentation.
Session Title	Day 5: Weekly Studio Challenge (SaaS Product Strategy Package)	Prepare the Enterprise Product Strategy Meeting Rubric.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 5, Week 1	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Present the complete SaaS Product Strategy Package.	Link challenge to the cumulative skills of Week 1.
Session Learning Objective (SLO)	Students will present their SaaS Product Strategy Package in a simulated enterprise product strategy meeting.	Ensure every architectural decision is justified with user research.
Core Deliverable Link	SaaS Product Strategy Package	Final Week 1 studio challenge submission.

III. Required Resources & Tech

Item	Details
Presentation/Slides	
Handout/Worksheet	Design Review Rubric

Technology/Tools	Figma, FigJam.
AI Tool Prompt	"Simulate an enterprise CTO evaluating my SaaS product strategy. What are the 3 hardest questions they would ask about scalability, security, and workflow fit?"
Pre-Reading/Prep	Review Week 1 deliverables and instructor feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Brief scenario: "A Series A startup has hired you to design their SaaS platform. The CTO and Head of Product are in the room. You have 10 minutes to present your product strategy."
Review	2 min	Recap Week 1: Product brief, research, stakeholder mapping, and IA.
Agenda & SLO	2 min	Recap Week 1: Product brief, research, stakeholder mapping, and IA.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Assign the challenge: Present the SaaS Product Strategy Package as an enterprise product strategy briefing.	Distribute the Enterprise Product Strategy Meeting Rubric.
I Do (Instruction)	10 min	Demonstrate the enterprise strategy briefing format: Market opportunity, user research, user roles, workflow analysis, navigation architecture.	Model enterprise-level presentation language: data-driven, concise, and scalability-focused.
We Do	10 min	Workshop: Students finalize packages and rehearse presentations.	Targeted support for students behind on IA or research.

Critical Analysis & Assessment	10 min	Peer presentations: Does the strategy solve a real enterprise workflow problem at scale?	Ensure every architectural decision is justified with user research.
--------------------------------	--------	--	--

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	1 min	Address specific presentation questions.
Wrap-up	2 min	Summarize Week 1 accomplishments.
Homework/Next Session	2 min	Finalize SaaS Product Strategy Package; preview Week 2: Dashboard Design & Data Visualization.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Submission of SaaS Product Strategy Package.	Current Session SLO	
Summative	Completion of Week 1 deliverables.	SaaS Platform Design Project	
Soft Skill Gate	Professional enterprise product strategy presentation delivery.	TLO (Professional Foundations)	

Day 6: Dashboard UX Design Principles

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Ensure students have their SaaS navigation architecture finalized before the session.
Module/Week	Week 2: Dashboard Design & Data Visualization	Focus: Applying dashboard UX principles to design effective data-dense interfaces.
Session Title	Day 6: Dashboard UX Design Principles	Prepare the Dashboard Design Principles Reference and Dashboard Wireframe Template.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 6, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Apply dashboard UX principles to design effective data-dense interfaces.	Ensure the dashboard is organized by user priority, not data availability.
Session Learning Objective (SLO)	Students will design a primary SaaS dashboard wireframe applying the 5 dashboard design principles: clarity, relevance, hierarchy, action, and context.	Focus on the "10-second rule" — the primary user must answer their top 3 questions in 10 seconds.
Core Deliverable Link	SaaS Dashboard Wireframe	Core dashboard structure for the SaaS Platform capstone.

III. Required Resources & Tech

Item	Details
Presentation/Slides	The 5 Laws of Dashboard Design; From Raw Data to Actionable Interface.
Handout/Worksheet	Dashboard Design Principles Reference; Dashboard Wireframe Template.

Technology/Tools	Figma, ChatGPT.
AI Tool Prompt	"Design a dashboard for a [SaaS type] for a [user role]. Identify the 5 most critical KPIs they need to see immediately, and suggest the optimal data visualization type for each."
Pre-Reading/Prep	Information Dashboard Design — Stephen Few; Dashboard Design Patterns (UX Collective).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a dashboard with 30 charts vs. a dashboard with 5 clear KPIs and one primary action. Ask: "Which one helps you make a decision in under 10 seconds?"
Review	2 min	Recap Week 1: SaaS navigation architecture. Today we design the most visible screen of the platform: the dashboard.
Agenda & SLO	2 min	Apply the 5 dashboard design principles to wireframe the primary SaaS dashboard.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define the 5 Dashboard Design Laws: Clarity (no clutter), Relevance (right data for the role), Hierarchy (most critical = most prominent), Action (every insight leads to a next step), Context (data in comparison).	Use the "newspaper front page" analogy: What is the headline? What is the subhead? What is below the fold?
I Do (Instructor)	10 min	Live demo: Wireframe a SaaS dashboard for a project management tool in Figma.	Show the grid-based approach to dashboard layout: Define content zones first, then populate with components.

We Do	10 min	Workshop: Students wireframe their primary SaaS dashboard.	Circulate: Is the dashboard organized by user priority or by data availability?
Critical Analysis & Assessment	10 min	Dashboard review: Can the primary user answer their top 3 workflow questions from this dashboard in 10 seconds?	Connect to data viz day: These dashboard zones will be populated with the right chart types in Day 7.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	1 min	Address dashboard design and wireframing questions.
Wrap-up	2 min	Recap: A great dashboard is not about showing more data — it is about answering the right questions.
Homework/Next Session	2 min	Finalize SaaS Dashboard Wireframe; prepare for Day 7: Data Visualization Design.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: SaaS Dashboard Wireframe submitted.	Current Session SLO	
Summative	Dashboard wireframe feeds directly into the hi-fi design phase.	SaaS Platform Design Project	
Soft Skill Gate	User-centered data hierarchy thinking in dashboard design.	TLO (Professional Foundations)	

Day 7: Data Visualization Design

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Ensure students have their dashboard wireframe zones defined before the session.
Module/Week	Week 2: Dashboard Design & Data Visualization	Focus: Selecting and designing appropriate data visualizations for SaaS dashboards.
Session Title	Day 7: Data Visualization Design	Prepare the Chart Selection Guide and Data Visualization Accessibility Checklist.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 7: Data Visualization Design	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Select and design appropriate data visualizations for SaaS dashboards.	Ensure every chart type is matched to its data story — wrong chart = wrong insight.
Session Learning Objective (SLO)	Students will select the correct chart type for 5 different data stories, design them in Figma using best-practice data visualization principles, and integrate them into the dashboard wireframe.	Focus on accessibility — never rely on color alone to convey data meaning.
Core Deliverable Link	Data Visualization Set (5 Charts)	Data visualization layer for the SaaS Dashboard design.

III. Required Resources & Tech

Item	Details
------	---------

Presentation/Slides	Choosing the Right Chart: A Data Story Framework; Accessibility in Data Visualization.
Handout/Worksheet	Chart Selection Guide; Data Visualization Accessibility Checklist.
Technology/Tools	Figma, Recharts reference, Google Charts documentation.
AI Tool Prompt	"I need to show [data story: e.g., revenue trend over 12 months] in a SaaS dashboard. Recommend the optimal chart type, the key design considerations, and any accessibility requirements."
Pre-Reading/Prep	The Visual Display of Quantitative Information — Edward Tufte (excerpts); Data Visualization for UX Designers (NNGroup).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show the same data told with a pie chart vs. a bar chart vs. a line chart. Ask: "Which one answers 'How has this changed over time?' most clearly?"
Review	2 min	Recap Day 6: Dashboard wireframe zones. Today we populate them with the right visualization for each data story.
Agenda & SLO	2 min	Select optimal chart types for each dashboard data story and design them with accessibility in mind.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define chart selection by data story type: Comparison (bar chart), Trend (line chart), Composition (stacked bar/area), Distribution (histogram), Relationship (scatter).	Introduce the chart design hierarchy: Purpose → Data → Visual encoding → Label → Color.

I Do (Instruction)	10 min	Live demo: Design a line chart, KPI card, and bar chart in Figma applying data visualization best practices.	Show how to maintain color accessibility in data charts: Never rely on color alone.
We Do	10 min	Workshop: Students design 5 data visualizations for their dashboard data stories.	Circulate: Is each chart type matched to its data story? Are axis labels clear and units defined?
Critical Analysis & Assessment	10 min	Data viz review: Remove all charts from context. Can you still understand the data story?	Integrate charts into the dashboard wireframe and assess overall information hierarchy.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	1 min	Address chart design and data visualization questions.
Wrap-up	2 min	Recap: The best chart is the one that makes the insight obvious without explanation.
Homework/Next Session	2 min	Finalize 5 data visualizations; prepare for Day 8: Core Workflow Screens Design.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: 5 data visualizations submitted.	Current Session SLO	
Summative	Data visualizations are core to the SaaS dashboard design.	SaaS Platform Design Project	

Soft Skill Gate	Data literacy and chart selection accuracy.	TLO (Professional Foundations)	
-----------------	---	--------------------------------	--

Day 8: Core Workflow Screens Design

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Ensure students have their dashboard wireframe and data visualizations finalized before this session.
Module/Week	Week 2: Dashboard Design & Data Visualization	Focus: Designing high-fidelity SaaS workflow screens using enterprise UI patterns.
Session Title	Day 8: Core Workflow Screens Design	Prepare the SaaS UI Pattern Library Reference (Shopify Polaris, IBM Carbon, or Atlassian).
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 8, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Design high-fidelity SaaS workflow screens using enterprise UI patterns.	Ensure workflow screens prioritize power user efficiency — every click must count.
Session Learning Objective (SLO)	Students will design 5 core SaaS workflow screens (List view, Detail view, Creation modal, Settings page, and Empty state) following enterprise UI standards.	Focus on data table design — scannable rows, sortable columns, and actionable row interactions.

Core Deliverable Link	Core Workflow Screens (5 screens)	Primary workflow interface screens for the SaaS Platform capstone.
-----------------------	-----------------------------------	--

III. Required Resources & Tech

Item	Details
Presentation/Slides	Enterprise UI Patterns: Tables, Forms, Modals, and Empty States.
Handout/Worksheet	SaaS UI Pattern Library Reference.
Technology/Tools	Figma.
AI Tool Prompt	"Design a list view UI for a [SaaS type] showing [data type]. Describe the column structure, sorting options, filtering controls, and row interaction patterns for a power user."
Pre-Reading/Prep	Enterprise UI Patterns (Shopify Polaris Design System); SaaS UX Best Practices (Hotjar Blog).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show a data table with 100 rows and no filtering. Now show the same table with column sorting, global search, and row actions. Ask: "Which experience respects the user's time?"
Review	2 min	Recap Day 7: Data visualizations for the dashboard. Today we design the workflow screens users spend most of their time in.
Agenda & SLO	2 min	Design the core SaaS workflow screens using enterprise UI patterns.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
-------	------	--------------------------	---------------------------

Hook & Context	10 min	Define core SaaS workflow screen types: List view (data tables), Detail view (single record), Creation/Edit modal (forms), Settings page, Empty state.	Show how Shopify Polaris, IBM Carbon, and Atlassian Design Systems define these patterns.
I Do (Instruction)	10 min	Live demo: Design a data table (List view) in Figma with columns, sorting, row selection, bulk actions, and pagination.	Show how to maintain visual hierarchy in data-dense tables: Alternating rows, column widths, truncation.
We Do	10 min	Workshop: Students design 5 core workflow screens for their SaaS platform.	Circulate: Are tables scannable? Are form fields grouped logically? Are modals dismissible?
Critical Analysis & Assessment	10 min	Workflow screen review: Does the power user have the tools they need without hunting?	Integrate workflow screens with the dashboard for a first full platform preview.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	1 min	Address enterprise UI pattern and data table design questions.
Wrap-up	2 min	Recap: Enterprise UI respects the power user's context and efficiency.
Homework/Next Session	2 min	Finalize core workflow screens; prepare for Day 9 Dashboard & Workflow Studio Day.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)

Formative	Daily Exit Ticket: 5 core workflow screens submitted.	Current Session SLO	
Summative	Workflow screens form the core of the SaaS Platform capstone.	SaaS Platform Design Project	
Soft Skill Gate	Power user empathy in enterprise workflow screen design.	TLO (Professional Foundations)	

Day 9: Dashboard & Workflow Studio Day

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Ensure all students have completed their dashboard wireframe and core workflow screens before this session.
Module/Week	Week 2: Dashboard Design & Data Visualization	Focus: Buffer and studio time for dashboard and workflow screen refinement.
Session Title	Day 9: Dashboard & Workflow Studio Day	Prepare the SaaS Design Review Rubric for peer critique circles.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 9, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
-------	-------	---------------------

Terminal Learning Outcome (TLO) Link	Refine dashboard and workflow screen deliverables through critique and iteration.	Track student progress against Week 2 deliverables.
Session Learning Objective (SLO)	Students will refine their SaaS dashboard wireframe, data visualizations, and core workflow screens based on peer and instructor feedback.	Identify students who need targeted support on data table design or dashboard hierarchy.
Core Deliverable Link	Refined Dashboard + Workflow Screens	Portfolio-ready SaaS design package.

III. Required Resources & Tech

Item	Details
Presentation/Slides	N/A (Studio Day)
Handout/Worksheet	SaaS Dashboard Quality Audit Checklist.
Technology/Tools	Figma.
AI Tool Prompt	"Act as a SaaS product designer reviewing my dashboard and workflow screens. Identify any UX patterns that would frustrate a power user."
Pre-Reading/Prep	Review Days 6–8 instructor feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"In SaaS design, the workflow screens are where users spend 80% of their time. Getting these right is more important than making the dashboard beautiful."
Review	2 min	Overview of the three Week 2 deliverables: Dashboard Wireframe, Data Visualizations, Core Workflow Screens.
Agenda & SLO	2 min	Define goals: Refinement, power user audit, data visualization accuracy, and peer support.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Introduce the Power User Audit: Can the primary task be completed in 3 clicks or fewer? Is all critical data visible without scrolling?	Set peer critique norms: Feedback must reference a specific SaaS UX principle.
I Do (Instructor)	10 min	Demonstrate how to conduct a data hierarchy audit on the dashboard: Does the most important KPI have the most visual prominence?	Show how to use Figma's grid overlay to verify alignment and spacing consistency.
We Do	10 min	Peer critique circles: Conduct power user audits on each other's dashboard and workflow screens.	Identify students who need targeted support on data table design or visualization accuracy.
Critical Analysis & Assessment	10 min	Individual refinement of dashboard and workflow screens based on audit findings.	Confirm all Figma files are organized and ready for the Week 2 challenge.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	1 min	Address final technical questions on dashboard and workflow design.
Wrap-up	2 min	Confirm goal: All students have a refined dashboard and 5 complete workflow screens.
Homework/Next Session	2 min	Finalize all Week 2 deliverables; prepare for Day 10 Weekly Studio Challenge (Dashboard & Workflow Review).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of refined dashboard and workflow screen deliverables.	Current Session SLO	
Summative	Completion of Week 2 deliverables.	SaaS Platform Design Project	
Soft Skill Gate	Power user empathy in peer critique.	TLO (Professional Foundations)	

Day 10: Weekly Studio Challenge (Dashboard & Workflow Review)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Ensure students have finalized all Week 2 deliverables before the challenge.
Module/Week	Week 2: Dashboard Design & Data Visualization	Focus: Weekly Studio Challenge — Dashboard & Workflow Design Package Presentation.
Session Title	Day 10: Weekly Studio Challenge (Dashboard & Workflow Review)	Prepare the SaaS Design Review Rubric.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 10, Week 2	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
-------	-------	---------------------

Terminal Learning Outcome (TLO) Link	Present the complete Dashboard & Workflow Design Package.	Link session back to the capstone SaaS Platform Design project.
Session Learning Objective (SLO)	Students will present their SaaS dashboard wireframe, data visualizations, and workflow screens in a simulated product design review with stakeholders.	Focus on enterprise UX principles — power users need efficiency, not hand-holding.
Core Deliverable Link	Dashboard & Workflow Design Package	Full Week 2 studio challenge submission.

III. Required Resources & Tech

Item	Details
Presentation/Slides	
Handout/Worksheet	SaaS Design Review Rubric.
Technology/Tools	Figma
AI Tool Prompt	"Act as a SaaS product manager reviewing my dashboard and workflow design package. Identify the top 3 design improvements that would most increase power user efficiency."
Pre-Reading/Prep	Review Week 2 deliverables and instructor feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Brief scenario: "The product manager and 3 enterprise customers are in the room. You have 10 minutes to present your dashboard and workflow designs before they commit to the product roadmap."
Review	2 min	Recap Week 2: Dashboard wireframe, data visualizations, and core workflow screens.
Agenda & SLO	2 min	Define the challenge: Present the Dashboard & Workflow Design Package in a product design review.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Assign the challenge: Structure and present the Dashboard & Workflow Design Package.	Distribute the SaaS Design Review Rubric.
I Do (Instructor)	10 min	Demonstrate the product design review format: Start with the user problem, show the dashboard, walk through the primary workflow, present key screen patterns.	Model how to justify data visualization choices: "I chose a line chart because the primary data story is trend over time."
We Do	10 min	Workshop: Students finalize packages and prepare presentations.	Targeted support for students behind on workflow screens or data visualizations.
Critical Analysis & Assessment	10 min	Peer design reviews: Does the dashboard answer the right questions? Do the workflow screens serve the power user?	Ensure every design decision is justified with a user research finding or design principle.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	1 min	Address specific review questions.
Wrap-up	2 min	Summarize Week 2 accomplishments.
Homework/Next Session	2 min	Finalize Dashboard & Workflow Design Package; preview Week 3: SaaS UI Design System & Hi-Fi Screens.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Submission of Dashboard & Workflow Design Package.	Current Session SLO	
Summative	Completion of Week 2 deliverables.	SaaS Platform Design Project	
Soft Skill Gate	Professional product design review delivery.	TLO (Professional Foundations)	

Day 11: SaaS UI Design System Setup

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Ensure students have their dashboard wireframe and workflow screens finalized before this session.
Module/Week	Week 3: SaaS UI Design System & Hi-Fi Screens	Focus: Building a SaaS-specific UI design system with enterprise component library.
Session Title	Day 11: SaaS UI Design System Setup	Prepare the Shopify Polaris or IBM Carbon design system as reference.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 11, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
-------	-------	---------------------

Terminal Learning Outcome (TLO) Link	Build a SaaS-specific UI design system with an enterprise component library.	Ensure the design system scales — every component must work in data-dense, multi-role contexts.
Session Learning Objective (SLO)	Students will establish a SaaS UI Design System (colors, typography, spacing, and enterprise components: tables, forms, modals, buttons, badges, navigation) in Figma.	Focus on enterprise component density — SaaS components must pack more utility into less space than consumer app components.
Core Deliverable Link	SaaS UI Design System & Enterprise Component Library	Design system foundation for the SaaS Platform capstone.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Enterprise Design Systems: Density, Utility, and Consistency at Scale.
Handout/Worksheet	SaaS Enterprise Component Checklist.
Technology/Tools	Figma.
AI Tool Prompt	"Suggest a SaaS UI design system for a [platform type] with [user roles]. Include color palette (accessible), type scale for data-dense interfaces, spacing system, and enterprise component list."
Pre-Reading/Prep	Shopify Polaris Design System; IBM Carbon Design System; Atlassian Design System.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show the Shopify Polaris design system component library. Ask: "Why does a product company invest millions in building and maintaining a design system like this?"
Review	2 min	Recap Week 2: Dashboard wireframe and workflow screens. Today we add the visual layer and build the component library.

Agenda & SLO	2 min	Build the SaaS UI design system that will govern all Week 3 visual design work.
--------------	-------	---

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define SaaS design system components: Data tables, form fields, modals, buttons (primary, secondary, destructive, ghost), badges, tooltips, navigation items.	Discuss compact vs. comfortable density modes: Power users prefer compact; occasional users prefer comfortable.
I Do (Instructor)	10 min	Live demo: Build a data table component with sorting, selection, and action states using Figma variants and auto layout.	Show how a single component with variants eliminates the need for 12 separate table designs.
We Do	10 min	Workshop: Students build their SaaS design system — colors, type scale, and 5 core enterprise components.	Circulate: Check component anatomy — does each component cover all required states?
Critical Analysis & Assessment	10 min	Design system audit: Are all components consistent with the system? Do they work in data-dense layouts?	Design system audit: Are all components consistent with the system? Do they work in data-dense layouts?

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	1 min	Address Figma variants, component states, and enterprise design system questions.
Wrap-up	2 min	Recap: The enterprise design system is the product team's most valuable design asset.

Homework/Next Session	2 min	Complete SaaS design system and enterprise component library; prepare for Day 12: Hi-Fi Dashboard & Workflow UI.
-----------------------	-------	--

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: SaaS Design System and Enterprise Component Library submitted.	Current Session SLO	
Summative	Design system governs all UI design for the SaaS Platform capstone.	SaaS Platform Design Project	
Soft Skill Gate	Enterprise-scale systematic component thinking.	TLO (Professional Foundations)	

Day 12: Hi-Fi Dashboard & Workflow UI Design

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Ensure students have their SaaS design system and enterprise component library finalized before this session.
Module/Week	Week 3: SaaS UI Design System & Hi-Fi Screens	Focus: Applying the SaaS design system to produce a high-fidelity dashboard and workflow screens.
Session Title	Day 12: Hi-Fi Dashboard & Workflow UI Design	Prepare AI-generated realistic data sets for the dashboard and workflow screens.

Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 12, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Apply the SaaS design system to produce a high-fidelity dashboard and workflow screen set.	Ensure realistic data is used — placeholder data makes a SaaS dashboard feel unprofessional.
Session Learning Objective (SLO)	Students will design the hi-fi primary dashboard and 4 workflow screens applying the enterprise design system with realistic data and AI-generated micro-copy.	Focus on realistic data density — the dashboard must look credible with real numbers and realistic data sets.
Core Deliverable Link	Hi-Fi Dashboard + Workflow Screens	High-fidelity SaaS platform screens for the capstone.

III. Required Resources & Tech

Item	Details
Presentation/Slides	From Wireframe to Hi-Fi SaaS: Realistic Data, Density, and Visual Hierarchy.
Handout/Worksheet	SaaS Hi-Fi Screen Checklist.
Technology/Tools	Figma, ChatGPT.
AI Tool Prompt	"Generate realistic dummy data for a [SaaS type] dashboard: Include 12 months of [metric] data, 5 user names with activity metrics, and 8 project names with status labels."
Pre-Reading/Prep	SaaS UI Design Trends (Dribbble, SaaS Design Blog); Data-Dense UI Best Practices (Smashing Magazine).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
----------	------	---------

Hook & Context	3 min	Show a SaaS dashboard with placeholder "Lorem ipsum" data vs. one with realistic numbers. Ask: "Which one looks like a real product? Which would you show to a potential customer?"
Review	2 min	Recap Day 11: SaaS design system and enterprise component library. Today we apply it at high fidelity.
Agenda & SLO	2 min	Design the hi-fi dashboard and workflow screens using the enterprise design system with realistic data.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define SaaS design characteristics: Data-dense interfaces, power users, multi-role access, onboarding complexity, retention-focused UX.	Contrast: "A consumer app must be learned in 30 seconds. A SaaS product may take 30 days — but must reward that investment."
I Do (Instructor)	10 min	Live demo: Conduct a SaaS competitive audit using ChatGPT. Analyze dashboard structure, key workflows, and monetization cues.	Show how enterprise UX prioritizes efficiency over aesthetics: "The best dashboard is the one you never have to look at."
We Do	10 min	Workshop: Students draft their SaaS product brief and conduct a competitive audit of 2 competitors.	Circulate: Is the product brief defining a real workflow problem, not just a feature list?
Critical Analysis & Assessment	10 min	Product brief review: Is the SaaS product solving a specific, measurable workflow problem for a defined user role?	Connect to capstone: Every design decision must solve the workflow problem defined today.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
----------	------	---------

Q&A	1 min	Clarify SaaS product brief and competitive audit requirements.
Wrap-up	2 min	Recap: SaaS design is about making complex workflows feel inevitable.
Homework/Next Session	2 min	Finalize SaaS Product Brief and Competitive Audit; research target user role for Day 2.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: SaaS Product Brief and Competitive Audit submitted.	Current Session SLO	
Summative	Brief and audit inform all capstone design decisions.	SaaS Platform Design Project	
Soft Skill Gate	Enterprise-level product thinking in brief development.	TLO (Professional Foundations)	

Day 13: Onboarding Flow & SaaS Platform Prototype

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Ensure students have completed their hi-fi dashboard and workflow screens before this session.
Module/Week	Week 3: SaaS UI Design System & Hi-Fi Screens	Focus: Designing the SaaS onboarding flow and building a navigable Figma prototype.

Session Title	Day 1: Introduction to SaaS Design & Product Thinking	Verify student access to Figma Prototype Mode.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 13, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Design a SaaS onboarding flow and build a navigable platform prototype.	Ensure the onboarding flow gets the user to their first "aha moment" as quickly as possible.
Session Learning Objective (SLO)	Students will design a 5-screen SaaS onboarding flow and connect all hi-fi screens into a navigable Figma prototype covering the primary user workflow.	Focus on progressive disclosure in onboarding — reveal complexity gradually, not all at once.
Core Deliverable Link	Onboarding Flow + Navigable SaaS Prototype	Functional prototype for client presentation and portfolio.

III. Required Resources & Tech

Item	Details
Presentation/Slides	SaaS Onboarding Design: The Race to the First "Aha Moment."
Handout/Worksheet	Onboarding Flow Checklist; SaaS Prototype Connection Guide.
Technology/Tools	Figma (Prototype Mode).
AI Tool Prompt	"Design a 5-step onboarding flow for a [SaaS type] that gets the [user role] to their first value moment as quickly as possible. Include welcome, setup, key feature introduction, and first task completion."
Pre-Reading/Prep	SaaS Onboarding Best Practices (UserOnboard.com); Figma Prototype Tutorial.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Show the onboarding flows of Notion, Figma, and Slack. Ask: "What is the 'aha moment' each product is trying to create? How quickly do they get you there?"
Review	2 min	Recap Day 12: Hi-fi dashboard and workflow screens. Today we add the onboarding flow and connect everything into a prototype.
Agenda & SLO	2 min	Design the SaaS onboarding flow and build a navigable prototype.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define SaaS onboarding stages: Welcome, Profile Setup, Feature Introduction, First Task, Success State. Show how each stage reduces friction to the first "aha moment."	Discuss: "Every extra onboarding step loses 20% of users. What is truly essential?"
I Do (Instructor)	10 min	Live demo: Design a 5-screen onboarding flow in Figma and connect it to the dashboard in prototype mode.	Show how to use progress indicators, contextual tooltips, and celebratory success states in onboarding.
We Do	10 min	Workshop: Students design their onboarding flow and connect all screens into a navigable prototype.	Circulate: Check for broken connections, correct navigation flow, and onboarding clarity.
Critical Analysis & Assessment	10 min	Prototype walk-through: Navigate as a new user. How long does it take to reach the first "aha moment"?	Identify and fix the top 2 prototype connection issues or onboarding friction points.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	1 min	Address onboarding design and prototype connection questions.
Wrap-up	2 min	Recap: The best SaaS onboarding is the shortest path to value.
Homework/Next Session	2 min	Complete onboarding flow and navigable prototype; prepare for Day 14 SaaS UI Studio Day.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Onboarding flow screens and prototype link submitted.	Current Session SLO	
Summative	Onboarding flow and prototype are core to the SaaS Platform capstone.	SaaS Platform Design Project	
Soft Skill Gate	Strategic thinking about user activation and onboarding friction.	TLO (Professional Foundations)	

Day 14: SaaS UI Studio Day

I. Program Overview & Philosophy

Field	Value	Customization Notes
-------	-------	---------------------

Program Title	Month 6 — SaaS Platform Design	Ensure all students have completed their hi-fi screens, onboarding flow, and prototype before this session.
Module/Week	Week 3: SaaS UI Design System & Hi-Fi Screens	Focus: Buffer and studio time for SaaS UI refinement and prototype polish.
Session Title	Day 14: SaaS UI Studio Day	Prepare the SaaS Design Review Rubric for peer critique circles.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 14, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Refine SaaS UI design deliverables to professional standard through critique and iteration.	Track student progress against Week 3 deliverables.
Session Learning Objective (SLO)	Students will refine their design system, hi-fi screens, onboarding flow, and prototype based on peer and instructor feedback.	Identify students who need targeted support on data density, component consistency, or prototype connections.
Core Deliverable Link	Refined Hi-Fi SaaS Screens + Polished Prototype	Portfolio-ready SaaS UI design package.

III. Required Resources & Tech

Item	Details
Presentation/Slides	N/A (Studio Day)
Handout/Worksheet	SaaS UI Consistency & Power User Audit Checklist.
Technology/Tools	Figma.
AI Tool Prompt	"Act as an enterprise product design director reviewing my SaaS platform design. Identify the top 3 improvements that would most improve power user efficiency."

Pre-Reading/Prep	Review Days 11–13 instructor feedback.
------------------	--

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"The SaaS products that win are the ones that make the complex feel inevitable. Today we close that gap between 'good enough' and 'product-ready.'"
Review	2 min	Overview of the four Week 3 deliverables: Design System, Hi-Fi Screens, Onboarding Flow, Prototype.
Agenda & SLO	2 min	Define goals: Refinement, power user audit, prototype testing, and peer support.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Introduce the SaaS UI Power User Audit: Primary task in 3 clicks? All critical data visible without scrolling? All components from the design system?	Set peer critique norms: Every piece of feedback must reference a SaaS UX principle or enterprise design standard.
I Do (Instructor)	10 min	Demonstrate how to conduct a power user efficiency audit: Time how long it takes to complete the primary task in the prototype.	Show how to document friction points using a severity matrix: Critical, Serious, Minor.
We Do	10 min	Peer critique circles: Conduct power user audits on each other's hi-fi screens and prototype.	Identify students who need targeted support on onboarding design or hi-fi completion.
Critical Analysis &	10 min	Individual refinement of hi-fi screens and prototype based on audit findings.	Confirm all Figma files are organized and prototype links are stable.

Assessment			
------------	--	--	--

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	1 min	Address final technical questions on SaaS UI and prototyping.
Wrap-up	2 min	Confirm goal: All students have a complete, polished hi-fi SaaS design and working prototype.
Homework/Next Session	2 min	Finalize all Week 3 deliverables; prepare for Day 15 Weekly Studio Challenge (SaaS Platform Design Review).

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of refined hi-fi screens and prototype.	Current Session SLO	
Summative	Completion of Week 3 deliverables.	SaaS Platform Design Project	
Soft Skill Gate	Power user empathy in peer critique.	TLO (Professional Foundations)	

Day 15: Weekly Studio Challenge (SaaS Platform Design Review)

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Ensure students have finalized all Week 3 deliverables before the challenge.
Module/Week	Week 3: SaaS UI Design System & Hi-Fi Screens	Focus: Weekly Studio Challenge — SaaS Platform Design Package Presentation.
Session Title	Day 15: Weekly Studio Challenge (SaaS Platform Design Review)	Day 15: Weekly Studio Challenge (SaaS Platform Design Review)
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 15, Week 3	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Present the complete SaaS Platform Design Package for peer and instructor review.	Link challenge to the cumulative skills of Week 3.
Session Learning Objective (SLO)	Students will present their Design System, Hi-Fi Dashboard, Workflow Screens, Onboarding Flow, and Prototype in a simulated enterprise product design review.	Ensure every design decision is defended with a workflow insight or enterprise design principle.
Core Deliverable Link	SaaS Platform Design Package	Full Week 3 studio challenge submission.

III. Required Resources & Tech

Item	Details
Presentation/Slides	
Handout/Worksheet	Enterprise Product Design Review Rubric.
Technology/Tools	Figma.

AI Tool Prompt	"Act as an enterprise product design director reviewing my SaaS platform design package. Evaluate the dashboard clarity, workflow efficiency, onboarding experience, and design system consistency."
Pre-Reading/Prep	"Act as an enterprise product design director reviewing my SaaS platform design package. Evaluate the dashboard clarity, workflow efficiency, onboarding experience, and design system consistency."

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	Brief scenario: "The Head of Product, the CTO, and 2 enterprise customer champions are in the room. You have
Review	2 min	Recap Week 3: Design system, hi-fi dashboard, workflow screens, onboarding flow, and prototype.
Agenda & SLO	2 min	Define the challenge: Present the complete SaaS Platform Design Package in an enterprise product design review.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Assign the challenge: Present the SaaS Platform Design Package in a structured enterprise design review format.	Distribute the Enterprise Product Design Review Rubric.
I Do (Instructor)	10 min	Demonstrate the enterprise design review format: Design system overview, dashboard walkthrough, primary workflow demo, onboarding flow presentation.	Model how to justify design decisions using workflow research data, not personal aesthetics.
We Do	10 min	Workshop: Students prepare and rehearse their enterprise design reviews.	Targeted support for students behind on hi-fi screens or prototype.

Critical Analysis & Assessment	10 min	Peer reviews: Does the platform serve the power user efficiently? Does it scale to enterprise needs?	Ensure every design decision is defended with a workflow insight or design principle.
--------------------------------	--------	--	---

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	1 min	Address specific review questions.
Wrap-up	2 min	Summarize Week 3 accomplishments.
Homework/Next Session	2 min	Finalize SaaS Platform Design Package; preview Week 4: Accessibility, Handoff & Portfolio.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Submission of SaaS Platform Design Package.	Current Session SLO	
Summative	Completion of Week 3 deliverables.	SaaS Platform Design Project	
Soft Skill Gate	Professional enterprise product design review delivery.	TLO (Professional Foundations)	

Day 16: Accessibility & Enterprise Design Handoff

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Ensure students have finalized all hi-fi screens and prototype before this session.
Module/Week	Week 4: Accessibility, Handoff & Portfolio	Focus: Producing an accessible, developer-ready SaaS platform handoff.
Session Title	Day 16: Accessibility & Enterprise Design Handoff	Prepare the Stark Figma plugin and Figma Inspect Mode tutorial for enterprise design documentation.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 16, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Produce an accessible, developer-ready SaaS platform handoff package.	Ensure the handoff is comprehensive enough for an enterprise engineering team to build without gaps.
Session Learning Objective (SLO)	Students will audit their SaaS platform for WCAG 2.1 AA compliance, add developer annotations, and export a complete enterprise design handoff package.	Focus on enterprise accessibility requirements — many SaaS products serve users with accessibility needs in professional contexts.

Core Deliverable Link	Accessible SaaS Design + Enterprise Handoff Package	Developer-ready SaaS platform design package.
-----------------------	---	---

III. Required Resources & Tech

Item	Details
Presentation/Slides	Enterprise Accessibility Standards; SaaS Design Handoff Best Practices.
Handout/Worksheet	Enterprise Accessibility Audit Checklist; Design Handoff Documentation Guide.
Technology/Tools	Figma, Stark (plugin), Figma Inspect.
AI Tool Prompt	"Review my SaaS platform design for WCAG 2.1 AA compliance in enterprise contexts. Identify issues with color contrast in data visualizations, keyboard navigation patterns, and focus management in modals."
Pre-Reading/Prep	Enterprise Accessibility Guidelines (WCAG 2.1); SaaS Design Handoff Best Practices (Figma Blog).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"Enterprise SaaS products are often required by law to meet accessibility standards — WCAG compliance is a legal and contractual requirement, not a nice-to-have."
Review	2 min	Recap Week 3: Hi-fi dashboard, workflow screens, and prototype. Today we make the platform accessible and buildable.
Agenda & SLO	2 min	Conduct enterprise accessibility audits and produce a developer-ready handoff package.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define enterprise accessibility requirements: WCAG AA contrast ratios, keyboard navigation, focus management in modals and dropdowns, ARIA labels for data tables and charts.	Show how accessibility failures in SaaS cost enterprise deals: "We can't use your tool — it doesn't meet our accessibility procurement requirements."
I Do (Instructor)	10 min	Live demo: Run Stark audit on the dashboard, fix a contrast failure, and annotate the Figma file with ARIA labels and keyboard navigation notes.	Show Figma Inspect mode: How an enterprise developer documents component specs, spacing, and interaction states.
We Do	10 min	Workshop: Students conduct accessibility audits and add enterprise developer annotations.	Circulate: All text elements must pass 4.5:1; all data visualization colors must have pattern/shape alternatives.
Critical Analysis & Assessment	10 min	Handoff review: Can an enterprise engineering team build this platform from the Figma file without asking a single question?	Integrate the handoff documentation into the capstone portfolio case study.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	1 min	Address accessibility and handoff documentation questions.
Wrap-up	2 min	Recap: Enterprise accessibility is the standard — not the exception.

Homework/Next Session	2 min	Finalize Accessible SaaS Design and Handoff Package; prepare for Day 17: Portfolio Polish & Case Study Design.
-----------------------	-------	--

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Accessibility audit results and handoff package submitted.	Current Session SLO	
Summative	Accessible design and handoff complete the SaaS Platform capstone.	SaaS Platform Design Project	
Soft Skill Gate	Enterprise accessibility thinking and developer empathy.	TLO (Professional Foundations)	

Day 17: Portfolio Polish & Case Study Design

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Transition from design execution to professional presentation.
Module/Week	Week 4: Accessibility, Handoff & Portfolio	Focus: Structuring the Month 6 SaaS Platform Design project as a professional portfolio case study.
Session Title	Day 17: Portfolio Polish & Case Study Design	Prepare a professional SaaS dashboard (Notion, Linear, or HubSpot) for the opening analysis.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.

Date	Day 17, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Structure the SaaS Platform Design project as a professional portfolio case study.	Ensure the case study demonstrates enterprise product design thinking — strategic, research-driven, and scalable.
Session Learning Objective (SLO)	Students will curate and document their Month 6 work as a SaaS platform design case study incorporating product strategy, user research, dashboard design, workflow screens, onboarding, and accessibility.	Focus on enterprise portfolio presentation — hiring managers for SaaS design roles want to see systems thinking, not just beautiful screens.
Core Deliverable Link	Month 6 SaaS Platform Portfolio Case Study	Professional portfolio documentation of the SaaS Platform Design project.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Presenting SaaS Design Work: The Portfolio That Gets You Enterprise Roles.
Handout/Worksheet	SaaS Portfolio Case Study Writing Template.
Technology/Tools	Behance, Figma, Adobe Portfolio.
AI Tool Prompt	"Write a 200-word project description for a SaaS platform design case study. The product is [description], and my key design contributions were [list]. Emphasize enterprise design thinking, scalability, and user-centered workflow optimization."
Pre-Reading/Prep	Best SaaS Portfolio Case Studies (Dribbble, Behance, Linear Design Blog); Writing Enterprise Design Case Studies (UX Collective).

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"The designers who get enterprise SaaS roles are the ones who can show they think about systems — not just screens. Today we make that visible."
Review	2 min	Recap Month 6: Strategy, research, dashboard design, workflow screens, onboarding, accessibility, and handoff.
Agenda & SLO	2 min	Structure Month 6 work as a compelling, systems-thinking SaaS platform design case study.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Define the SaaS case study structure: Business Problem, User Workflow Research, IA & Navigation, Dashboard Design, Workflow Screens, Onboarding, Accessibility, and Impact Metrics.	Show how to frame the case study around the workflow problem solved, not just the visual output.
I Do (Instructor)	10 min	Use AI to draft project descriptions; peer-review for enterprise design thinking clarity and systems vocabulary.	Help students articulate the design system and scalability decisions: "Built to support 10 to 10,000 users."
We Do	10 min	Portfolio audit: Is the case study showing the full system — not just the prettiest screens? Is the workflow research visible?	Ensure the design system, accessibility work, and handoff are included as evidence of professional rigor.
Critical Analysis &	10 min	Assemble the SaaS Platform Design section of the student portfolio.	Ensure dashboard and workflow screen mockups look credible and data-rich throughout.

Assessment			
------------	--	--	--

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection		Group discussion: What is the most important enterprise design principle you learned this month?
Q&A	1 min	Address portfolio platform questions.
Wrap-up	2 min	Recap: Your SaaS portfolio case study proves you can design at enterprise scale.
Homework/Next Session	2 min	Finalize Month 6 Portfolio Case Study; prepare for Day 18: Final Showcase Rehearsal.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of portfolio case study quality and enterprise design thinking clarity.	Current Session SLO	
Summative	Month 6 SaaS Platform Portfolio Case Study quality.	SaaS Platform Design Project	
Soft Skill Gate	Ability to articulate enterprise design systems thinking compellingly.	TLO (Professional Foundations)	

Day 18: Portfolio Polish & Technical Review

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Transition from creation to professional presentation.
Module/Week	Week 4: Accessibility, Handoff & Portfolio	Focus: Final portfolio integration, technical production audit, and complete program portfolio review.
Session Title	Day 18: Portfolio Polish & Technical Review	Prepare a "Complete Program Portfolio Review" checklist covering all 6 months.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 18, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Curate and refine the complete 6-month design portfolio for professional presentation.	Ensure the portfolio tells the complete story of the student's growth from graphic designer to enterprise product designer.
Session Learning Objective (SLO)	Students will audit their complete 6-month portfolio for consistency, quality, and narrative coherence, and make final refinements before the Day 20 Showcase.	Focus on the portfolio arc — does the work show clear growth and increasing design sophistication from Month 1 to Month 6?
Core Deliverable Link	Complete 6-Month Design Portfolio	The comprehensive portfolio evidence for the program certification.

III. Required Resources & Tech

Item	Details
------	---------

Presentation/Slides	The Complete Product Design Portfolio: From Graphic Design to Enterprise SaaS.
Handout/Worksheet	Complete Program Portfolio Audit Checklist.
Technology/Tools	Behance, Adobe Portfolio, Figma.
AI Tool Prompt	"Review my complete product design portfolio covering graphic design, branding, UX/UI, mobile, and SaaS design. Identify any gaps in process documentation or inconsistencies in presentation quality."
Pre-Reading/Prep	Best Product Design Portfolios (Behance, AIGA, Dribbble); Building a Narrative Portfolio — UX Collective.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"Your portfolio is not just a collection of work. It is the evidence of a designer who can move from a blank page to an enterprise product — and do it with intention at every step."
Review	2 min	Recap the 6-month program journey: Graphic Design → Branding → UX/UI → Mobile → SaaS. Today we show that arc clearly.
Agenda & SLO	2 min	Goal: Final audit of the complete portfolio for quality, consistency, and narrative coherence.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	The Complete Portfolio Standard: 6 case studies, each with process documentation, key design decisions, and measurable outcomes.	Show how to create a portfolio index/cover page that tells the full program story.

I Do (Instruction)	10 min	Full portfolio audit: Each student reviews their 6 case studies against the Complete Program Portfolio Audit Checklist.	Help students identify their 3 strongest portfolio pieces and ensure they are leading with those.
We Do	10 min	Peer portfolio review: Does the portfolio show clear design growth from Month 1 to Month 6?	Check for consistent visual presentation across all 6 case studies: font, layout, mockup style.
Critical Analysis & Assessment	10 min	Final refinements: Elevate the weakest case study, strengthen the strongest.	Ensure the portfolio URL and prototype links are all live and accessible.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Reflection		Group discussion: Looking at your Month 1 work next to your Month 6 work — what do you see?
Q&A	1 min	Final portfolio platform and presentation questions.
Wrap-up	2 min	"You are ready. Tomorrow you present the full arc of your design education."
Homework/Next Session	2 min	Final rest and polish; prepare for Day 19: Final Showcase Rehearsal and Day 20: Program Graduation.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Review of complete portfolio quality and consistency.	Current Session SLO	

Summative	Quality and narrative coherence of the complete 6-month portfolio.	Complete 6-Month Design Portfolio	
Soft Skill Gate	Ability to articulate 6 months of design growth clearly and confidently.	TLO (Professional Foundations)	

Day 19: Final Showcase Rehearsal & Polishing

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	Transition from creation to professional presentation.
Module/Week	Week 4: Accessibility, Handoff & Portfolio	Focus: Final technical rehearsal and polish before the Day 20 Program Graduation Showcase.
Session Title	Day 19: Final Showcase Rehearsal & Polishing	Prepare the "Technical Panic Checklist" and ensure all students have tested their portfolio links and prototype connections.
Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 19, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Demonstrate complete product design program proficiency through professional final presentation delivery.	Focus on "Stage Presence" and the confidence that comes from 6 months of intentional design practice.

Session Learning Objective (SLO)	Students will deliver a full dress rehearsal of their Day 20 presentation, receive structured peer feedback, and make final technical preparations for the Program Graduation Showcase.	Focus on the 6-month narrative — the presentation must show the journey, not just the destination.
Core Deliverable Link	Finalized Program Graduation Presentation	Ready for the Day 20 Program Graduation Showcase.

III. Required Resources & Tech

Item	Details
Presentation/Slides	
Handout/Worksheet	Final Presentation Feedback Matrix; Technical Panic Checklist.
Technology/Tools	Figma, Presentation Software, Behance/Portfolio Site.
AI Tool Prompt	"Simulate the toughest question a hiring manager or investor might ask during my design portfolio presentation. What would they challenge me on?"
Pre-Reading/Prep	Preparing for a high-stakes portfolio presentation — UX Collective; How great designers talk about their work — Design Observer.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"This is your last rehearsal. Everything you have learned, every project you have built, every critique you have survived — it all shows up tomorrow."
Review	2 min	Recap the complete 6-month program structure. Today is about telling that story with confidence.
Agenda & SLO	2 min	Remove all friction: technical failures, unclear transitions, and missed design highlights.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
Hook & Context	10 min	Managing high-stakes presentation anxiety: Breathing techniques, pacing, and the power of deliberate silence.	Remind students: "You know this work better than anyone in the room. They are learning from you."
I Do (Instructor)	10 min	Full Technical Dry Run: Navigate the portfolio, switch to prototypes, return to slides — all on the device and connection they will use tomorrow.	Emphasize: Test every link. Know which slides to skip if time runs short.
We Do	10 min	Full-group dress rehearsal: Each student presents 3 minutes for peer feedback.	Focus feedback on the 6-month narrative arc — does the presentation show clear growth and design intention?
Critical Analysis & Assessment	10 min	Final Stress Test: Peer Q&A with the hardest possible questions about design decisions and process choices.	Coach: "The best answer to a tough question starts with 'Great question. Here is my thinking.'"

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
Q&A	1 min	Last-minute technical and presentation advice.
Wrap-up	2 min	You are ready. You have earned this.
Homework/Next Session	2 min	Final rest. Tomorrow: Program Graduation and Showcase.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Daily Exit Ticket: Green light signal for presentation readiness.	Current Session SLO	
Summative	Finalized graduation presentation and complete portfolio.	SaaS Platform Design Project	
Soft Skill Gate	Professional composure, narrative clarity, and resilience under pressure.	TLO (Professional Foundations)	

Day 20: Program Graduation & Final Showcase

I. Program Overview & Philosophy

Field	Value	Customization Notes
Program Title	Month 6 — SaaS Platform Design	The culminating session of the complete 6-month Product Design Specialization.
Module/Week	Week 4: Accessibility, Handoff & Portfolio	Focus: Complete program portfolio showcase and celebration of the designer's journey from graphic design to enterprise SaaS.
Session Title	Day 20: Program Final Showcase	Set up a "Design Portfolio Showcase" environment — invite guest panelists, industry mentors, or alumni if possible.

Duration	3 Hours (1 hr Lesson / 2 hrs Task)	Standard VTC Session Length.
Date	Day 20, Week 4	
Instructor	Instructor Name	

II. Learning Outcomes & Objectives

Field	Value	Customization Notes
Terminal Learning Outcome (TLO) Link	Demonstrate complete product design program proficiency through a professionally presented, 6-month portfolio that spans graphic design, branding, UX/UI, mobile, and enterprise SaaS.	Evaluate the holistic quality of the student's complete design journey.
Session Learning Objective (SLO)	Students will present their complete Product Design Specialization portfolio — featuring work from all 6 months — in a final showcase that demonstrates their growth from graphic designer to enterprise product designer.	Final reflection: How has their design thinking evolved from Month 1 to Month 6?
Core Deliverable Link	Complete Product Design Specialization Portfolio	The ultimate deliverable of the entire program.

III. Required Resources & Tech

Item	Details
Presentation/Slides	Program Graduation: The Product Design Specialization Showcase.
Handout/Worksheet	Final Program Assessment Rubric.
Technology/Tools	Figma, Behance, Adobe Portfolio, PDF Compiler.
AI Tool Prompt	"Write a 300-word professional biography for a product designer who has just completed a 6-month specialization covering graphic design, branding, UX/UI, mobile app design, and SaaS platform design."
Pre-Reading/Prep	Review all 6 months of instructor feedback.

III. Session Flow (60 Minutes)

A. Introduction & Review (5 minutes)

Activity	Time	Details
Hook & Context	3 min	"Six months ago, you started with a blank canvas. Today, you present a complete design portfolio that proves you can take any product — from brand identity to enterprise platform — and design it with intention."
Review	2 min	Recap the 6-month program: Graphic Design, Branding, UX/UI, Mobile App, SaaS Platform.
Agenda & SLO	2 min	Today is a celebration and a launch. Your portfolio is your most powerful professional asset — show it with pride.

B. Core Instruction & Workshop (40 minutes)

This section follows the **I Do (Instructor), We Do (Guided Practice)** methodology.

Phase	Time	Content & Key Activities	Instructor Guidance Notes
I Do (Instructor)	10 min	Instructor demonstrates the ideal graduation presentation structure: Design journey narrative, 3 hero projects, key growth moments.	Model how to open with the "Before and After" of their design thinking from Month 1 to Month 6.
We Do	10 min	Full graduation presentations: Each student presents their complete 6-month Product Design Specialization portfolio.	Panel critique: Instructor + guest panelists evaluate against the Final Program Assessment Rubric.
Critical Analysis & Assessment	10 min	Portfolio Showcase: Presentations submitted and celebrated.	Provide specific, public praise for each student's standout design achievement across the program.

C. Conclusion & Wrap-up (5 minutes)

Activity	Time	Details
----------	------	---------

month	1 min	Clarify SaaS product brief and competitive audit requirements.
Wrap-up	2 min	Recap: SaaS design is about making complex workflows feel inevitable.
Homework/Next Session	2 min	Finalize SaaS Product Brief and Competitive Audit; research target user role for Day 2.

IV. Assessment Plan

Assessment Type	Check Point	TLO/Deliverable Link	Status (Y/N)
Formative	Final presentation delivery, narrative clarity, and design confidence.	Current Session SLO	
Summative	Complete and professional Product Design Specialization Portfolio submission.	SaaS Platform Design Project	
Soft Skill Gate	Professional presentation composure, design narrative clarity, and growth mindset articulation.	TLO (Professional Foundations)
